Project No. 12572.001

SLR Development California, LLC
4180 La Jolla Village Drive, Suite 125
La Jolla, California 92037

Attention: Mr. Adam Covington

Subject: Phase I Environmental Site Assessment
215, 217, 221, 223, 225 and 229 East Orangethorpe Avenue and
1101 and 1111 South Lemon Street
Fullerton, California

Leighton and Associates, Inc. (Leighton) is pleased to present this Phase I Environmental Site Assessment Report for the property located at 215, 217, 221, 223, 225 and 229 East Orangethorpe Avenue and 1101 and 1111 South Lemon Street in the city of Fullerton, California (subject site). Leighton declares that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 Code of Federal Regulations (CFR) 312, and the ASTM International (ASTM) Standard E1527-13.

Leighton has the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject site. Leighton has developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

If you have questions regarding this report, please contact us. We appreciate the opportunity to be of service to SLR Development California, LLC.

Respectfully submitted,

LEIGHTON AND ASSOCIATES, INC.

1.0 INTRODUCTION

1.1 Authorization

Leighton and Associates, Inc. (Leighton) performed a Phase I Environmental Site Assessment (ESA) of the property located at 215, 217, 221, 223, 225 and 229 East Orangethorpe Avenue and 1101 and 1111 South Lemon Street in the city of Fullerton, Orange County, California (subject site – Figure 1) in accordance with the authorization of SLR Development California, LLC (SLR).

1.2 Purpose

The purpose of the Phase I ESA was to identify, to the extent feasible and pursuant to the processes prescribed in ASTM International (ASTM) E1527-13, recognized environmental conditions (RECs), historical RECs (HRECs), or controlled RECs (CRECs) in connection with the subject site.

RECs are defined, according to ASTM E1527-13 as "*the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not RECs.*"

HRECs are defined, according to ASTM E1527-13 as "*a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.*"

CRECs are defined, according to ASTM E1527-13 as "*a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.*" (ASTM E1527-13, 2013).

DRAFT

1.3 Scope of Work

The scope of work was performed in accordance with Leighton's proposal dated September 10, 2019 and included the following tasks:

- A reconnaissance-level visit of the subject site for evidence of the release(s) of hazardous materials and petroleum products and to assess the potential for onsite releases of hazardous materials and petroleum products;
- Records review (including review of previous environmental reports, selected governmental databases, and historical review);
- Interviews; and
- Preparation of this report presenting our findings.

1.4 Significant Assumptions

Leighton assumes that the purpose of this Phase I ESA is to provide appropriate inquiry into the previous ownership and use of the subject site so that the Client may qualify for the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) landowner liability protections as defined in CERCLA, 42 USC §9601(35)(B). Leighton also assumes that the information provided by the Client and its agents, regulatory database provider, and regulatory agencies is true and reliable.

1.5 Limitations and Exceptions

Leighton performed the Phase I ESA in conformance with the scope and limitations of ASTM E1527-13 of the subject site. Other than the non-scope items shown in Section 1.6 that were not applicable, there were no exceptions to, or deletions from, this practice.

Property specific activities performed by Leighton and information collected regarding these activities are summarized within this report. The findings of the Phase I ESA are presented in Section 7.0. Opinions, and conclusions drawn by Leighton, based on the information collected as part of the Phase I ESA, are presented in Sections 8.0 and 9.0, respectively. References are included as Appendix A. Subject site photographs are presented in Appendix B. Completed interview forms are included as Appendix C. The Environmental Lien and

DRAFT

Activities and Use Limitations (AUL) Search report is included in Appendix D. The Environmental Radius Report and Vapor Encroachment Screen are included as Appendix E. Historical documentation is provided in Appendix F.

This Phase I ESA was conducted in a manner consistent with the level of care and skill ordinarily exercised by members of the profession currently practicing in the same locality under similar conditions.

The observations and conclusions presented in this report are professional opinions based on the scope of activities, work schedule, and information obtained through the Phase I ESA described herein. Opinions presented herein apply to property conditions existing at the time of our study and cannot necessarily be taken to apply to property conditions or changes that we are not aware of or have not had the opportunity to evaluate. It must be recognized that conclusions drawn from these data are limited to the amount, type, distribution, and integrity of the information collected at the time of the investigation, the methods utilized to collect and evaluate the data, and that a full and complete determination of environmental risks cannot be made. Although Leighton has taken steps to obtain true copies of available information, we make no representation or warranty with respect to the accuracy or completeness of this information.

This practice does not address whether requirements in addition to all appropriate inquiry have been met in order to qualify for the landowner liability protections including the continuing obligation not to impede the integrity and effectiveness of activity and use limitations, or the duty to take reasonable steps to prevent releases, or the duty to comply with legally required release reporting obligations. Users should also be aware that there are likely to be other legal obligations with regard to hazardous substances or petroleum products discovered on the subject site that are not addressed in this practice and that may pose risks of civil and/or criminal sanctions for non-compliance.

1.6 Special Terms and Conditions

The scope of work for this Phase I ESA did not include testing of electrical equipment for the presence of PCBs or collection of other environmental samples such as soil, groundwater, air, building materials, paint, or other media; assessment of natural hazards such as naturally occurring asbestos, radon gas or methane gas; assessment of the potential presence of radionuclides; or

DRAFT

assessment of nonchemical hazards such as the potential for damage from earthquakes or floods, or the presence of endangered species or wildlife habitats. This Phase I ESA also did not include an extensive assessment of the environmental compliance status of the subject site or of businesses operating at the subject site.

1.7 User Reliance

This report is for the exclusive use of SLR. Use of this report by any other party shall be at such party's sole risk.

1.8 Important Information about Geoenvironmental Reports

SLR is referred to Appendix H regarding important information provided by Geoprofessional Business Association (GBA) on geoenvironmental studies and reports.

DRAFT

2.0 SITE DESCRIPTION

2.1 Location and Legal Description

The subject site is located northwest of the intersection of East Orangethorpe Avenue and South Lemon Street at the addresses of 215, 217, 221, 223, 225 and 229 East Orangethorpe Avenue and 1101 and 1111 South Lemon Street in the city of Fullerton, Orange County, California (Figure 1). The Orange County Assessor's office designated the subject site as portions of Assessor Parcel Numbers (APNs) 073-060-64, 073-060-28, and 073-060-65. Other historical addresses associated with the subject site include 1105 and 1009 South Lemon Street. A legal description for the subject site APNs is included in the Environmental Lien and AUL Search Report attached in Appendix D.

2.2 Subject Site Vicinity General Characteristics

The subject site vicinity is generally developed for commercial use.

2.3 Current Use of the Subject Site

The subject site is an approximately 3.8-acre irregular-shaped lot that is currently developed with two single-story, multi-tenant commercial buildings and associated asphalt-paved parking lots (Appendix B, Photos 1 through 10).

Current tenants include a property management/security office (221 East Orangethorpe Avenue), S&P Nail Salon (223 East Orangethorpe Avenue), Salon Centric (225 East Orangethorpe Avenue), Laser Quest (229A East Orangethorpe Avenue), Pho 88 (1101 South Lemon Street), and Hot Wok (1111 South Lemon Street). The addresses of 215, 217, and 229B are currently vacant.

2.4 Descriptions of Structures, Roads and Other Improvements on the Property

The subject site is developed with two, single-story, multi-tenant commercial buildings totaling approximately 24,648 square feet and 4,427 square feet. Asphalt-paved parking lots and minor landscaped areas fill in the remaining areas of the subject site. The larger building was constructed in the mid-1980s and the smaller building was constructed circa 1989.

DRAFT

The following utilities provide service to the subject site.

Natural Gas:	Southern California Gas Company
Source of Potable Water:	City of Fullerton
Electric:	Southern California Edison
Sewage Disposal:	City of Fullerton
Solid Waste Disposal:	Republic Services

2.5 Current Uses of Adjoining Properties

The subject site is bordered to the east by South Lemon Street, followed by a parking lot and the Santa Ana River; to the south by Jack in the Box, Lee's Sandwiches, Metro PCS, and Express Car Wash, followed by East Orangethorpe Avenue; to the west by several commercial businesses included Chuck E. Cheese's, Office Depot, WSS Shoes, and UFC Gym; and to the north by parking lots, an AMC Theater, and Costco.

DRAFT

3.0 USER PROVIDED INFORMATION

The user of this Phase I ESA is identified as SLR. As a part of the ASTM E1527-13 process, Mr. Adam Covington of SLR, completed a questionnaire for the subject site. A copy of this questionnaire is provided in Appendix C.

3.1 Environmental Liens or Activity and Use Limitations

Mr. Covington indicated that he was not aware of environmental liens and AULs filed or recorded for the subject site.

No environmental liens or AULs were identified in the Environmental Lien and AUL Search report provided by NETR, dated November 6, 2019. A copy of the Environmental Lien and AUL Search report is included in Appendix D.

3.2 Specialized Knowledge

Mr. Covington acknowledged that he was aware of the existing commercial use of the subject site. The planned use of the subject site is mixed residential and commercial use. Mr. Covington was not aware of any environmental concerns associated with the subject site.

3.3 Commonly Known or Reasonably Ascertainable Information

Mr. Covington was aware of any commonly known or reasonably ascertainable information associated with the subject site.

3.4 Valuation Reduction for Environmental Issues

Mr. Covington indicated that the purchase price being paid for the subject site is based on fair market value.

3.5 Owner, Property Manager, and Occupant Information

According to Mr. Covington and the Environmental Lien and AUL Search report, the subject site is currently owned by PK I Fullerton Town Center, LP. The subject site is occupied by several restaurants, two salons, and a laser tag business.

DRAFT

3.6 Reason for Performing Phase I ESA

According to Mr. Covington, the reason for requesting this Phase I ESA is for due diligence purposes related to the purchase of the subject site.

3.7 Other

No additional information was provided by SLR.

DRAFT

4.0 RECORDS REVIEW

4.1 Physical Setting Source(s)

Leighton reviewed pertinent maps and readily available literature for information on the physiography and hydrogeology of the subject site. A summary of this information is presented in the following subsections.

4.1.1 Topography

The subject site is located in Section 34 of Township 3 South, Range 10 West of the San Bernardino Baseline and Meridian. Topographic map coverage of the subject site vicinity is provided by the United States Geological Survey (USGS) Anaheim, California Quadrangle (2012). The elevation of the subject site is approximately 154 feet above mean sea level and the topography is relatively flat.

4.1.2 Surface Water

Surface water was not observed on the subject site. Fullerton Creek is located approximately 720 feet north of the subject site.

4.1.3 Geology and Soils

The subject site is located in the Downey Plain within the southeastern margin of the Los Angeles Basin, a large structural depression within the Peninsular Ranges geomorphic province of California. In general, the Downey Plain is bordered by the Coyote and Peralta Hills on the north, the Santa Ana Mountains and Tustin Plain to the east, the Pacific Ocean to the south and Los Angeles Coastal Plain to the west. Several broadly warped coastal mesas represent uplifted areas along the active Newport-Inglewood structural fault zone. These mesas are separated by erosional gaps which were created by historic routes of the Santa Ana River.

The subject site lies near the lower reaches of the Santa Ana River and associated floodplain. The surface distribution of Holocene sediments, as recorded in early editions of regional soil survey maps (Eckmann and others, 1919), suggests that the Santa Ana River has recently wandered back and forth across the Downey Plain from Alamitos Bay to Newport Bay. Historical accounts, documents, and results of our study further

DRAFT

support widespread sheet flooding and marine transgression as being the dominant depositional process associated with the Santa Ana River floodplain.

Generally, the near-surface Quaternary age young Holocene age (11,000 years to present) alluvial soils are characterized as thinly bedded to massive, loose to medium dense, fine to coarse grained sands with varying proportions of silt and clay capping the site to thinly bedded, to massive, firm to stiff, laminated silt and clay with occasional thin beds of predominately fine grained sands.

4.1.4 Hydrogeology

During our concurrent geotechnical investigation of the subject site, groundwater was not encountered.

Review of the Seismic Hazard Zone Report for the Anaheim and Newport Beach 7.5 Minute Quadrangles, Orange County, California (SHZR 003) indicates the historically shallowest groundwater depth is reported to occur greater than 50 feet bgs (CGS, 2001).

Geotracker, a State Water Resources Control Board (SWRCB) online data warehouse which tracks regulatory data about underground fuel tanks, fuel pipelines, and public drinking water supplies, was reviewed regarding reported depths to groundwater in the vicinity. Groundwater in the vicinity of the subject site was reported at depths between 73 to 83 feet bgs. The groundwater flow direction in the vicinity of the subject site is to the west-southwest.

4.1.5 Oil and Gas Fields

Leighton reviewed the California Department of Conservation, Division of Oil, Gas, and Geothermal Resources (DOGGR), Online Mapping System, on December 10, 2019. Evidence of oil wells or oil field-related facilities was not indicated on the subject site or within 0.25-miles of the subject site.

DRAFT

4.2 Standard Environmental Record Sources

A search of selected government databases was conducted by Leighton using the EDR Radius Map™ Report with GeoCheck® environmental database report system. Details and descriptions of the database search are provided in the EDR database report. The database report meets the government records search requirements of ASTM E1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process. The database listings were reviewed within the specified radii established by the ASTM E1527-13. A copy of this report is included in Appendix E.

4.2.1 Subject Site

Salon Centric was identified in the EDR database report at the subject site address of 225 East Orangethorpe Avenue. Salon Centric was listed as a HAZNET facility related to the offsite disposal of unspecified aqueous solution, off-specification, aged, or surplus organics, and other inorganic solid waste from 2014 through 2017. Salon Centric was also listed in the FINDS and ECHO databases associated with the use of regulated wastes used in the salon industry and in the Resource Conservation and Recovery Act (RCRA) Non-generator list. The information included in the EDR database report does represent a REC associated with the subject site.

4.2.2 Offsite

Information in the EDR database report was reviewed for facilities of potential environmental concern to the subject site. Additionally, the SWRCB Geotracker website and DTSC Envirostor website were used to supplement the information in the EDR database report.

