PHASE I ENVIRONMENTAL SITE ASSESSMENT

This document entitled Phase I Environmental Site Assessment was prepared by Stantec Consulting Services Inc. (Stantec) for GNAP Development, LLC. The material in it reflects Stantec's best judgment in light of the information available to it at the time of preparation. Any use which a third party makes of this report, or any reliance on or decisions made based on it, are the responsibilities of such third parties. Stantec accepts no responsibility for damages, if any, suffered by any third party as a result of decisions made or actions based on this report.

All information, conclusions, and recommendations provided by Stantec in this document regarding the Phase I ESA have been prepared under the supervision of and reviewed by the professionals whose signatures appear below.

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR 312. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Property. I have developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

1.0 SUMMARY

Stantec has prepared this Phase I Environmental Site Assessment (ESA) report for the property located at 1201-1223 South State College Boulevard, City of Fullerton, County of Orange, California (the "Property"), on behalf of GNAP Development LLC (the "Client"). The work was performed according to Stantec's proposal and terms and conditions dated April 27, 2021 and accepted by Client on the same date. GNAP Development LLC (the "User") has been designated as the User of this report.

The Phase I ESA was conducted in general conformance with the requirements of American Society for Testing and Materials (ASTM) Designation E 1527-13 and All Appropriate Inquiries (AAI) Final Rule 40 CFR Part 312, except as may have been modified by the scope of work, and terms and conditions, requested by the Client. Any exceptions to, or deletions from, the ASTM practice are described in the report.

The Property comprises an area of approximately 1.3 acres and is developed with an approximately 24,600 square foot single-story, multi-tenant commercial/industrial building with paved parking and travel areas. The building contains twelve (12) units addressed as 1201 through 1223 South State College Boulevard, which are occupied by various commercial businesses and hobby/recreation groups (Figure 2). The units and their uses are presented in the table below:

Unit Number	Business/Tenant Name	Description of Use
1201	Red Code Fast Pitch	Batting cages
1203	Fullerton Police Officer's Association	Recreation unit
1205	Racebred Components	Office and small parts storage for automotive design
1207	Orange County Catering	Kitchen for catering service
1209	Keith Denato	Hobby/recreation unit
1211	California Street Vans	Hobby shop for specialty van modification and light maintenance
1213	Gary Monnig	Hobby/recreation unit
1215	ConcreteWorks	Office and warehouse
1217	Keith Denato	Equipment storage

1219	Albert Air	Heating and cooling installation/repair (office and warehouse)
1221	MRB Custom Sofas	Furniture assembly and re-upholstery
1223	Robert Wojdynski	Warehouse for antiques/collectables

The current uses, as summarized in the above table, were observed during the Property reconnaissance to include the use or storage of small quantities of petroleum hydrocarbons (motor oil and hydraulic oil). Waste oil was observed in the northwest corners of units 1211 and 1215, and in the northeast portion of unit 1223. Waste oil was limited to one 55-gallon drum or less in each of these units. The used oil generated by the hobby shop owners is a result of maintaining or upgrading antique vehicles. Used oil generated by the concrete company was from the maintenance of field equipment/machinery. One 5-gallon bucket of hydraulic oil was also observed in the northwest corner of unit occupied by the concrete company (Unit 1215). No staining or signs of a release were observed in the oil storage areas. Given the limited quantities of oil storage and no evidence of leakage or staining, the limited quantities of oil are considered a de minimis condition.

Prior to development the Property was an orchard. Building records indicate that the existing structure was constructed in 1960 and completed in 1961. Historical city directory listings indicate that the building has been occupied by multiple commercial tenants including labs, offices, a sheet metal company, and light manufacturing/repair. Given the size of the units, lack of drains, and absence of former exhaust systems, commercial/industrial activities in the units at the Property appear to have been minor and mostly used for assembly and storage.

Based on information on aerial photographs, the orchards appear to have been part of a larger orchard operation that included the neighboring Kimberly Clark Corporation (KCC) parcels, located west and north of the Property. Stantec conducted Phase II ESA investigations to assess the orchards and sampled for constituents of concern (pesticides, arsenic, and lead) on the KCC parcels. Therefore, the pesticide, arsenic, and lead sampling that was performed on the KCC site are considered representative of the Property since the same orchards occupied both properties. The sampling on the KCC site identified only trace concentrations of pesticides (i.e., slightly above laboratory reporting limits) at two locations, and non-detect concentrations (i.e., below laboratory reporting limits) at the remaining locations. Additionally, lead was not detected above health risk screening levels and arsenic concentrations were within the range considered to be naturally occurring in California. As a result, no further investigation is recommended regarding the former agricultural use of the Property.

