

INRAC's First Progress Report

On the City's Infrastructure

City Council tasked INRAC

To Perform an 'Infrastructure Needs Review'

- To define deficiencies

- Priority of each deficiency

- to Estimate Funding needs

- And potential funding sources.

Recommendations to be presented to Council in early 2020.

Infrastructure and Natural Resources Advisory Committee (INRAC)

9-Member Council appointed committee of Fullerton residents

Advises the City Council on infrastructure, provides input on policies, plans & programs related to energy, natural resources, environmental laws, & protection of the environment.

Residents are welcome to attend and participate

2nd and 4th Wednesdays

City Hall Council Chambers Conference Room – 7:30 am

- Patricia Tutor

'Infrastructure Needs Review' includes

- *Streets, Alleys, & Bridges*
- *Parking Lots, Parking Structures, & Airport*
- *Traffic Systems & Monument Signs*
- *Buildings & Facilities*
- *Sewer System, Water System & Storm Drain System*
- *Parks & Trails*
- *Landscape & Trees, Street Lights, I.T. Systems*
- *Maintenance Equipment, PD Equipment, & Fire Equipment*

This is a progress review

- Today we are focused primarily on our Streets
- We will provide additional reviews on the other aspects of the infrastructure
- We will provide final findings & recommendations early next year.

- Our infrastructure has deteriorated, badly
 - For it has been underfunded for years
- It will be resolved only if we, the citizens, agree it is an issue
 - And we resolve to fix it
- Thus we start with tonight's discussion

- David Grantham, Senior Engineer for the City will provide our progress report
- We will solicit inputs and questions
 - after the presentation