The database search results for offsite properties, including those found within the “orphaned” unmapped listings, with potential to adversely impact the subject site are listed in the table below:

DRAFT

DRAFT

A regional volatile organic compound (VOC) groundwater plume is known to exist in the Fullerton, Anaheim, and Placentia areas. From the late 1950s through early 1980s, VOCs were used for industrial degreasing in metals and electronics manufacturing at several properties within the vicinity of the subject site. VOCs were released into the environment and impacted the shallow aquifer, which is generally less than 200 feet deep. Although the shallow aquifer is not directly being used for drinking water supplies, groundwater in this aquifer eventually flows into the deeper principal aquifer, which is used for potable water supplies. At least four production wells in the cities of Fullerton and Anaheim have been removed from service and destroyed due to VOC contamination in that area.

The Orange County Water District (OCWD) implemented the North Basin Groundwater Remedial Investigation and Feasibility Study (RI/FS), under Environmental Protection Agency (EPA) oversight, which focuses on a roughly five-square-mile portion of the groundwater aquifer located under Fullerton, Anaheim, and Placentia, to protect drinking water supplies in the principal aquifer. OCWD has completed the installation of 25 new monitoring wells at 13 locations as part of the RI/FS. These wells complement the extensive network of 80 existing monitoring wells OCWD previously installed to characterize groundwater contamination in the North Basin area. Based on the most recent plume map provided by the OCWD, updated in 2013, concentrations of VOCs may be present in the groundwater beneath the subject site at concentrations ranging from the five times the MCL for drinking water to concentrations 20 times the MCL (OCWD, 2013). A copy of the 2013 VOC Plume is presented in Appendix G.

Four OCWD-controlled monitoring wells are located adjacent to the west and south of the subject site. Wells FM-11 and FM-11A are located adjacent to the east and wells FM-23 and FM-23A are located adjacent to the south. Wells FM-11 and FM-11A were most recently monitoring in July 2019. Chlorinated solvents, 1,1-dichloroethene (1,1-DCE), trichloroethene (TCE), and tetrachloroethene (PCE), were detected at concentrations of 6.1 micrograms per liter (µg/L), 50 µg/L, and 20 µg/L, respectively, from well FM-11A. Well FM-11A is reportedly the shallow aquifer monitoring well and would be the first encountered groundwater beneath the subject site. Groundwater has historically been measured at

DRAFT

depths between 77.26 and 101.88 feet bgs in this well. **The elevated concentrations of VOCs detected in this well during the most recent sampling event are a considered a REC and vapor encroachment concern associated with the subject site.**

The other listings identified in the EDR database report were reviewed and not interpreted to represent an adverse effect to the subject site at the time of this report preparation based on one or more of the following:

- Type of release (soil only);
- Closure received from regulatory agency;
- Distance of the facility to the subject site; and
- Direction of groundwater flow (west-southwest) and location of the facility to the subject site (cross-gradient or down-gradient).

4.2.3 Vapor Encroachment

Leighton reviewed the Vapor Encroachment Screen (VES) produced using EDR's Vapor Encroachment Worksheet application that gathers regulatory database information from the accompanying Radius Report and allows the user to integrate groundwater information, regional geology, and other information to evaluate the concern for potential vapor encroachment from onsite activities and from adjacent properties. The VES application was designed by EDR to assist parties seeking to meet the search requirements of the ASTM Standard Practice for Assessment of Vapor Encroachment into Structures on Property Involved in Real Estate Transactions (E2600-10), also referred to as the Tier 1 VES, as defined by ASTM E2600-10.

The known regional VOC groundwater plume and the reported concentrations of VOCs detected in groundwater monitoring wells located immediately adjacent to the east of the subject site is considered a vapor encroachment/intrusion concern and a REC. A copy of the VES report has been included as Appendix E.

DRAFT

4.2.4 Regulatory Agency Contacts

On October 24, 2019, Leighton requested regulatory records for the addresses associated with the subject site. The following agencies were contacted or their respective online databases were researched:

- DTSC (Cypress and Chatsworth offices);
- Santa Ana Reginal Water Quality Control Board (SARWQCB);
- City of Fullerton Fire Department (OFD);
- Orange County Sanitation Department (OCSD);
- Orange County Health Care Agency (OCHCA); and
- South Coast Air Quality Management District (SCAQMD).

Records were not found for the subject site.

National Pipeline Mapping System (NPMS)

Leighton reviewed records posted on the National Pipeline Mapping System's NPMS Public Map Viewer on December 10, 2019. No pipelines containing hazardous liquids were shown on or adjacent to the subject site (NPMS, 2019).

4.2.5 Other Reports

No other reports were reviewed as part of this Phase I ESA.

4.3 Historical Use Information on the Property

Leighton reviewed selected historical information on the subject site. These references were reviewed for evidence of activities, which would suggest the presence of hazardous substances at the subject site and to evaluate the potential for the subject site to be impacted by offsite sources of contamination. The following paragraphs are a chronological summary of the review.

DRAFT

4.3.1 Aerial Photographs

Historical aerial photographs were reviewed for information regarding past subject site uses. Aerial photographs dated 1938, 1947, 1953, 1963, 1972, 1977, 1987, 1990, 1995, 2005, 2009, 2012, and 2016, provided by EDR, were reviewed. Copies of these photographs are included in Appendix F.

In the **1938, 1947,** and **1953** aerial photographs the subject site primarily developed as orchards with a small residence located in the southeast portion of the subject site. The surrounding properties are also developed as orchards with a few scattered residences. South Lemon Street is observed to the east of the subject site and East Orangethorpe Avenue is observed to the south of the subject site.

In the **1963** aerial photograph, the eastern half of the subject site continues to be developed as orchards and a residence. The western half of the subject site appears to be developed for commercial use and a miniature golf course. A large commercial structure is observed in the northwest portion of the subject site and one or two smaller commercial structures and a miniature golf course are observed in the southwest portion of the subject site. Commercial property and an orchard are observed to the north of the subject site. Orchards are observed to the west of the subject site. Commercial property, including what appears to be a gasoline service station, is observed to the south of the subject site. South Lemon Street, followed by commercial properties, including a gasoline service station, and agricultural land are observed to the east of the subject site. East Orangethorpe Avenue is observed to the south of the subject site.

In the **1972** aerial photograph, significant land use changes are not observed on the subject site and surrounding properties, except commercial property is now observed to the east of the subject site, across South Lemon Street.

In the **1977** aerial photograph, significant land use changes are not observed on the western portion of the subject site. The orchards previously observed on the eastern portion of the subject site appear to be fallowed and the miniature golf course observed in the western portion of the subject site is a vacant lot. Significant land use changes are not observed on the surrounding properties.

DRAFT

In the **1987** aerial photograph, significant land use changes are not observed on the subject site and surrounding properties with the exception that the present-day commercial building located in the western portion of the subject site has been constructed.

In the **1990** aerial photograph, significant land use changes are not observed on the western portion of the subject site. The eastern half of the subject site has been redeveloped for commercial use and the present-day commercial building is observed along eastern boundary of the subject site. The surrounding properties to the south appear to be redeveloped for their current use. The former gasoline services station to the south of the subject site has been redeveloped as the present-day car wash. The present-day commercial properties are observed on the surrounding properties.

In the **1995, 2005, 2009, 2012,** and **2016** aerial photographs, the present-day commercial developments are observed on the subject site and surrounding properties.

4.3.2 Historical Topographic Maps

Historical topographic maps provided in the EDR Historical Topographic Map Report were reviewed for information regarding past subject site uses, and include the following quadrangles: Anaheim (1896, 1898, 1901, 1942, 1949, 1950, 1965, 1972, 1981, and 2012), Corona (1902), and Garden Grove (1935). Copies of these maps are provided in Appendix F.

1896, 1898, 1901, 1902, and **1935:** No structures, tanks, or wells are depicted on the subject site. East Orangethorpe Avenue is depicted to the south of the subject site. South Lemon Street is depicted to the east of the subject site in the 1935 topographic map.

1942, 1949, and **1950:** Orchards and a residence located in the eastern portion of the subject site are depicted on the subject site. Orchards and a few scattered residences are depicted on the surrounding properties. East Orangethorpe Avenue is depicted to the south of the subject site. South Lemon Street is depicted to the east of the subject site.

1964 and **1972:** One large and one small commercial building are depicted in the western half of the subject site. The eastern half of the subject site is depicted as orchards with one small residence in the southeast corner.

DRAFT

Commercial properties and orchards are depicted to the north of the subject site. Commercial properties are depicted to the east of the subject site, across South Lemon Street. Several small commercial buildings are depicted to the south of the subject site, followed by East Orangethorpe Avenue. Pomona Street, followed by orchards, is depicted to the west of the subject site.

1981: Three commercial buildings are depicted on the subject site. Commercial properties are depicted on the surrounding properties to the west, north, south, and east of the subject site.

2012: Only landmark buildings are shown on the topographic map. No buildings are depicted on the subject site and surrounding properties.

4.3.3 Fire Insurance Maps

Fire insurance maps, or Sanborn® maps, are detailed city plans showing building footprints, construction details, use of structure, street address, etc. The maps were designed to assist fire insurance agents in determining the degree of hazard associated with a particular property. Sanborn Maps were produced from approximately 1867 to the present for commercial, industrial, and residential sections of approximately 12,000 cities and towns in the United States.

Sanborn® Maps were not published for the subject site and surrounding properties.

4.3.4 Historical City Directories

City Directories have been published for cities and towns across the US since the 1700s. Originally a list of residents, the City Directory developed into a tool for locating individuals and businesses in particular. For each street address listed, the directory recorded the name of the resident or business that operated from this addresses. While City Directory coverage is usually comprehensive for major cities, it may be sporadic for rural areas and small towns. The purpose of the City Directory research was to attempt to determine the businesses that were historically located at the subject site and adjacent addresses.

DRAFT

Leighton reviewed the EDR City Directory Abstract dated November 6, 2019 (Appendix F). Records were reviewed from 1920 to 2014 at approximate 5-year intervals. The following businesses were listed in the City Directory Abstract:

Address	Year	Listing
215 East Orangethorpe Avenue	1955	Castle Miniature Golf Course
	1966	Fullerton Miniature Golf Course
	1991	Mail Boxes Etc, USA, Fullerton
	1995	Mail Boxes Etc, USA, Western
	2005	Various Commercial Businesses
	2010	Various Commercial Businesses
	2014	Various Commercial Businesses
217 East Orangethorpe Avenue	1991	Finest Beauty Supply & Nail Care
	1995	Norwest Financial
	2005	Curves
221 East Orangethorpe Avenue	1991	Colour Works, California Sun Tanning Salon, and Sun
	1995	Nails By Lauren, California Image Salon, and Hair by Irene
	2005	Concepcion DDS, MIA, Inc.
	2010	Concepcion DDS, MIA, Inc.
	2014	Concepcion DDS, MIA, Inc.
223 East Orangethorpe Avenue	2010	TNT Nails Spa
225 East Orangethorpe Avenue	1991	Fullerton
	1995	Fashion Time
	2005	Floral Arrangements
	2010	OC Uniforms and GPMU, Inc.
229 East Orangethorpe Avenue	1995	Michaels Arts & Crafts
	2005	Laser Quest and It's New to You
	2010	Laser Quest and It's New to You
	2014	Leisure Entertainment Group, It's New to You, and Salon Centric

DRAFT

1101 South Lemon Street	1970	Cababa Basil R. (Helen)
	1991	Lou Coopers Donuts & Bakery
	1995	Lou Coopers Donuts & Bakery
1111 South Lemon Street	1991	Hot Wok Restaurant
	1995	Hot Wok Restaurant

No businesses of potential environmental concern were listed onsite.

One gasoline service station, Jiffy Service Station, was listed at the address of 251 East Orangethorpe Avenue, located adjacent to the south of the subject site, in 1980. A leaking underground storage tank (UST) case associated with the release of gasoline to the subsurface soil was remediated and closed by the OCHCA in 1987. This listing is not considered a REC with potential to impact the subject site.

No other surrounding properties of concern were included in the city directory report.

4.3.5 Building Department Records

Leighton reviewed building permits for the subject site addresses on the city of Fullerton online permit database. No permits of environmental concern were noted in the report.

4.3.6 Other Historical Sources

Other historical sources were not reviewed as a part of this Phase I ESA.

DRAFT

4.3.7 Summary of Historical Land Use

Based on historical records, land usage is summarized as follows:

Time Period	Land Usage	Reference
Prior to 1896	Unknown	None Available
Approximately 1896 to 1935	Vacant land, potential agricultural use	Topographic Maps
Approximately 1935 to 1963	Orchards and a residence (southeast corner)	Aerial Photographs Topographic Maps
Approximately 1963 to 1989	Orchards (eastern half) Commercial, including miniature golf course (western half)	Aerial Photographs Topographic Maps City Directories
Approximately 1989 to present	Commercial	Site Reconnaissance Aerial Photographs Topographic Maps City Directories

DRAFT

5.0 SITE RECONNAISSANCE

5.1 Methodology and Limiting Conditions

On November 26, 2019, a representative of Leighton conducted a reconnaissance–level assessment of the subject site, which consisted of observing and documenting existing conditions of the subject site and nature of the neighboring development. Photographs of the subject site are presented in Appendix B and their view directions are noted on Figure 2. Items noted during the subject site reconnaissance are also depicted on Figure 2.

5.2 General Property Setting

The subject site vicinity is generally developed for commercial use.

The subject site is an approximately 3.8-acre irregular-shaped lot that is currently developed with two single-story, multi-tenant commercial buildings and associated asphalt-paved parking lots (Appendix B, Photos 1 through 10).