Based on a review of Environmental Database Research (EDR) report, regional groundwater impacts are reported to be present beneath the Property and include concentrations of various volatile organic compounds (VOCs), including chlorinated solvents, in excess of allowable maximum contaminant levels (MCLs). The presence of VOC-contaminated groundwater beneath the Property poses a potential vapor intrusion concern to existing and future property

users. Multiple potentially responsible parties (PRPs) have been named in the EPA designated "Orange County North Basin" Superfund Site on September 3, 2020 to address groundwater contamination. The Property has not been named as a potentially responsible party (PRP).

Conclusions and Recommendations

A Phase I ESA was performed in conformance with the scope and limitations of ASTM Practice E1527 of 2001 East Orangethorpe Avenue, City of Fullerton, County of Orange, California. Any exceptions to, or deletions from, this practice are described in the Data Gaps section of this report. This assessment has revealed the following evidence of recognized environmental conditions (RECs) in connection with the Property:

- **Groundwater Plume.** The Property is located within the boundaries of the Orange County North Basin National Priorities List Superfund Site. Groundwater beneath the Property is believed to be impacted by volatile organic compounds (VOCs) related to the regional plume. The Property is located in the Fullerton Sub-Area of the Orange County North Basin. Nine potentially responsible party (PRP) sites have been identified in this sub-area which are located northwest of the Kimberly Avenue and S. State College Boulevard intersection, or along the southside of Orangethorpe Avenue. The groundwater impacts are the result of spills and leaks from historical industrial activities in the region. The documented VOC regional groundwater impacts from off-Property sources constitute a potential vapor encroachment condition (pVEC) to the Property.

  Recommendation: Soil vapor sampling is recommended to evaluate whether VOCs in soil vapor emanating from the regional plume may be present above commercial use thresholds that would require further assessment and/or mitigation.

- **Past Commercial Uses.** Historical city directories indicate multiple commercial businesses have operated in the units at the Property dating back to the 1960s. These commercial businesses included a molding company, sheet metal company, tool and fastener businesses, a printing/graphics shop, a laboratory, machine shop, and landscaping. No specific information is available on these sites and there was no evidence of floor drains, patchwork, clarifiers, or chemical storage tanks noted during the Property visit.

  Recommendation: Given that various commercial businesses have occupied the Property since the early 1960s, soil vapor sampling is recommended to evaluate whether releases occurred at the property that may result in increased liability related to the ongoing Superfund action and whether any release may have occurred from these past uses that would require further action or mitigation.

Stantec identified the following de minimis conditions at the Property:

- Waste oil was observed in the northwest corners of units 1211 and 1215 and were limited to one 55-gallon drum or less. No staining or signs of a release were observed in the oil storage areas of the hobby shop or concrete company. Given the limited quantities of oil

and the absence of evidence of leakage or staining, the low volume of oil storage is considered a de minimis condition.

Recommendation: No further investigations are recommended.

In addition, Stantec has identified the following non-ASTM environmental issues associated with the Property:

- **Asbestos Containing Materials and Lead-Based Paint.** During the Property reconnaissance a pre-demolition survey was being performed by Pacific Environmental. It is recommended that the conclusions and recommendations presented be complied with prior to demolition or renovation of the Property structure.

- **Universal Wastes -** Fluorescent light ballasts, mercury switches and other common building components were observed in buildings and may contain hazardous materials. These should be properly handled and disposed of in accordance with regulatory guidelines prior to demolition.

2.0 INTRODUCTION

The objective of this Phase I ESA was to perform all appropriate inquiry into the past ownership and uses of the Property consistent with good commercial or customary practice as outlined by the ASTM in "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process", Designation E1527-13. The purpose of this Phase I ESA was to identify adverse environmental conditions including recognized environmental conditions ("RECs") of the Property.

The ASTM E1527-13 standard indicates that the purpose of the Phase I ESA is to identify RECs, including historical recognized environmental conditions ("HRECs"), and controlled recognized environmental conditions ("CRECs") that may exist at a property. The term "recognized environmental conditions" means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property:

(1) Due to any release to the environment;

(2) Under conditions indicative of a release to the environment; or

(3) Under conditions that pose a material threat of a future release to the environment.