Current tenants include a property management/security office (221 East Orangethorpe Avenue), S&P Nail Salon (223 East Orangethorpe Avenue), Salon Centric (225 East Orangethorpe Avenue), Laser Quest (229A East Orangethorpe Avenue), Pho 88 (1101 South Lemon Street), and Hot Wok (1111 South Lemon Street). The addresses of 215, 217, and 229B are currently vacant

5.3 Exterior and Interior Observations

5.3.1 Hazardous Substances, Drums, and Other Chemical Containers

Approximately 10 5-gallon buckets of hazardous waste (flammable hair products, bleach, aerosols, and developers, and small quantities (less than 5 gallons) of general cleaning supplies were observed within Salon Centric (225 East Orangethorpe Avenue).

Two 1-gallon bottles of acetone were observed within S&P Nail Salon (223 East Orangethorpe Avenue).

Several containers, between 1 gallon and 5 gallons, of paint were observed within the vacant space at 215 East Orangethorpe Avenue.

DRAFT

Two 55-gallon poly drums of Rosco Fog Fluid were observed within Laser Quest (229A East Orangethorpe Avenue).

Small quantities (less than 5 gallons) of general cleaning supplies were observed within 221 East Orangethorpe Avenue, Laser Quest (229A East Orangethorpe Avenue), Pho 88 (1101 South Lemon Street), and Hot Wok (1111 South Lemon Street).

The above listed materials were stored within cabinets or on concrete flooring. No significant leaks or stains were observed beneath the containers. These substances are not considered RECs associated with he subject site.

No hazardous substance, drums, or other chemical containers were observed onsite.

5.3.2 Storage Tanks

Evidence of underground storage tanks (USTs) (such as vent lines, fill or overfill ports) and/or aboveground storage tanks was not observed on the subject site.

5.3.3 Polychlorinated Biphenyls (PCBs)

Three pad-mounted transformers were observed onsite – one along the western boundary and two along the southern boundary. No leaks or stains were observed on the ground beneath or around the transformers. These transformers are not considered RECs associated with the subject site.

5.3.4 Waste Disposal

General waste is stored in bins located in the western and southeastern portions of the subject site and is regularly removed from the subject site by the Republic Services.

Two in-ground, food-grade grease traps were observed on the east side of the building located at 1101 and 1111 South Lemon Street. The grease traps are not considered RECs associated with the subject site.

DRAFT

5.3.5 Dumping

Evidence of active dumping was not observed on the subject site.

5.3.6 Pits, Ponds, Lagoons, Septic Systems, Wastewater, Drains, Cisterns, and Sumps

Several floor drains were located in the kitchens and restrooms of the onsite buildings. The drains appeared to be free of oil or other hazardous substances.

Evidence of pits, ponds, lagoons, septic systems, wastewater, cisterns, and sumps was not observed on the subject site.

5.3.7 Pesticide Use

Evidence of pesticide use was not observed on the subject site.

5.3.8 Staining, Discolored Soils, Corrosion

Stained, discolored soil or evidence of corrosion was not observed on the subject site.

5.3.9 Stressed Vegetation

Evidence of stressed vegetation was not observed on the subject site.

5.3.10 Unusual Odors

Unusual odors were not detected on the subject site.

5.3.11 Onsite Wells

Oil, gas production, or water wells were not observed on the subject site.

5.3.12 Other Observations

No other observations of environmental concern were noted at the subject site.

DRAFT

6.0 INTERVIEWS

Leighton conducted interviews with persons having knowledge of current or past subject site usage. Interviews were conducted either orally or in the form of a written questionnaire. Written responses, if any, are included as Appendix C.

6.1 Interview with Owner

An owner interview form was forwarded to the current owner of the subject site. As of the date of this report, a completed interview form has not yet been received by Leighton.

6.2 Interview with Property Manager

The security guard for the subject site was interviewed on November 26, 2019 during our completion of the site reconnaissance. The guard was not aware of any hazardous materials used or stored onsite, with the exception of those found within the salons, paint used by the property management crew, and general cleaning supplies. He stated that the only underground features he was aware of were the grease traps located on the east side of the structure located at 1101 and 1111 South Lemon Street.

6.3 Interviews with Occupants

Current occupants were not interviewed as part of this Phase I ESA.

6.4 Interviews with Local Government Officials

Leighton did not interview employees with local government agencies to request information regarding historic and current uses of the subject site with the exception of those noted in Section 4.2.

6.5 Interviews with Others

Leighton did not conduct additional interviews for this Phase I ESA.

DRAFT

7.0 FINDINGS

Leighton performed a Phase I ESA of the property located at 215, 217, 221, 223, 225 and 229 East Orangethorpe Avenue and 1101 and 1111 South Lemon Street in the city of Fullerton, Orange County, California (subject site – Figure 1) in accordance with SLR's authorization.

7.1 Onsite

Historically, the subject site was orchards with a small residence in the southeast corner from at least 1935 until approximately 1963, when the western half of the subject site was redeveloped for commercial use. A multi-tenant commercial building and a miniature golf course operated on the western half of the subject site between 1963 and the mid-1970s, when the miniature golf course closed. By the mid-1980s, the present-day larger multi-unit commercial building was constructed in the western portion of the subject site, in the location of the former miniature golf course. In the late 1980s, the eastern half of the subject site was redeveloped for commercial use.

Currently, the subject site is an approximately 3.8-acre irregular-shaped lot that is currently developed with two single-story, multi-tenant commercial buildings and associated asphalt-paved parking lots (Appendix B, Photos 1 through 10). The larger onsite structure located in the western half of the subject site is approximately 24,648 square feet and was constructed in the mid-1980s. The smaller onsite structure located in the eastern portion of the subject site is approximately 4,427 square feet and was constructed circa 1989. Current tenants include a property management/security office (221 East Orangethorpe Avenue), S&P Nail Salon (223 East Orangethorpe Avenue), Salon Centric (225 East Orangethorpe Avenue), Laser Quest (229A East Orangethorpe Avenue), Pho 88 (1101 South Lemon Street), and Hot Wok (1111 South Lemon Street). The addresses of 215, 217, and 229B are currently vacant.

7.2 Offsite

Historically, the adjacent properties were orchards and resdiences until the early 1960s when surrounding properties to the north and south were redeveloped for commercial use. By 1990, the surrounding properties to the east and west were developed for commercial use as well.

DRAFT

Currently, the subject site is bordered to the east by South Lemon Street, followed by a parking lot and the Santa Ana River; to the south by Jack in the Box, Lee's Sandwiches, Metro PCS, and Express Car Wash, followed by East Orangethorpe Avenue; to the west by several commercial businesses included Chuck E. Cheese's, Office Depot, WSS Shoes, and UFC Gym; and to the north by parking lots, an AMC Theater, and Costco.

A regional VOC groundwater plume is known to exist in the Fullerton, Anaheim, and Placentia areas. From the late 1950s through early 1980s, VOCs were used for industrial degreasing in metals and electronics manufacturing at several properties within the vicinity of the subject site. VOCs were released into the environment and impacted the shallow aquifer. The OCWD implemented the North Basin Groundwater RI/FS, under EPA oversight, which focuses on a roughly five-square-mile portion of the groundwater aquifer located under Fullerton, Anaheim, and Placentia, to protect drinking water supplies in the principal aquifer. OCWD has completed the installation of 25 new monitoring wells at 13 locations as part of the RI/FS. These wells complement the extensive network of 80 existing monitoring wells OCWD previously installed to characterize groundwater contamination in the North Basin area. Based on the most recent plume map provided by the OCWD, updated in 2013, concentrations of VOCs may be present in the groundwater beneath the subject site at concentrations ranging from the five times the MCL for drinking water to concentrations 20 times the MCL (OCWD, 2013). A copy of the 2013 VOC Plume is presented in Appendix G.

Four OCWD-controlled monitoring wells are located adjacent to the west and south of the subject site. Wells FM-11 and FM-11A are located adjacent to the east and wells FM-23 and FM-23A are located adjacent to the south. Recent monitoring information for wells FM-23 and FM-23A was not located. Wells FM-11 and FM-11A were most recently monitored in July 2019. Chlorinated solvents, 1,1-DCE, TCE, and PCE, were detected at concentrations of 6.1 µg/L, 50 µg/L, and 20 µg/L, respectively, from well FM-11A. Well FM-11A is reportedly the shallow aquifer monitoring well and would be the first encountered groundwater beneath the subject site. Groundwater has historically been measured at depths between 77.26 and 101.88 feet bgs in this well. **The elevated concentrations of VOCs detected in this well during the most recent sampling event are a considered a REC and vapor encroachment concern associated with the subject site.**

DRAFT

7.3 Data Gaps

The following data gap was identified by Leighton:

- Completed Owner Interview has not been received by Leighton.

It is Leighton's opinion, based on other reasonably obtained data, that this data gap is not significant to identifying RECs in connection with the subject site.

DRAFT

8.0 OPINION

8.1 Onsite

It is Leighton's opinion that the potential application of organochlorine pesticides and arsenical pesticides during the historical use of the subject site as orchards and a miniature golf course is considered a REC.

It is Leighton's opinion that no CRECs or HRECs were identified for the subject site.

8.2 Offsite

It is Leighton's opinion that the documented presence of chlorinated solvents in groundwater beneath the subject site, originating from offsite industrial properties, referred to as the Orange County North Basin Plume, is considered a REC and potential vapor encroachment concern.

DRAFT

9.0 CONCLUSIONS AND RECOMMENDATIONS

Leighton has performed a Phase I ESA in conformance with the scope and limitations of ASTM E1527-13 of the property located at 215, 217, 221, 223, 225 and 229 East Orangethorpe Avenue and 1101 and 1111 South Lemon Street in the city of Fullerton, Orange County, California. Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report. This assessment has revealed no evidence of RECs, HRECs, or CRECs in connection with the subject site, except for the following:

- The potential application of organochlorine pesticides and arsenical pesticides during the historical use of the subject site as orchards and a miniature golf course.

- The documented presence of chlorinated solvents in groundwater beneath the subject site originating from offsite industrial properties, referred to as the Orange County North Basin Plume.

No evidence of CRECs or HRECs was identified for the subject site.

Based on the findings of this Phase I ESA, Leighton recommends the following:

- Completion of soil and soil gas assessment at the subject site.

In general, observations should be made during future property development for areas of possible contamination such as, but not limited to, the presence of underground facilities, buried debris, waste drums, and tanks, stained soil or odorous soils. Should such materials be encountered, further investigation and analysis may be necessary at that time.

DRAFT

10.0 DEVIATIONS

Leighton did not deviate from or alter the scope of work, as defined in Section 1.3 of this report. Significant data gaps were not identified that affect the ability of Leighton to identify RECs at the subject site.

DRAFT

11.0 ADDITIONAL SERVICES

Leighton did not perform work outside the scope of work as defined in Section 1.3 of this report.

DRAFT

12.0 QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

12.1 Corporate

Leighton is a California corporation, providing geotechnical and environmental consulting services throughout California. We are solely a consulting firm without interests in real property other than our office locations in Southern California. We provide professional environmental consulting services including application of science and engineering to environmental compliance, hazardous materials/waste assessment and cleanup, and management of hazardous, solid and industrial waste. Phase I Environmental Site Assessments are a part of this practice area and have been conducted by us.

12.2 Individual

The qualifications of the Principal Geologist and the other Leighton environmental professionals involved in this Phase I ESA meet the Leighton corporate requirements for performing Phase I ESAs as specified by ASTM E1527-13. In addition, Ms. Brynn McCulloch is a Professional Geologist (PG).

12.3 Environmental Professional Statement

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional, as defined by §312.10 of 40 CFR Part 312.

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Site. I have developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

_____

Brynn McCulloch, PG
Principal Geologist

ENVIRONMENTAL LIEN AND AUL REPORT

The NETR Environmental LienSearch Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied property information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' office, registries of deed, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved and description); and
- provide a copy of the deed or cite documents reviewed;

Thank you for your business
Please contact NETR at 480-967-6752
with any questions or comments

SPECIAL WARRANTY DEED

WHEREAS, CT Retail Properties Finance 10, LLC, a Delaware limited liability company became vested in title on or about 12/08/00 by a deed recorded in Orange Co., CA as #20006608192;

WHEREAS, by Articles of Merger duly filed on or about July 10, 2003 with the Secretary of State for the State of California and also filed on or about July 19, 2003 with the Secretary of State for the State of Delaware, CT Retail Properties Finance 10, LLC, a Delaware limited liability company did merge into and was survived CT Operating Partnership L.P., a California limited partnership;

WHEREAS, by operation of law in both Delaware and California, CT Operating Partnership L.P. did become vested in title to all right, title and interest of the hereinafter described property; and

WHEREAS, the CT Operating Partnership L.P. desires to made the grant referenced below to give record notice within the Real Estate and Land Records of the current vesting of title for the hereinafter described property;

NOW THEREFORE,

THIS INDENTURE WITNESSETH THAT CT Operating Partnership, L.P., a California limited partnership (successor to CT Retail Properties Finance 10, LLC, a Delaware limited liability company) ("Grantor"), for and in consideration of the sum of Ten and No/100 Dollars ($10.00) and other good and valuable consideration in hand paid, the receipt, adequacy and sufficiency of which is hereby acknowledged, by these presents does **REMISE, RELEASE, ALIENATE AND CONVEY** unto **PK I Fullerton Town Center LP**, a Delaware limited partnership ("Grantee"), the following described real property located in the County of Orange, State of California and legally described as follows:

See Legal Description attached hereto as **Exhibit A** and hereby made a part hereof.

Explanatory Statement for Purposes of Documentary Transfer Tax

On October 31, 2006, Kimco Realty Corporation, a Maryland corporation ("Kimco"), and the Prudential Insurance Company of America ("Prudential") became the owners, between them, directly and/or indirectly through various entities, of all of the outstanding common shares of Pan Pacific Retail Properties, Inc. ("Pan Pacific"). Kimco's resulting (indirect and indirect combined) interest in Pan Pacific was 15%, and Prudential's (direct and indirect combined) interest in Pan Pacific was 85%. Pan Pacific is the historic owner of the property (the "Property") being transferred by the deed (the "Deed") to which this explanatory statement has been attached.

The Deed effects a conveyance of the Property, and such conveyance is part of a larger, integrated transaction (the "Transaction"). The deed, dated November 1, 2006, effects a conveyance of the Property by Kimco to a partnership or limited liability company (the "Partnership"). Upon completion of the various steps of the Transaction, as of November 1, 2006, Kimco will own, directly and/or indirectly, 15% of the capital and profits of the Partnership, and Prudential will own, directly and/or indirectly, 85% of the capital and profits of the Partnership.

The net effect of the Transaction will be that the Property will be transferred from Pan Pacific, a corporation owned 15% by Kimco and 85% by Prudential, to the Partnership, a partnership owned 15% by Kimco and 85% by Prudential. Accordingly, the Transaction, including the conveyance effected by the Deed, qualifies as a transfer between legal entities that results solely in a change in the method of holding title to the Property and in which proportional ownership interests in the Property remain the same immediately after the transfer within the meaning of California Revenue and Taxation Code Section 11925(d). Accordingly, the Transaction, and the conveyance of the Property effected by the Deed is exempt from transfer tax.

Together with all and singular the hereditaments and appurtenances thereunto belonging, or in anywise appertaining, all the reversion and reversions, remainder and remainders, rents, issues and profits thereof, and all the estate, right, title, interest, claim or demand whatsoever, of Grantor, either in law or equity, of, in and to the above described property, with the hereditaments and appurtenances: **TO HAVE AND TO HOLD** said property, with the appurtenances, unto Grantee, its successors and assigns forever.

And Grantor, for itself, and its successors, does covenant, promise and agree, to and with Grantee, its successors and assigns, that it has not done or suffered to be done, anything whereby the property hereby granted is, or may be, in any manner encumbered or charged, except as herein recited; and that said property against all persons lawfully claiming, or to claim the same, by through and under Grantor, but not otherwise, Grantor will **WARRANT AND DEFEND**, subject to: the Permitted Title Exceptions, as described on **Exhibit B** attached hereto and hereby made a part hereof.

TRANSFER TAX: $ N/A - BASED ON FULL VALUE LESS LIENS.

CERTIFICATE OF MERGER
OF
CT RETAIL PROPERTIES FINANCE 10, LLC
INTO
CT OPERATING PARTNERSHIP, L.P.

Pursuant to Title 6, Sec. 18-209 of the Delaware Code, the undersigned surviving limited partnership submits the following Certificate of Merger for filing and certifies that:

FIRST: The name and jurisdiction of formation or organization of each of the business entities which are to merge are:

Name	Jurisdiction
CT Operating Partnership, L.P. (the "Surviving Limited Partnership")	California
CT Retail Properties Finance 10, LLC (the "Merging Limited Liability Company")	Delaware

SECOND: An Agreement of Merger (the "Merger Agreement") has been approved, adopted, certified, executed and acknowledged by each of the Surviving Limited Partnership and the Merging Limited Liability Company.

THIRD: The name of the Surviving Limited Partnership is CT Operating Partnership, L.P.

FOURTH: The merger shall become effective upon the filing of this Certificate of Merger with the Secretary of State of the State of Delaware.

FIFTH: The Merger Agreement is on file at a place of business of the Surviving Limited Partnership which is located at 1631-B South Melrose Drive, Vista, California 92083.

SIXTH: A copy of the Merger Agreement will be furnished by the Surviving Limited Partnership on request and without cost, to any member of the Merging Limited Liability Company and to any partner of the Surviving Limited Partnership.

SEVENTH: CT Operating Partnership, L.P., the surviving business entity, agrees that it may be served with process in the State of Delaware in any action, suit, or

proceeding for the enforcement of any obligation of the Merging Limited Liability Company, and irrevocably appoints the Delaware Secretary of State as its agent to accept service of process in any such action, suit or proceeding, and specifies the following address as the address to which a copy of any such process shall be mailed to it by the Delaware Secretary of State:

CT Operating Partnership, L.P.
1631-B South Melrose Drive
Vista, California 92083

IN WITNESS WHEREOF, this Certificate of Merger has been duly executed as of the 6th day of June, 2003, and is being filed in accordance with Title 6, Sec. 18-209 by the authorized persons of the Surviving Limited Partnership in the merger.

CERTIFICATE OF MERGER
OF
CT RETAIL PROPERTIES FINANCE 10, LLC
INTO
CT OPERATING PARTNERSHIP, L.P.

Pursuant to Title 6, Sec. 18-209 of the Delaware Code, the undersigned surviving limited partnership submits the following Certificate of Merger for filing and certifies that:

FIRST: The name and jurisdiction of formation or organization of each of the business entities which are to merge are:

Name	Jurisdiction
CT Operating Partnership, L.P. (the "Surviving Limited Partnership")	California
CT Retail Properties Finance 10, LLC (the "Merging Limited Liability Company")	Delaware

SECOND: An Agreement of Merger (the "Merger Agreement") has been approved, adopted, certified, executed and acknowledged by each of the Surviving Limited Partnership and the Merging Limited Liability Company.

THIRD: The name of the Surviving Limited Partnership is CT Operating Partnership, L.P.

FOURTH: The merger shall become effective upon the filing of this Certificate of Merger with the Secretary of State of the State of Delaware.

FIFTH: The Merger Agreement is on file at a place of business of the Surviving Limited Partnership which is located at 1631-B South Melrose Drive, Vista, California 92083.

SIXTH: A copy of the Merger Agreement will be furnished by the Surviving Limited Partnership on request and without cost, to any member of the Merging Limited Liability Company and to any partner of the Surviving Limited Partnership.

SEVENTH: CT Operating Partnership, L.P., the surviving business entity, agrees that it may be served with process in the State of Delaware in any action, suit, or

proceeding for the enforcement of any obligation of the Merging Limited Liability Company, and irrevocably appoints the Delaware Secretary of State as its agent to accept service of process in any such action, suit or proceeding, and specifies the following address as the address to which a copy of any such process shall be mailed to it by the Delaware Secretary of State:

CT Operating Partnership, L.P.
1631-B South Melrose Drive
Vista, California 92083

IN WITNESS WHEREOF, this Certificate of Merger has been duly executed as of the 6th day of June, 2003, and is being filed in accordance with Title 6, Sec. 18-209 by the authorized persons of the Surviving Limited Partnership in the merger.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

Proposed NPL: Proposed NPL sites . The source of this database is the U.S. EPA.

A review of the Proposed NPL list, as provided by EDR, and dated 07/19/2019 has revealed that there is 1 Proposed NPL site within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
ORANGE COUNTY NORTH Site ID:: 900251 EPA ID:: CAN000900251	***1012 EAST ELM AVENUE***	***ENE 1/2 - 1 (0.597 mi.)***	***AI143***	***424***

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 06/24/2019 has revealed that there are 2

CORRACTS sites within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 06/24/2019 has revealed that there is 1 RCRA-TSDF site within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
KINSBURSKY BROTHERS EPA ID:: CAD088504881	***1314 NORTH ANAHEIM B***	***S 1/4 - 1/2 (0.455 mi.)***	***AE129***	***296***

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/24/2019 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

COSTCO WHOLESALE NO EPA ID:: CAR000103317	***900 S HARBOR BLVD***	***NNW 0 - 1/8 (0.094 mi.)***	***J30***	***52***

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/24/2019 has revealed that there are

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 07/29/2019 has revealed that there

are 38 CA ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal landfill and/or solid waste disposal site lists

CA SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the CA SWF/LF list, as provided by EDR, has revealed that there is 1 CA SWF/LF site within approximately 0.5 miles of the target property.

CA CERS HAZ WASTE: List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs.

A review of the CA CERS HAZ WASTE list, as provided by EDR, and dated 08/14/2019 has revealed that

there are 14 CA CERS HAZ WASTE sites within approximately 0.25 miles of the target property.

Local Lists of Registered Storage Tanks

CA SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the CA SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there is 1 CA SWEEPS UST site within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/24/2019 has revealed that

there are 23 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 05/03/2019 has revealed that there is 1 FINDS site within approximately 0.001 miles of the target property.

CA HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the CA HAZNET list, as provided by EDR, and dated 12/31/2017 has revealed that there is 1 CA HAZNET site within approximately 0.001 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
AMV PRECISION	155 E LIBERTY AVE ST	ENE 0 - 1/8 (0.079 mi.)	G14	23

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.125 miles of the target property.

FINDS:

Registry ID: 110002874113

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Hazardous Waste Summary:

. Waste code: 122
. Waste name: Alkaline solution without metals (pH > 12.5)

COSTCO WHOLESALE NO 418 (Continued) **1004677948**

. Waste code: 131
. Waste name: Aqueous solution (2 < pH < 12.5) containing reactive anions (azide, bromate, chlorate, cyanide, fluoride, hypochlorite, nitrite, perchlorate, and sulfide anions)

. Waste code: 133
. Waste name: Aqueous solution with 10% or more total organic residues

. Waste code: 134
. Waste name: Aqueous solution with <10% total organic residues

. Waste code: 135
. Waste name: Unspecified aqueous solution

. Waste code: 141
. Waste name: Off-specification, aged, or surplus inorganics

. Waste code: 151
. Waste name: Asbestos-containing waste

. Waste code: 172
. Waste name: Metal dust (see 121) and machining waste

. Waste code: 181
. Waste name: Other inorganic solid waste

. Waste code: 211
. Waste name: Halogenated solvents (chloroform, methyl chloride, perchloroethylene, etc.)

. Waste code: 212
. Waste name: Oxygenated solvents (acetone, butanol, ethyl acetate, etc.)

. Waste code: 213
. Waste name: Hydrocarbon solvents (benzene, hexane, Stoddard, etc.)

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 1966

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 792

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

COSTCO WHOLESALE NO 418 (Continued) **1004677948**

Eval Type:	Routine done by local agency
Eval Notes:	James Studebaker and Joe Eckhardt consented to/assisted with this routine, annual, haz waste program inspection. James reported: - no changes in haz waste generating processes since last inspection; - haz waste remotely stored at gas station, tire center, pharmacy, photo, and paint areas; - store classified as a large quantity generator of RCRA haz waste due to periodic accumulation/storage of P-listed pharmaceutical wastes; - approximately 260 store employees, currently. I used a haz waste compliance checklist to review required record keeping and to survey haz waste management: - EPA ID number appropriate for haz waste generation; - haz waste items hauled for disposal within allowable accumulation/storage time limits; - haz waste/E-waste is stored in closed/marked poly drums/pails, or cardboard cartons; - haz waste emergency ?co-ordinator? contact information posted for employee use; - access/use of trash compactor is supervised; - spill clean-up by [Truncated]

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Hazardous Waste Summary:

. Waste code: 122
. Waste name: Alkaline solution without metals (pH > 12.5)

. Waste code: 135
. Waste name: Unspecified aqueous solution

. Waste code: 141
. Waste name: Off-specification, aged, or surplus inorganics

. Waste code: 181
. Waste name: Other inorganic solid waste

WALMART SUPERCENTER NO 5930 (Continued) **1014915649**

. Waste code: 212
. Waste name: Oxygenated solvents (acetone, butanol, ethyl acetate, etc.)

. Waste code: 213
. Waste name: Hydrocarbon solvents (benzene, hexane, Stoddard, etc.)

. Waste code: 214
. Waste name: Unspecified solvent mixture

. Waste code: 221
. Waste name: Waste oil and mixed oil

. Waste code: 223
. Waste name: Unspecified oil-containing waste

. Waste code: 232
. Waste name: Pesticides and other waste associated with pesticide production

. Waste code: 281
. Waste name: Adhesives

. Waste code: 291
. Waste name: Latex waste

. Waste code: 311
. Waste name: Pharmaceutical waste

. Waste code: 331
. Waste name: Off-specification, aged, or surplus organics

. Waste code: 343
. Waste name: Unspecified organic liquid mixture

. Waste code: 352
. Waste name: Other organic solids

. Waste code: 541
. Waste name: Photochemicals / photo processing waste

. Waste code: 561
. Waste name: Detergent and soap

. Waste code: 791
. Waste name: Liquids with pH < 2

. Waste code: 792
. Waste name: Liquids with pH < 2 with metals

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D003
. Waste name: REACTIVE WASTE

WALMART SUPERCENTER NO 5930 (Continued) **1014915649**

. Waste code: D004
. Waste name: ARSENIC

. Waste code: D005
. Waste name: BARIUM

. Waste code: D006
. Waste name: CADMIUM

. Waste code: D007
. Waste name: CHROMIUM

. Waste code: D008
. Waste name: LEAD

. Waste code: D009
. Waste name: MERCURY

. Waste code: D010
. Waste name: SELENIUM

. Waste code: D011
. Waste name: SILVER

. Waste code: D016
. Waste name: 2,4-D (2,4-DICHLOROPHENOXYACETIC ACID)

. Waste code: D018
. Waste name: BENZENE

. Waste code: D022
. Waste name: CHLOROFORM

. Waste code: D024
. Waste name: M-CRESOL

. Waste code: D026
. Waste name: CRESOL

. Waste code: D027
. Waste name: 1,4-DICHLOROBENZENE

. Waste code: D035
. Waste name: METHYL ETHYL KETONE

. Waste code: D039
. Waste name: TETRACHLOROETHYLENE

. Waste code: D043
. Waste name: VINYL CHLORIDE

. Waste code: P001
. Waste name: 2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3% (OR) WARFARIN, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%

. Waste code: P075

WALMART SUPERCENTER NO 5930 (Continued) **1014915649**

. Waste name: NICOTINE, & SALTS (OR) PYRIDINE, 3-(1-METHYL-2-PYRROLIDINYL)-,(S)-, & SALTS

. Waste code: U002
. Waste name: 2-PROPANONE (I) (OR) ACETONE (I)

. Waste code: U034
. Waste name: ACETALDEHYDE, TRICHLORO- (OR) CHLORAL

. Waste code: U035
. Waste name: BENZENEBUTANOIC ACID, 4-[BIS(2-CHLOROETHYL)AMINO]- (OR) CHLORAMBUCIL