ASTM defines an "HREC" as a REC that has occurred in connection with the property, but has been addressed to the satisfaction of the applicable regulatory authority and meets unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). Before calling the past release a HREC, the environmental professional must determine whether the past release is a REC when the current Phase I ESA is conducted (for example, if there has been a change in the regulations). If the EP considers the past release to be a REC at the time the Phase I ESA is conducted, the condition shall be included in the conclusions section of the report as a REC.

ASTM defines a "CREC" as a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), but with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

De minimis conditions are not RECs. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. As indicated, the term REC does not include de minimis conditions, which generally do not present a material risk to human health and would not likely be subject to enforcement action if brought to the attention of governmental agencies.

This ESA was conducted in accordance with ASTM E 1527-13. The scope of work conducted during this Phase I ESA consisted of a visual reconnaissance of the Property, interviews with key individuals, and review of reasonably ascertainable documents. The scope of work did not include an assessment for environmental regulatory compliance of any facility ever operated at the Property (past or present), or sampling and analyzing of environmental media. Stantec was not contracted to perform any independent evaluation of the purchase or lease price of the Property and its relationship to current fair market value. The conclusions presented in this ESA Report are professional opinions based on data described herein. The opinions are subject to the limitations described in Section 2.3.

ASTM E1527-13 notes that the availability of record information varies from source to source. The User or Environmental Professional is not obligated to identify, obtain, or review every possible source that might exist with respect to a property. Instead, ASTM identifies record information that is reasonably ascertainable from standard sources. "Reasonably ascertainable" means:

(1) Information that is publicly available;

(2) Information that is obtainable from its source within reasonable time and cost constraints; and

(3) Information that is practicably reviewable.

2.1 PROPERTY DESCRIPTION

The Property consists of approximately 1.3 acres, including an approximately 24,600 square foot single-story industrial building and parking lot at 1223 S. State College Boulevard, in the City of Fullerton, Orange County, California. The building contains twelve (12) units addressed as 1201 through 1223 South State College Boulevard and occupied by various commercial businesses and hobby/recreation groups. The units and their uses are presented in the table below:

Unit Number	Business/Tenant Name	Description of Use
1201	Red Code Fast Pitch	Batting cages
1203	Fullerton Police Officer's Association	Recreation unit
1205	Racebred Components	Office and small parts storage for automotive design
1207	Orange County Catering	Kitchen for catering service
1209	Keith Denato	Hobby/recreation unit

1211	California Street Vans	Hobby shop for specialty van modification and light maintenance
1213	Gary Monnig	Hobby/recreation unit
1215	ConcreteWorks	Office and warehouse
1217	Keith Denato	Equipment storage
1219	Albert Air	Heating and cooling installation/repair (office and warehouse)
1221	MRB Custom Sofas	Furniture assembly and re-upholstery
1223	Robert Wojdynski	Warehouse for antiques/collectables

A Property location map is illustrated on Figure 1. A Property map illustrating the main features of the Property is provided as Figure 2. Photographs taken during the Property reconnaissance visit are provided in Appendix A.

2.2 SPECIAL TERMS, CONDITIONS, AND SIGNIFICANT ASSUMPTIONS

There were no special terms, conditions, or significant assumptions associated with the Phase I ESA.

2.3 EXCEPTIONS AND LIMITING CONDITIONS

This report documents work that was performed in accordance with generally accepted professional standards at the time and location in which the services were provided. No other representations, warranties or guarantees are made concerning the accuracy or completeness of the data or conclusions contained within this report, including no assurance that this work has uncovered all potential and actual liabilities and conditions associated with the identified property.

This report provides an evaluation of selected environmental conditions associated with the identified portion of the property that was assessed at the time the work was conducted and is based on information obtained by and/or provided to Stantec at that time. (40 CFR 312.20(f)(2) requires that the Environmental Professional evaluate the thoroughness and reliability of provided information.) Stantec assumes no responsibility for any deficiency or inaccuracy in information received from others.

If a service is not expressly indicated, do not assume it has been provided. If a matter is not addressed, do not assume that any determination has been made by Stantec in regard to it.

Conclusions made within this report consist of Stantec's professional opinion as of the time of the writing of this report and are based solely on the scope of work described in the report, the limited data available and the results of the work. They are not a certification of the property's environmental condition.

This report relates solely to the specific project for which Stantec was retained and the stated purpose for which this report was prepared and shall not be used or relied upon by the client identified herein for any variation or extension of this project, any other project or any other purpose.