. Waste code: U058
. Waste name: 2H-1,3,2-OXAZAPHOSPHORIN-2-AMINE, N,N-BIS(2-CHLOROETHYL)TETRAHYDRO-, 2-OXIDE (OR) CYCLOPHOSPHAMIDE

. Waste code: U072
. Waste name: BENZENE, 1,4-DICHLORO- (OR) P-DICHLOROBENZENE

. Waste code: U080
. Waste name: METHANE, DICHLORO- (OR) METHYLENE CHLORIDE

. Waste code: U089
. Waste name: DIETHYLSTILBESTEROL (OR) PHENOL, 4,4'-(1,2-DIETHYL-1,2-ETHENEDIYL)BIS, (E)-

. Waste code: U112
. Waste name: ACETIC ACID, ETHYL ESTER (I) (OR) ETHYL ACETATE (I)

. Waste code: U122
. Waste name: FORMALDEHYDE

. Waste code: U129
. Waste name: CYCLOHEXANE, 1,2,3,4,5,6-HEXACHLORO-, (1ALPHA, 2ALPHA, 3BETA, 4ALPHA, 5ALPHA, 6BETA)- (OR) LINDANE

. Waste code: U132
. Waste name: HEXACHLOROPHENE (OR) PHENOL, 2,2'-METHYLENEBIS[3,4,6-TRICHLORO-

. Waste code: U134
. Waste name: HYDROFLUORIC ACID (C,T) (OR) HYDROGEN FLUORIDE (C,T)

. Waste code: U150
. Waste name: L-PHENYLALANINE, 4-[BIS(2-CHLOROETHYL)AMINO]- (OR) MELPHALAN

. Waste code: U154
. Waste name: METHANOL (I) (OR) METHYL ALCOHOL (I)

. Waste code: U159
. Waste name: 2-BUTANONE (I,T) (OR) METHYL ETHYL KETONE (MEK) (I,T)

. Waste code: U165
. Waste name: NAPHTHALENE

. Waste code: U182
. Waste name: 1,3,5-TRIOXANE, 2,4,6-TRIMETHYL- (OR) PARALDEHYDE

WALMART SUPERCENTER NO 5930 (Continued) **1014915649**

. Waste code: U188
. Waste name: PHENOL

. Waste code: U200
. Waste name: RESERPINE (OR) YOHIMBAN-16-CARBOXYLIC ACID, 11,17-DIMETHOXY-18-[(3,4,5-TRIMETHOXYBENZOYL)OXY]-, METHYL ESTER, (3BETA, 16BETA, 17ALPHA, 18BETA, 20ALPHA)-

. Waste code: U205
. Waste name: SELENIUM SULFIDE (OR) SELENIUM SULFIDE SES2 (R,T)

. Waste code: U210
. Waste name: ETHENE, TETRACHLORO- (OR) TETRACHLOROETHYLENE

. Waste code: U248
. Waste name: 2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYL-BUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS OF 0.3% OR LESS (OR) WARFARIN, & SALTS, WHEN PRESENT AT CONCENTRATIONS OF 0.3% OR LESS

FINDS:

Registry ID: 110002927888

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Address: 1140 S HARBOR BLVD
City,State,Zip: FULLERTON, CA 92832
Site ID: 408906
CERS ID: 10706899
CERS Description: Hazardous Waste Generator

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 02-17-2017
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: INSPECTOR COMMENTS On site for a routine hazardous waste inspection. Consent to inspect and take any necessary photos was given by Dr. Dave Sebring, operations manager. Walked throughout the facility. Observed hazardous waste storage areas. Discussed the management of California empty containers. Containers were closed and properly labeled. Manifest were available and reviewed, facility recently started their waste program around 10 months ago and has only had one pick-up. Employees are reported to be trained. Emergency plan was posted in the front and back of the store. The dumpster was observed, no signs of dumping.

FINDS:

Registry ID: 110002952421

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport,

PACIFIC BELL (Continued) **1000250399**

and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Case Type:	Cleanup Program Site
Case Worker:	MG
Local Agency:	Not reported
RB Case Number:	2080159
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected:	Aquifer used for drinking water supply
Potential Contaminants of Concern:	1,4-Dioxane, Dichloroethene (DCE), Tetrachloroethylene (PCE), Trichloroethylene (TCE)
Site History:	The Orange County Groundwater Basin provides 70% to 75% of the potable water supply for over 2.4 million people in central and northern Orange County. One of the primary responsibilities of OCWD is to manage and protected the groundwater basin. The northern portion of the Orange County Groundwater Basin which includes cities of Fullerton and Anaheim has been impacted by volatile organic compounds (VOCs) at concentrations above primary drinking water standards. This portion of the Orange County Groundwater Basin is referred to as the North Basin area. The predominant VOCs present in the North Basin area are trichloroethylene (TCE), tetrachloroethylene (PCE), 1,1-dichloroethylene (1,1-DCE), and 1,4-dioxane. The co-mingled VOC plumes with concentration above drinking water standards (i.e., California Maximum Contaminant Levels [MCLs] for TCE, PCE and 1,1-DCE, and the Notification Level [NL] for 1,4-dioxane) are approximately five miles long, two miles wide, and locally over 450 feet deep. To date, four production wells have been destroyed due to VOC contamination, and more wells would be threatened by the uncontrolled spread of contaminated groundwater. The production wells destroyed due to VOC contamination include two wells owned by the City of Fullerton, one well owned by the City of Anaheim, and a private well that was used for manufacturing soda and bottled water. Additionally, the North Basin VOC plume is threatening additional production wells in that area. OCWD has been working on implementing projects that protect the North Basin area from the continued leaching and migration of VOCs. OCWD had started implementing a regional groundwater containment project named the North Basin Groundwater Protection Project. Initial work on the project included the installation of approximately 70 monitoring wells, 6 large extraction wells and the implementation of a variety water quality studies that focused on mapping the plume, capturing the contamination and preventing its continued spreading both horizontally and vertically. For several years work on the project was delayed in response to legal entanglements. In response, the OCWD Board of Directors adopted new policies calling for National Contingency Plan (NCP) methods and a request for U.S. Environmental Protection Agency (USEPA) regulatory oversight. After assuming regulatory responsibility for the area, the USEPA called for the design and installation of 14 additional monitoring wells at eight locations. At some locations adjacent monitoring wells would be installed at different depths to characterize the vertical extent of contamination. These new wells are needed to develop remedial alternatives, and to help with monitoring the performance of the eventually selected remedy.

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110002713341

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

CERS Description: Hazardous Waste Generator

Violations:
Site ID: 56634
Site Name: PetSmart #1228
Violation Date: 05-08-2018
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 05/08/2018. OBSERVATION: Labels are missing physical state (liquid and solid). All hazardous waste containers shall be marked with the following information: 1) the words ?Hazardous Waste?; 2) name and address of generator; 3) hazardous properties; 4) physical state; 5) composition (contents); 6) accumulation start date. CORRECTIVE ACTION: Corrected on site during inspection.

Eval Source:	CERS
Eval General Type:	Compliance Evaluation Inspection
Eval Date:	08-03-2017
Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	INSPECTOR COMMENTS On site for a routine hazardous waste inspection. Consent to inspect and take any necessary photos was given by David Rubalcaba, store manager. Walked throughout the facility. Observed hazardous waste storage areas. Hazardous waste is stored in boxes in the back of the store. Containers were closed and properly labeled. Manifests were available and reviewed. Employees are reported to be trained. Emergency plan is posted in the front managers office. The dumpster/enclosure was observed, no signs of dumping. Ownership and employee count were confirmed.

Case Type:	Cleanup Program Site
Case Worker:	MG
Local Agency:	ANAHEIM CITY
RB Case Number:	2082700
File Location:	Regional Board
Potential Media Affected:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Tetrachloroethylene (PCE), Trichloroethylene (TCE), Other Chlorinated Hydrocarbons
Site History:	Northrop conducted vapor degreasing, metal quenching, painting and chemical treatment of manufactured aircraft parts from 1962 to 1994. Northrop started investigation in 1995. VOCs detected in soil and groundwater beneath the site. On November 14, 2003, Regional Board issued CAO # R8-2003-108. Soil and groundwater cleanup work has been ongoing since that time.

CERS Description: Chemical Storage Facilities

Violations:

Site ID: 74523
Site Name: TESORO (SHELL) 68812
Violation Date: 04-07-2016
Citation: 23 CCR 16 2712(i) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(i)
Violation Description: Failure to maintain on site an approved monitoring plan.
Violation Notes: Returned to compliance on 04/08/2016. Monitoring plan listed incorrect sensors for 87 and 91 UST sumps and udc's. Corrected via CERS.
Violation Division: Fullerton City Fire Department
Violation Program: UST
Violation Source: CERS

Site ID: 74523
Site Name: TESORO (SHELL) 68812
Violation Date: 04-07-2016
Citation: 23 CCR 16 2665 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2665
Violation Description: Failure of the overfill prevention system to meet one of the following requirements: 1. Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or 2. Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or 3. Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or 4. Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling.
Violation Notes: Returned to compliance on 04/07/2016. 87 auxiliary UST overfill alarm failed to activiate. Corrected during inspection.
Violation Division: Fullerton City Fire Department
Violation Program: UST
Violation Source: CERS

Site ID: 74523
Site Name: TESORO (SHELL) 68812
Violation Date: 06-02-2016
Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description: Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes: Returned to compliance on 07/03/2017. Manifests were not available at the time of inspection. Please obtain the manifests within 30 days and return the attached CRC signed to this agency along with copies of the manifests.

Potential Media Affect:	Aquifer used for drinking water supply
Potential Contaminants of Concern:	Gasoline
Site History:	In October 2001, three groundwater monitoring wells were installed as apart of Shell Oils voluntary Groundwater Assessment Program (GRASP) for sites that were not active release sites, but were in close proximity to one or more public supply wells. Groundwater was encountered around 79 feet below ground surface and was found to flow to the southwest. Low concentrations of MTBE were detected in all three groundwater monitoring wells. The lateral extent of the affected groundwater was not defined. In September 2006, soil samples were collected below the product line as part of the product piping removal activities. Only one soil sample had detectable toluene at a concentration of 2.0 ppm. All other VOCs were not detected. In April 2007, eight soil borings were drilled at the site. MTBE was detected at a concentration of 21 ppb at 50 feet bgs. No other VOCs were detected. In April 2008, Shell abandoned all three groundwater monitoring wells. In March 25, 2009, the Fullerton Fire Department transferred oversight of the site to Santa Ana Regional Board staff. Board staff is recommending site closure because the low concentrations of MTBE detected in the soil and groundwater does not pose a significant risk to the underlying groundwater recourses to

SHELL (2904-1807) (Continued) **S101589512**

warrant further remediation or monitoring.

Eval Notes: INSPECTOR COMMENTS On site for a routine hazardous waste inspection. Consent to inspect and take any necessary photos was given by Alfredo Muneton, service manager. Walked throughout the facility. Observed hazardous waste storage areas. Facility has one, Used oil tank, two waste antifreeze drums, and two waste oil filter drums. Hazardous waste are kept in the back of the facility near the waste tire storage. Containers were properly labeled, but not closed properly, drum was closed while on-site, corrected on-site. Manifests were available and reviewed. Employees are reported to be trained. Emergency plan information was not posted on-site, sticker was given and posted in the office, corrected on-site. The dumpster/enclosure was observed, no signs of dumping. Ownership and employee count were confirmed.

Eval Notes:	Jose ?Joe? Duarte consented to/assisted with this hazardous waste inspection. Joe reported that the legal owner changed its name from ?AKH Company Inc., dba Discount Tire Centers? to ?Andonian Enterprises Inc., dba Discount Tire Centers?. Name change occurred 9/30/2013. Corporate headquarters remains ?1160 N. Anheim Boulevard, Anaheim, CA 92801. Transaction reported as a corporation name change and not an ownership change. I used a hazardous waste compliance checklist to survey haz waste management and to review required record keeping: - disposal documents available for review. - haz waste emergency ?co-ordinator name/phone # posted for employee use. - haz waste containers closed and marked with required information. - containers of liquid haz waste closed in a manner to prevent spillage if over-turned. - drain oil ?dollies? drained daily. Contact this agency for haz waste compliance assistance.

. Waste name: BERYLLIUM

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 132

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 8177.6

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.
Amount (Lbs): 753013

Waste code: D006
Waste name: CADMIUM
Amount (Lbs): 431169

Waste code: D008
Waste name: LEAD
Amount (Lbs): 23691796

Waste code: D011
Waste name: SILVER
Amount (Lbs): 711

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: Yes
Transporter of hazardous waste: No
Treater, storer or disposer of HW: Yes
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Universal Waste Summary:
Waste type: Thermostats
Accumulated waste on-site: Yes
Generated waste on-site: No

Waste type: Batteries
Accumulated waste on-site: Yes
Generated waste on-site: No

Hazardous Waste Summary:

. Waste code: 121
. Waste name: Alkaline solution (pH >12.5) with metals (antimony, arsenic, barium, beryllium, cadmium, chromium, cobalt, copper, lead, mercury, molybdenum, nickel, selenium, silver, thallium, vanadium, and zinc)

. Waste code: 122
. Waste name: Alkaline solution without metals (pH > 12.5)

. Waste code: 123
. Waste name: Unspecified alkaline solution

. Waste code: 132
. Waste name: Aqueous solution w/metals (< restricted levels and see waste code 121 for a list of metals)

. Waste code: 141
. Waste name: Off-specification, aged, or surplus inorganics

. Waste code: 162
. Waste name: Other spent catalyst

. Waste code: 171
. Waste name: Metal sludge (see 121)

. Waste code: 172
. Waste name: Metal dust (see 121) and machining waste

. Waste code: 181
. Waste name: Other inorganic solid waste

. Waste code: 221
. Waste name: Waste oil and mixed oil

. Waste code: 223
. Waste name: Unspecified oil-containing waste

. Waste code: 241
. Waste name: Tank bottom waste

KINSBURSKY BROTHERS SUPPLY INC (Continued) **1000377864**

. Waste code: 261
. Waste name: Polychlorinated biphenyls and material containing PCB's

. Waste code: 281
. Waste name: Adhesives

. Waste code: 291
. Waste name: Latex waste

. Waste code: 311
. Waste name: Pharmaceutical waste

. Waste code: 331
. Waste name: Off-specification, aged, or surplus organics

. Waste code: 342
. Waste name: Organic liquids with metals (see 121)

. Waste code: 343
. Waste name: Unspecified organic liquid mixture

. Waste code: 352
. Waste name: Other organic solids

. Waste code: 451
. Waste name: Degreasing sludge

. Waste code: 491
. Waste name: Unspecified sludge waste

. Waste code: 512
. Waste name: Other empty containers 30 gallons or more

. Waste code: 513
. Waste name: Empty containers less than 30 gallons

. Waste code: 521
. Waste name: Drilling mud

. Waste code: 551
. Waste name: Laboratory waste chemicals

. Waste code: 561
. Waste name: Detergent and soap

. Waste code: 611
. Waste name: Contaminated soil from site clean-ups

. Waste code: 612
. Waste name: Household waste

. Waste code: 711
. Waste name: Liquids with cyanides > 1000 mg/l

. Waste code: 721
. Waste name: Liquids with arsenic > 500 mg/l

KINSBURSKY BROTHERS SUPPLY INC (Continued) **1000377864**

. Waste code: 722
. Waste name: Liquids with cadmium > 100 mg/l

. Waste code: 723
. Waste name: Liquids with chromium (VI) > 500 mg/l

. Waste code: 724
. Waste name: Liquids with lead > 500 mg/l

. Waste code: 725
. Waste name: Liquids with mercury > 20 mg/l

. Waste code: 726
. Waste name: Liquids with nickel > 134 mg/l

. Waste code: 727
. Waste name: Liquids with selenium > 100 mg/l

. Waste code: 791
. Waste name: Liquids with pH < 2

. Waste code: 792
. Waste name: Liquids with pH < 2 with metals

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D003
. Waste name: REACTIVE WASTE

. Waste code: D004
. Waste name: ARSENIC

. Waste code: D005
. Waste name: BARIUM

. Waste code: D006
. Waste name: CADMIUM

. Waste code: D007
. Waste name: CHROMIUM

. Waste code: D008
. Waste name: LEAD

. Waste code: D009
. Waste name: MERCURY

. Waste code: D010
. Waste name: SELENIUM

. Waste code: D011
. Waste name: SILVER

KINSBURSKY BROTHERS SUPPLY INC (Continued) **1000377864**

. Waste code: F006
. Waste name: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

. Waste code: F007
. Waste name: SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS.

. Waste code: F008
. Waste name: PLATING BATH RESIDUES FROM THE BOTTOM OF PLATING BATHS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

. Waste code: K052
. Waste name: TANK BOTTOMS (LEADED) FROM THE PETROLEUM REFINING INDUSTRY.

. Waste code: K061
. Waste name: EMISSION CONTROL DUST/SLUDGE FROM THE PRIMARY PRODUCTION OF STEEL IN ELECTRIC FURNACES.

. Waste code: K090
. Waste name: EMISSION CONTROL DUST OR SLUDGE FROM FERROCHROMIUMSILICON PRODUCTION

. Waste code: K091
. Waste name: EMISSION CONTROL DUST OR SLUDGE FROM FERROCHROMIUM PRODUCTION

. Waste code: P015
. Waste name: BERYLLIUM

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 132

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 8177.6

Waste code: D003

KINSBURSKY BROTHERS SUPPLY INC (Continued) **1000377864**

Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.
Amount (Lbs): 753013

Waste code: D006
Waste name: CADMIUM
Amount (Lbs): 431169

Waste code: D008
Waste name: LEAD
Amount (Lbs): 23691796

Waste code: D011
Waste name: SILVER
Amount (Lbs): 711

FINDS:

Registry ID: 110000621300

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Manufactured Gas Plants:

The former Southern California Gas Company Site purchased in 1911 is located at 144 West Walnut Avenue in Fullerton, California. It was the location of a former oil-based manufactured gas plant. It was sold in 1923 and by 1927 was occupied by warehouuses and light manufacturing buildings. A phase I Environmental Assessment and a Phase II Investigation were completed in 1995. The reports concluded that waste or solvents might have impacted the near surface soils. Soil sampling was performed and tthe results indicated low levels of VOCs including PCE and TCE. The site occupied 0.16 acres and is located 150 feet above sea level. The site is mostly covered by concrete slabs and groundwater is at over 60 feet bgs. Current contaminants include: PPAHs (carcinogenic and non), VOCs, TPHs, Inorganic Constituents (metals), and Cyanide.

City,State,Zip: ANAHEIM, CA 92801
Region: STATE
Facility Status: **Open - Assessment & Interim Remedial Action**

KESTER SOLDER COMPANY (Continued) **1000401428**

Status Date:	12/17/2010
Global Id:	T0605939958
Lead Agency:	SANTA ANA RWQCB (REGION 8)
Lead Agency Case Number:	Not reported
Latitude:	33.860926
Longitude:	-117.909298
Case Type:	Cleanup Program Site
Case Worker:	MG
Local Agency:	Not reported
RB Case Number:	2080055
File Location:	Regional Board
Potential Media Affected:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Alcohols, 1,1,1-Trichloroethane (TCA), Acetone, Other Chlorinated Hydrocarbons, Tetrachloroethylene (PCE), Trichloroethylene (TCE)
Site History:	The Kester Solder facility manufactured solder alloys and fluxes from 1968 to 2002, when operations ceased. The facility stored hazardous materials in containers, aboveground storage tanks (ASTs), and four underground storage tanks (USTs). The building housed a manufacturing area, offices, warehouse, shipping and receiving room, laboratory, and chemical mixing and storage room. An NFA for soil was issued to Northrop Grumman on December 17, 2010. Northrop Grumman is preparing a work plan for an ISCO injection pilot test (2018) to remediate the 1,4-dioxane hot spots at the Site.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Completed Date: 02/08/1991
Comments: The PA Report was reviewed by Region 4 staff. Pacific Tank Ltd. manufactures custom fiberglass tanks in the City of Fullerton. All operations are permitted by the So. Coast AQMD. The acetone tank was removed in 1989 under county oversight. Verification samples revealed no contamination. Staff recommends NFA by DTSC.

Evaluation:

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	06-06-2000
Violations Found:	No
Eval Type:	Industrial Storm Water Compliance Evaluation
Eval Notes:	The facilities SWPPP needs to be updated.- Several spills were noted around the facility.- All industrial process are currently contained on the site by secondary containment bumps and a dyke system around the entire facility.- The water is then transferred to a holding tank and discharged to the sanitary sewer. The inspection started at 1045 and ended at 1130. Weather conditions were clear sky 80 degrees.- Also, I asked Tom to resubmit their annual report with signatures.

Violations Found:	No
Eval Type:	Industrial Storm Water Compliance Evaluation
Eval Notes:	On April 3, 2001 on a cold overcast day, Regional Board staff Marc Brown and Michelle Beckwith conducted a routine compliance inspection

STEPHAN CHEMICAL COMPANY (Continued) **1000345123**

of the above referenced facility. The two were met by the facility's Plant Manager, who produced the SWPPP and training records for review. The SWPPP had several areas of concern: The sampling method indicated the sample would be collected within 30 minutes of the storm's onset instead of the 1 hour of discharge requirement. Several other small areas of the plan were noted and corrected during its review. A walkthrough inspection of the facility revealed that most of the exposed areas of the facility are secondarily contained. All storm water falling on this portion of the property is plumbed to the central waste water treatment plant on site prior to being discharged to the POTW. There were some areas that had signs of material spills, however, the way the containment is set up at this facility, no area is a threat to flowing off site during storm activities. Last documented employee training was 1//27/00.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-06-2000
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: The facilities SWPPP needs to be updated.- Several spills were noted around the facility.- All industrial process are currently contained on the site by secondary containment bumps and a dyke system around the entire facility.- The water is then transferred to a holding tank and discharged to the sanitary sewer. The inspection started at 1045 and ended at 1130. Weather conditions were clear sky 80 degrees.- Also, I asked Tom to resubmit their annual report with signatures.

STEPHAN CHEMICAL COMPANY (Continued) **1000345123**

Eval Date:	04-03-2001
Violations Found:	No
Eval Type:	Industrial Storm Water Compliance Evaluation
Eval Notes:	On April 3, 2001 on a cold overcast day, Regional Board staff Marc Brown and Michelle Beckwith conducted a routine compliance inspection of the above referenced facility. The two were met by the facility's Plant Manager, who produced the SWPPP and training records for review. The SWPPP had several areas of concern: The sampling method indicated the sample would be collected within 30 minutes of the storm's onset instead of the 1 hour of discharge requirement. Several other small areas of the plan were noted and corrected during its review. A walkthrough inspection of the facility revealed that most of the exposed areas of the facility are secondarily contained. All storm water falling on this portion of the property is plumbed to the central waste water treatment plant on site prior to being discharged to the POTW. There were some areas that had signs of material spills, however, the way the containment is set up at this facility, no area is a threat to flowing off site during storm activities. Last documented employee training was 1//27/00.

Violation Date: 05-06-2019
Citation: 23 CCR 16 2716(a) through (e) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2716(a) through (e)
Violation Description: For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.
Violation Notes: Returned to compliance on 05/06/2019. No DO inspection was conducted between 4/3/19 and 5/20/19.
Violation Division: Fullerton City Fire Department
Violation Program: UST
Violation Source: CERS

Site ID: 362828
Site Name: CITY OF FULLERTON - CITY HALL
Violation Date: 08-22-2016
Citation: HSC 6.7 25290.1(c), 25290.2(c), 25291(a)(2), 25292(e) - California Health and Safety Code, Chapter 6.7, Section(s) 25290.1(c), 25290.2(c), 25291(a)(2), 25292(e)
Violation Description: Failure to maintain secondary containment (e.g. failure of secondary containment testing).
Violation Notes: Returned to compliance on 05/12/2017. Diesel supply run #2 (for emergency generator) failed testing. Because repairs required impeding access to City Hall, the plan check and repair process took longer than usual.
Violation Division: Fullerton City Fire Department
Violation Program: UST
Violation Source: CERS

Site ID: 362828

FULLERTON CITY HALL (Continued) **S103651130**

Violation Date:	05-06-2019
Citation:	23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description:	Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,?2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October?1,?2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes:	Returned to compliance on 05/06/2019. Shutoff valves not tested by 10/13/18. Testing performed this date.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 02/08/1991
Comments: The PA Report was reviewed by Region 4 staff. Scientific Spray Finishes, Inc. has used and continues to use hazardous substances (MEK, Naphthenes, & acetone now; TCE, methylene chloride & lead in the past). Orange Co. Health Care Agcy. has inspected the facility annually since 1984. Staff rec- ommends PEARM to determine if there is a risk that should be addressed by DTSC.

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans

SCIENTIFIC SPRAY FINISHES INC (Continued) **1000208795**

to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Citation: 22 CCR 12 66262.34(d) - California Code of Regulations, Title 22,

SCIENTIFIC SPRAY FINISHES INC (Continued) **1000208795**

Chapter 12, Section(s) 66262.34(d)
Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes: Returned to compliance on 07/03/2017. Four drums of waste thinner were observed. The last pickup for thinner was 3/2/15. Several of the drums were near full and appeared to be stored for some time. Please schedule a pickup as soon as possible and notify this agency when this violation is addressed.

Violation Date: 03-28-2017
Citation: HSC 6.95 25508.2 - California Health and Safety Code, Chapter 6.95, Section(s) 25508.2
Violation Description: Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.
Violation Notes: Returned to compliance on 04/12/2017.
Violation Division: Fullerton City Fire Department
Violation Program: HMRRP
Violation Source: CERS

Site ID: 421194
Site Name: SCIENTIFIC SPRAY FINISHES INC
Violation Date: 06-09-2016
Citation: 22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description: Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes: Returned to compliance on 07/03/2017. Dust from the shop is not currently managed as hazardous waste. Dust was observed in the dumpster and Ms. Strand stated that it was powder coat dust. The facility has the option of testing the dust with a state certified lab for heavy metals content. The other option is to assume that the dust is hazardous and to begin managing it as hazardous waste. This violation can be addressed by providing this agency with a copy of the lab results or by showing that the dust is being managed as hazardous waste.

Eval Notes:	On site for a routine hazardous waste inspection. Consent to inspect and take any necessary photos was given by Heidi Strand, manager. Business ownership information was verified. The current number of employees is 8. Walked throughout the facility. Observed hazardous waste storage areas. Containers were closed and properly labeled. Waste thinner was observed to be stored beyond the acceptable accumulation time frame. A violation was issued for the accumulation time. Dust is not currently managed as hazardous waste (see attached pictures). A violation was issued for the waste determination of the

SCIENTIFIC SPRAY FINISHES INC (Continued) **1000208795**

dust. Manifests were available and reviewed. Employees are reported to be trained. Emergency plan is posted near front of the store. A perimeter walk was conducted and the dumpster enclosure was observed. A copy of the inspection report was sent to strandssf@aol.com.

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No

KRYLER CORP (Continued) **1000280929**

Used oil transfer facility: No
Used oil transporter: No

Hazardous Waste Summary:

. Waste code: 121
. Waste name: Alkaline solution (pH >12.5) with metals (antimony, arsenic, barium, beryllium, cadmium, chromium, cobalt, copper, lead, mercury, molybdenum, nickel, selenium, silver, thallium, vanadium, and zinc)

. Waste code: 123
. Waste name: Unspecified alkaline solution

. Waste code: 171
. Waste name: Metal sludge (see 121)

. Waste code: 181
. Waste name: Other inorganic solid waste

KRYLER CORP (Continued) **1000280929**

. Waste code: 213
. Waste name: Hydrocarbon solvents (benzene, hexane, Stoddard, etc.)

. Waste code: 343
. Waste name: Unspecified organic liquid mixture

. Waste code: 352
. Waste name: Other organic solids

. Waste code: 461
. Waste name: Degreasing sludge

. Waste code: 711
. Waste name: Liquids with cyanides > 1000 mg/l

. Waste code: 722
. Waste name: Liquids with cadmium > 100 mg/l

. Waste code: 791
. Waste name: Liquids with pH < 2

. Waste code: 792
. Waste name: Liquids with pH < 2 with metals

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D003
. Waste name: REACTIVE WASTE

. Waste code: D006
. Waste name: CADMIUM

. Waste code: D007
. Waste name: CHROMIUM

. Waste code: D008
. Waste name: LEAD

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE,

KRYLER CORP (Continued) **1000280929**

2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F008
. Waste name: PLATING BATH RESIDUES FROM THE BOTTOM OF PLATING BATHS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 5854.6

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 6834.9

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.
Amount (Lbs): 6834.9

Waste code: D006
Waste name: CADMIUM
Amount (Lbs): 17264.9

Waste code: D007
Waste name: CHROMIUM
Amount (Lbs): 19614.9

Waste code: D008
Waste name: LEAD
Amount (Lbs): 8500

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL

KRYLER CORP (Continued) **1000280929**

ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Amount (Lbs): 1574.6

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Amount (Lbs): 1574.6

KRYLER CORP (Continued) **1000280929**

Environmental Interest/Information System
AIR EMISSIONS CLASSIFICATION UNKNOWN

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RISK AND TECHNOLOGY REVIEW

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best

KRYLER CORP (Continued) **1000280929**

management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Eval Notes: FA0027330 Kryler Corp. 1217 E. Ash Ave. Fullerton, CA 92831 On site to conduct the annual RCRA LQG hazardous waste inspection. Permission to inspect granted by Kryler/Krygier Jr. During the HW inspection, I determined that the facility has on site: 220 lbs of sodium cyanide. It is exempt from CAL ARP because it is not in a dust form. 50 lbs of cadmium oxide. It is exempt from CAL ARP because it is not in a dust form and is < 100 lbs. A 336 gallon cadmium plating tank (tank # 6) which currently has 16 oz/gallon of sodium cyanide and 5.5 oz/gallon of cadmium oxide. This calculates to 336 lbs of sodium cyanide and 115

KRYLER CORP (Continued) **1000280929**

lbs of cadmium oxide in this tank. Both of these chemicals exceed the 100 lbs reporting limit for the California Accidental Release Prevention Program (CAL ARP). You may either submit a RiskManagement Plan (RMP) within 1 year (4-7-2015) or you may reduce your plating tank to < 100 lbs of cadmium oxide and sodium cyanide (each).

Eval Date: 06-30-2015
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site for the annual Hazardous Waste (HW) inspection. Permission to inspect granted by Kryler/Chet Kreiger. This facility is a RCRA Large Quantity Generator (LQG). All HWs are hauled away on a 90 day cycle. Manifests were on site and reviewed. OK. Confirmed in HWTS. All HW tanks/totes/drums were properly labeled and stored closed. No leaks. **NOTE** the rear alley way (rear of 500 block of S. Raymond) had a noticeable amount of powder in the alley. It appears to originate from the auto repair shops and not Kryler. Notified FFD for storm water issues. EPA ID # is correct. Annual training held 5-2015. OC Sanitation District permit is valid. HMBEP has been submitted to FFD but not yet reviewed. Review of facility trash dumpster and facility perimeter were made. No dumping of HW. All wet floors were clean and dry. Updated OCHCA database with CNC machine coolant.

Eval Type:	Industrial Storm Water Compliance Evaluation
Eval Notes:	The company is a plater. The company belongs to a group monitoring, MFASC. The company conducts sampling every 2 years. Review of the AR showed all constituents below benchmark values. All the production activities were performed indoor. The SWPPP was old. Staff asked the contact to review and update the plan at least once a year. An etchant drum was found near the door that could pose a risk of leaking to the ground outside. Two containers of a colored liquid were found with no secondary containment. Two buckets of colored mop water were placed outside. The contact said that he would move these two containers and the etchant drum inside. The other two containes would be picked up by a wastehauler. Staff asked that the sampling point be changed to a corner point near their back gate to make sure that the sample representing the runoff from the facility. Staff asked the contact to mail in the photos of the site after the defificencies were fixed. By mailing in the pictures, the facility can avoid to have an NOV issued. The contact agreed to do that.

Eval Notes:	FA0027330 Kryler Corp. 1217 E. Ash Ave. Fullerton, CA 92831 On site to conduct the annual RCRA LQG hazardous waste inspection. Permission to inspect granted by Kryler/Krygier Jr. During the HW inspection, I determined that the facility has on site: 220 lbs of sodium cyanide. It is exempt from CAL ARP because it is not in a dust form. 50 lbs of cadmium oxide. It is exempt from CAL ARP because it is not in a dust form and is < 100 lbs. A 336 gallon cadmium plating tank (tank # 6) which currently has 16 oz/gallon of sodium cyanide and 5.5 oz/gallon of cadmium oxide. This calculates to 336 lbs of sodium cyanide and 115 lbs of cadmium oxide in this tank. Both of these chemicals exceed the 100 lbs reporting limit for the California Accidental Release Prevention Program (CAL ARP). You may either submit a RiskManagement Plan (RMP) within 1 year (4-7-2015) or you may reduce your plating tank to < 100 lbs of cadmium oxide and sodium cyanide (each).

Eval Type:	Routine done by local agency
Eval Notes:	On site to conduct the annual RCRA Large Quantity Generator (LQG) inspection. Permission to inspect granted by Kryler/Chet Krygier Jr. Facility is a RCRA LQG. Federal EPA ID #. Facility plates chrome, cadmium and type I/II anodizing. Reviewed manifests over the last 3 years. All Hazardous wastes (HW) managed under manifest every 90 days. Most HW drums/totes were properly labeled. See violations. Training is monthly. Krygier Jr. is the only staff who handle the HWs. Two other staff have been recently trained. Weekly review of HW storage areas reviewed and OK. Perimeter is fenced and clean. Municipal trash was reviewed and had only normal trash, no HW. Biennial report on file. FFD HMBEP on site. OC Sanitation permit is on site. Facility does not treat any HWs, all are hauled away under manifest.

Eval Notes:	INSPECTOR COMMENTS On site for a routine hazardous waste inspection. Consent to inspect and take any necessary photos was given by Chet Krygier, quality assurance. Walked throughout the facility. Observed hazardous waste storage areas. A dilute chrome tank was found still located on the plating line, but no longer in service, but liquid was present still within the tank. Spoke with Chet about how once he takes a tank off line, he has 90 days to either drum up the liquid and store it for later use, put it back online, or have it hauled away as hazardous waste. Sand Blast media with Cadmium was behind the air compressor and in some spots around the back area, Chet states that he sweeps up the sand blast at the end of the day, but the sand blast under the air compressor has been accumulating. There was a container that the facility had dumped some chrome debris sludge that Chet stated that they were drying to have hauled away. Spoke with Chet about how drying the [Truncated]

Eval Type:	Routine done by local agency
Eval Notes:	On site for the annual California Accidental Release Prevention (CALARP) inspection. Permission to inspect granted by Kryler/Chet Krygier. This facility was placed into the CAL ARP inspection program last year for sodium cyanide and cadmium oxide for tank #6. Since then, Kryler has decided to reduce the tank volume to 99 gallons. Lab tests showed the concentrations for NaCn @ 14 oz/gal and CDOx @ 4 oz/gal. This calculates out to 86 lbs of NaCN and 25 lbs. of CDOx. Tank volume was verified during the inspection. Both chemicals are below the TQ and therefore this site is not subject to the CAL ARP inspection program. RUR to remove this from the OCHCA inspection database.

Eval Notes:	On site for the annual Hazardous Waste (HW) inspection. Permission to inspect granted by Kryler/Chet Kreiger. This facility is a RCRA Large Quantity Generator (LQG). All HWs are hauled away on a 90 day cycle. Manifests were on site and reviewed. OK. Confirmed in HWTS. All HW tanks/totes/drums were properly labeled and stored closed. No leaks. **NOTE** the rear alley way (rear of 500 block of S. Raymond) had a noticeable amount of powder in the alley. It appears to originate from the auto repair shops and not Kryler. Notified FFD for storm water issues. EPA ID # is correct. Annual training held 5-2015. OC Sanitation District permit is valid. HMBEP has been submitted to FFD but not yet reviewed. Review of facility trash dumpster and facility perimeter were made. No dumping of HW. All wet floors were clean and dry. Updated OCHCA database with CNC machine coolant.

Eval Notes:	The company is a plater. The company belongs to a group monitoring, MFASC. The company conducts sampling every 2 years. Review of the AR showed all constituents below benchmark values. All the production activities were performed indoor. The SWPPP was old. Staff asked the contact to review and update the plan at least once a year. An etchant drum was found near the door that could pose a risk of leaking to the ground outside. Two containers of a colored liquid were found with no secondary containment. Two buckets of colored mop water were placed outside. The contact said that he would move these two containers and the etchant drum inside. The other two containes would be picked up by a wastehauler. Staff asked that the sampling point be changed to a corner point near their back gate to make sure that the sample representing the runoff from the facility. Staff asked the contact to mail in the photos of the site after the defificencies were fixed. By mailing in the pictures, the facility can avoid to have an NOV issued. The contact agreed to do that.

Eval Type:	Other, not routine, done by local agency
Eval Notes:	INSPECTOR COMMENTS On-site to conduct follow-up inspection, met with Chet to conduct follow-up walk through. Facility has updated their inspection log sheet to include the hazardous waste secondary containment areas and the hazardous waste storage areas. The liquid in the tank that was taken offline has been emptied and hauled away as hazardous waste, the manifest was available for review. Chrome debris waste was placed in a properly closed and labeled drum. All waste containers are closed and properly labeled. All dust from the san blasting unit outside is being swept daily and the area under the air compressor was clean. Violations I316, I333, I070, and violation I562 have all been corrected. No outstanding violations at this time.

Eval Notes: FA0027330 Kryler Corp. 1217 E. Ash Ave. Fullerton, CA 92831 On site to conduct the annual RCRA LQG hazardous waste inspection. Permission to inspect granted by Kryler/Krygier Jr. During the HW inspection, I determined that the facility has on site: 220 lbs of sodium cyanide. It is exempt from CAL ARP because it is not in a dust form. 50 lbs of cadmium oxide. It is exempt from CAL ARP because it is not in a dust form and is < 100 lbs. A 336 gallon cadmium plating tank (tank # 6) which currently has 16 oz/gallon of sodium cyanide and 5.5 oz/gallon of cadmium oxide. This calculates to 336 lbs of sodium cyanide and 115 lbs of cadmium oxide in this tank. Both of these chemicals exceed the 100 lbs reporting limit for the California Accidental Release Prevention Program (CAL ARP). You may either submit a RiskManagement Plan (RMP) within 1 year (4-7-2015) or you may reduce your plating tank to < 100 lbs of cadmium oxide and sodium cyanide (each).

Eval Notes: On site to conduct the annual RCRA Large Quantity Generator (LQG) inspection. Permission to inspect granted by Kryler/Chet Krygier Jr. Facility is a RCRA LQG. Federal EPA ID #. Facility plates chrome, cadmium and type I/II anodizing. Reviewed manifests over the last 3 years. All Hazardous wastes (HW) managed under manifest every 90 days. Most HW drums/totes were properly labeled. See violations. Training is monthly. Krygier Jr. is the only staff who handle the HWs. Two other staff have been recently trained. Weekly review of HW storage areas reviewed and OK. Perimeter is fenced and clean. Municipal trash was reviewed and had only normal trash, no HW. Biennial report on file.

KRYLER CORP (Continued) **1000280929**

FFD HMBEP on site. OC Sanitation permit is on site. Facility does not treat any HWs, all are hauled away under manifest.

Eval Date: 06-30-2015
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site for the annual California Accidental Release Prevention (CALARP) inspection. Permission to inspect granted by Kryler/Chet Krygier. This facility was placed into the CAL ARP inspection program last year for sodium cyanide and cadmium oxide for tank #6. Since then, Kryler has decided to reduce the tank volume to 99 gallons. Lab tests showed the concentrations for NaCn @ 14 oz/gal and CDOx @ 4 oz/gal. This calculates out to 86 lbs of NaCN and 25 lbs. of CDOx. Tank volume was verified during the inspection. Both chemicals are below the TQ and therefore this site is not subject to the CAL ARP inspection program. RUR to remove this from the OCHCA inspection database.

Eval Notes: The company is a plater. The company belongs to a group monitoring, MFASC. The company conducts sampling every 2 years. Review of the AR showed all constituents below benchmark values. All the production activities were performed indoor. The SWPPP was old. Staff asked the contact to review and update the plan at least once a year. An etchant drum was found near the door that could pose a risk of leaking to the ground outside. Two containers of a colored liquid were found with no secondary containment. Two buckets of colored mop water were placed outside. The contact said that he would move these two containers and the etchant drum inside. The other two containes would be picked up by a wastehauler. Staff asked that the sampling point be changed to a corner point near their back gate to make sure that the sample representing the runoff from the facility. Staff asked the contact to mail in the photos of the site after the defificencies were fixed. By mailing in the pictures, the facility can avoid to have an NOV issued. The contact agreed to do that.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006
Date Data Arrived at EDR: 03/01/2007

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills
This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

North Map:	5640256 LA HABRA, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

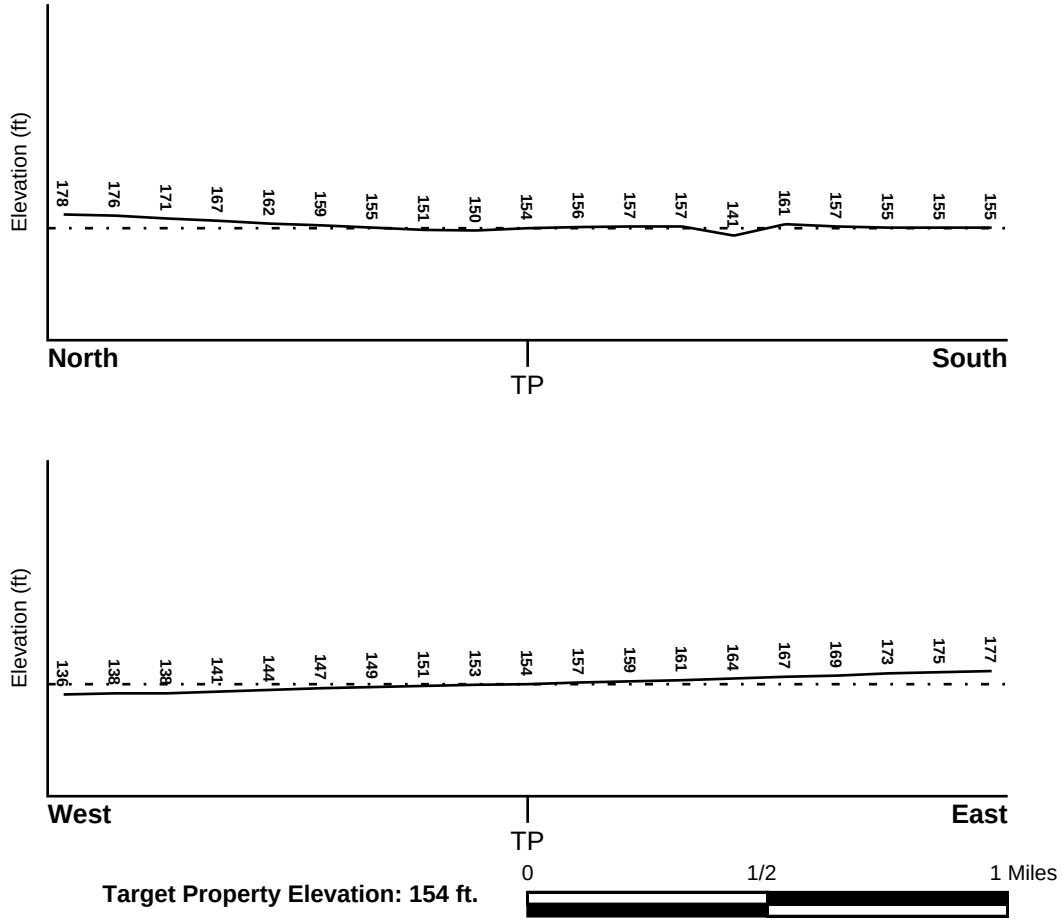
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WNW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06059C0131J	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type

06059C0132J	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
ANAHEIM	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile SSE
Site Name:	STEPAN CHEM CO
Site EPA ID Number:	CAD046590162
Groundwater Flow Direction:	South-Southeast
Inferred Depth to Water:	110 feet.
Hydraulic Connection:	Perched groundwater exists in the vicinity of the site and the site lies above the Talbert aquifer. The multiple aquifers in the site vicinity are interconnected.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

10G	1/2 - 1 Mile SSW	SW

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: MOCHO

Soil Surface Texture: loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	31 inches	loam	Not reported	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 7.9
2	31 inches	61 inches	loam	Not reported	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 7.9

Soil Map ID: 2

Soil Component Name: SAN EMIGDIO

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	7 inches	fine sandy loam	Not reported	Not reported	Max: 42 Min: 14	Max: 8.4 Min: 7.9
2	7 inches	61 inches	stratified gravelly loamy coarse sand to very fine sandy loam	Not reported	Not reported	Max: 42 Min: 14	Max: 8.4 Min: 7.9

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations
Source: Department of Conservation
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

Search Results:

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Leighton and Associates, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # CA81-4712-A97A

PO # 12572.001

Project SLR Fullerton

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: CA81-4712-A97A

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☑ Library of Congress
- ☑ University Publications of America
- ☑ EDR Private Collection

Limited Permission To Make Copies

Leighton and Associates, Inc. (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Important Information about This

Geoenvironmental Report

Geoenvironmental studies are commissioned to gain information about environmental conditions on and beneath the surface of a site. The more comprehensive the study, the more reliable the assessment is likely to be. But remember: Any such assessment is to a greater or lesser extent based on professional opinions about conditions that cannot be seen or tested. Accordingly, no matter how many data are developed, risks created by unanticipated conditions will always remain. *Have realistic expectations.* Work with your geoenvironmental consultant to manage known and unknown risks. Part of that process should already have been accomplished, through the risk allocation provisions you and your geoenvironmental professional discussed and included in your contract's general terms and conditions. This document is intended to explain some of the concepts that may be included in your agreement, and to pass along information and suggestions to help you manage your risk.

Beware of Change; Keep Your Geoenvironmental Professional Advised

The design of a geoenvironmental study considers a variety of factors that are subject to change. Changes can undermine the applicability of a report's findings, conclusions, and recommendations. *Advise your geoenvironmental professional about any changes you become aware of.* Geoenvironmental professionals cannot accept responsibility or liability for problems that occur because a report fails to consider conditions that did not exist when the study was designed. Ask your geoenvironmental professional about the types of changes you should be particularly alert to. Some of the most common include:

- modification of the proposed development or ownership group,
- sale or other property transfer,
- replacement of or additions to the financing entity,
- amendment of existing regulations or introduction of new ones, or
- changes in the use or condition of adjacent property.

Should you become aware of any change, *do not rely on a geoenvironmental report.* Advise your geoenvironmental professional immediately; follow the professional's advice.

Recognize the Impact of Time

A geoenvironmental professional's findings, recommendations, and conclusions cannot remain valid indefinitely. The more time that passes, the more likely it is that important latent changes will occur. *Do not rely on a geoenvironmental report if too much time has elapsed since it was completed.* Ask your environmental professional to define "too much time." In the case of Phase I Environmental Site Assessments (ESAs), for example, more than 180 days after submission is generally considered "too much."

Prepare To Deal with Unanticipated Conditions

The findings, recommendations, and conclusions of a Phase I ESA report typically are based on a review of historical information, interviews, a site "walkover," and other forms of noninvasive research. When site subsurface conditions are not sampled in any way, the risk of unanticipated conditions is higher than it would otherwise be.

While borings, installation of monitoring wells, and similar invasive test methods can help reduce the risk of unanticipated conditions, *do not overvalue the effectiveness of testing.* Testing provides information about actual conditions only at the precise locations where samples are taken, and only when they are taken. Your geoenvironmental

professional has applied that specific information to develop a general opinion about environmental conditions. *Actual conditions in areas not sampled may differ (sometimes sharply) from those predicted in a report.* For example, a site may contain an unregistered underground storage tank that shows no surface trace of its existence. *Even conditions in areas that were tested can change*, sometimes suddenly, due to any number of events, not the least of which include occurrences at adjacent sites. Recognize, too, that *even some conditions in tested areas may go undiscovered,* because the tests or analytical methods used were designed to detect only those conditions assumed to exist.

Manage your risks by retaining your geoenvironmental professional to work with you as the project proceeds. Establish a contingency fund or other means to enable your geoenvironmental professional to respond rapidly, in order to limit the impact of unforeseen conditions. And to help prevent any misunderstanding, identify those empowered to authorize changes and the administrative procedures that should be followed.

Do Not Permit Any Other Party To Rely on the Report

Geoenvironmental professionals design their studies and prepare their reports to meet the specific needs of the clients who retain them, in light of the risk management methods that the client and geoenvironmental professional agree to, and the statutory, regulatory, or other requirements that apply. The study designed for a developer may differ sharply from one designed for a lender, insurer, public agency...or even another developer. *Unless the report specifically states otherwise, it was developed for you and only you.* Do not unilaterally permit any other party to rely on it. The report and the study underlying it may not be adequate for another party's needs, and you could be held liable for shortcomings your geoenvironmental professional was powerless to prevent or anticipate. Inform your geoenvironmental professional when you know or expect that someone else—a third-party—will want to use or rely on the report. *Do not permit third-party use or reliance until you first confer with the geoenvironmental professional who prepared the report.* Additional testing, analysis, or study may be required and, in any event, appropriate terms and conditions should be agreed to so both you and your geoenvironmental professional are protected from third-party risks. *Any party who relies on a geoenvironmental report without the express written permission of the professional who prepared it and the client for whom it was prepared may be solely liable for any problems that arise.*

Avoid Misinterpretation of the Report

Design professionals and other parties may want to rely on the report in developing plans and specifications. They need to be advised, in writing, that their needs may not have been considered when the study's scope was developed, and, even if their needs were considered, they might misinterpret geoenvironmental findings, conclusions, and recommendations. *Commission your geoenvironmental professional to explain pertinent elements of the report to others who are permitted to rely on it, and to review any plans, specifications or other instruments of professional service that incorporate any of the report's findings, conclusions, or recommendations.* Your geoenvironmental professional has the best understanding of the issues involved, including the fundamental assumptions that underpinned the study's scope.

Give Contractors Access to the Report

Reduce the risk of delays, claims, and disputes by giving contractors access to the full report, *providing that it is accompanied by a letter of transmittal that can protect you* by making it unquestionably clear that: 1) the study was not conducted and the report was not prepared for purposes of bid development, and 2) the findings, conclusions, and recommendations included in the report are based on a variety of opinions, inferences, and assumptions and are subject to interpretation. Use the letter to also advise contractors to consult with your geoenvironmental professional to obtain clarifications, interpretations, and guidance (a fee may be required for this service), and that—in any event—they should conduct additional studies to obtain the specific type and extent of information each prefers for preparing a bid or cost estimate. Providing access to the full report, with the appropriate caveats, helps prevent formation of adversarial attitudes and claims of concealed or differing conditions. If a contractor elects to ignore the warnings and advice in the letter of transmittal, it would do so at its own risk. Your geoenvironmental professional should be able to help you prepare an effective letter.

Do Not Separate Documentation from the Report

Geoenvironmental reports often include supplemental documentation, such as maps and copies of regulatory files, permits, registrations, citations, and correspondence with regulatory agencies. If subsurface explorations were performed, the report may contain final boring logs and copies of laboratory data. If remediation activities occurred on site, the report may include: copies of daily field reports; waste manifests; and information about the disturbance of subsurface materials, the type and thickness of any fill placed on site, and fill placement practices, among other types of documentation. *Do not separate supplemental documentation from the report. Do not, and do not permit any other party to redraw or modify any of the supplemental documentation for incorporation into other professionals' instruments of service.*

Understand the Role of Standards

Unless they are incorporated into statutes or regulations, standard practices and standard guides developed by the American Society for Testing and Materials (ASTM) and other recognized standards-developing organizations (SDOs) are little more than aspirational methods agreed to by a consensus of a committee. The committees that develop standards may not comprise those best-qualified to establish methods and, no matter what, no standard method can possibly consider the infinite client- and project-specific variables that fly in the face of the theoretical "standard conditions" to which standard practices and standard guides apply. In fact, these variables can be so pronounced that geoenvironmental professionals who comply with every directive of an ASTM or other standard procedure could run afoul of local custom and practice, thus violating the standard of care. Accordingly, when geoenvironmental professionals indicate in their reports that they have performed a service "in general compliance" with one standard or another, it means they have applied professional judgement in creating and implementing a scope of service designed for the specific client and project involved, and which follows some of the general precepts laid out in the referenced standard. To the extent that a report indicates "general compliance" with a standard, you may wish to speak with your geoenvironmental professional to learn more about what was and was not done. *Do not assume a given standard was followed to the letter.* Research indicates that that seldom is the case.

Realize That Recommendations May Not Be Final

The technical recommendations included in a geoenvironmental report are based on assumptions about actual conditions, and so are preliminary or tentative. Final recommendations can be prepared only by observing actual conditions as they are exposed. For that reason, you should retain the geoenvironmental professional of record to observe construction and/or remediation activities on site, to permit rapid response to unanticipated conditions. *The geoenvironmental professional who prepared the report cannot assume responsibility or liability for the report's recommendations if that professional is not retained to observe relevant site operations.*

Understand That Geotechnical Issues Have Not Been Addressed

Unless geotechnical engineering was specifically included in the scope of professional service, a report is not likely to relate any findings, conclusions, or recommendations about the suitability of subsurface materials for construction purposes, especially when site remediation has been accomplished through the removal, replacement, encapsulation, or chemical treatment of on-site soils. The equipment, techniques, and testing used by geotechnical engineers differ markedly from those used by geoenvironmental professionals; their education, training, and experience are also significantly different. If you plan to build on the subject site, but have not yet had a geotechnical engineering study conducted, your geoenvironmental professional should be able to provide guidance about the next steps you should take. The same firm may provide the services you need.

Read Responsibility Provisions Closely

Geoenvironmental studies cannot be exact; they are based on professional judgement and opinion. Nonetheless, some clients, contractors, and others assume geoenvironmental reports are or certainly should be unerringly precise. Such assumptions have created unrealistic expectations that have led to wholly unwarranted claims and disputes. To help prevent such problems, geoenvironmental professionals have developed a number of report provisions and contract terms that explain who is responsible for what, and how risks are to be allocated. Some people mistake these for "exculpatory clauses," that is, provisions whose purpose is to transfer one party's rightful responsibilities and liabilities to someone else. Read the responsibility provisions included in a report and in the contract you and your geoenvironmental professional agreed to. *Responsibility provisions are not "boilerplate."* They are important.

Rely on Your Geoenvironmental Professional for Additional Assistance

Membership in the Geoprofessional Business Association exposes geoenvironmental professionals to a wide array of risk management techniques that can be of genuine benefit for everyone involved with a geoenvironmental project. Confer with your GBA-member geoenvironmental professional for more information.