This report has been prepared for the exclusive use of the client identified herein and any use of or reliance on this report by any third party is prohibited, except as may be consented to in writing by Stantec or as required by law. The provision of any such consent is at Stantec's sole and unfettered discretion and will only be authorized pursuant to the conditions of Stantec's standard form reliance letter. Stantec assumes no responsibility for losses, damages, liabilities or claims, howsoever arising, from third party use of this report.

Project Specific limiting conditions are provided in Section 2.2.

The locations of any utilities, buildings and structures, and property boundaries illustrated in or described within this report, if any, including pole lines, conduits, water mains, sewers and other surface or sub-surface utilities and structures are not guaranteed. Before starting work, the exact location of all such utilities and structures must be confirmed by the client and Stantec assumes no liability resulting from damage to such utilities and structures.

The conclusions are based on the Property conditions encountered by Stantec at the time the work. Accordingly, additional studies and actions may be required. As the purpose of this report is to identify selected Property conditions which may pose an environmental risk, the identification of non-environmental risks to structures or people on the Property is beyond the scope of this assessment. The findings, observations, and conclusions expressed by Stantec in this report are not an opinion concerning the compliance of any past or present owner or operator of the Property which is the subject of this report with any Federal, state, provincial or local law or regulation.

This report presents professional opinions and findings of a scientific and technical nature. It does not and shall not be construed to offer a legal opinion or representations as to the requirements of, nor compliance with, environmental laws, rules, regulations or policies of Federal, state, provincial or local governmental agencies. Issues raised by the report should be reviewed by client legal counsel.

Stantec specifically disclaims any responsibility to update the conclusions in this report if new or different information later becomes available or if the conditions or activities on the property subsequently change. In the event of any conflict between the terms and conditions of this report and the terms and conditions of the MSA, the MSA shall control.

2.4 PERSONNEL QUALIFICATIONS

This Phase I ESA was conducted by, or under the supervision of, an individual that meets the ASTM definition of an Environmental Professional (EP). The credentials of the EP and other key Stantec personnel involved in conducting this Phase I ESA are provided in Appendix B.

3.0 USER-PROVIDED INFORMATION

ASTM E1527-13 describes responsibilities of the User to complete certain tasks in connection with the performance of "All Appropriate Inquiries" into the Property. The ASTM standard requires that the Environmental Professional request information from the User on the results of those tasks because that information can assist in the identification of RECs, CRECs, HRECs, or *de minimis* conditions in connection with the Property. Towards that end, Stantec requested that the User provide the following documents and information:

Description of Information	Provided (Yes / No)	Description
User Questionnaire	Yes	Mr. Matthew McGuire, Vice President of Due Diligence and Construction at Goodman North America Management LLC completed a user questionnaire for the Property. The responses to the questionnaire are provided below. Based on review of the Questionnaire, Mr. McGuire noted the following: • Environmental Cleanup Lien: No • Activity and Land Use Limitations: No • Mr. McGuire responded "yes" specialized knowledge or experience related to the property adjacent to the north and west. • Mr. McGuire indicated that the purchase price of the Property reasonably reflects the fair market value. • Mr. McGuire indicated that he was not aware of any hazardous materials or petroleum releases or cleanups, or any former environmental reports for the Property. A copy of the completed user questionnaire is provided in Appendix C.

4.0 RECORDS REVIEW

The objective of consulting historical sources of information is to develop the history of the Property and surrounding area, in order to evaluate if past uses may have resulted in RECs. Physical setting records are evaluated to determine if the physical setting may have contributed to adverse environmental conditions in connection with the Property. During the review of historical records, Stantec attempted to identify uses of the Property from the present to the Property's first developed use. Stantec's research included the reasonably ascertainable and useful records described in this section.

4.1 PHYSICAL SETTING

A summary of the physical setting of the Property is provided in the table below with additional details in the following subsections.

Topography:	The Property topography slopes to the west at elevations ranging from approximately 189 feet above mean sea level (amsl) in the east, to approximately 187 feet amsl in the west (USGS, 1981).
Soil/Bedrock Data:	The stratigraphy underlying the Property consists primarily of Holocene to Late Pleistocene alluvial fan deposits consisting of unconsolidated to moderately consolidated silt, sand, gravel and cobble/boulder alluvial-fan deposits (USGS, 2006).
Estimated Depth to Groundwater/ Estimated Direction of Gradient:	Information reviewed on Geotracker related to the Orange County North Basin, including data from a nearby monitoring well along Kimberly Ave, indicates that first groundwater is present at 80 to 120 feet below ground surface (bgs) and flows to the west or southwest.
Note: Property-specific groundwater direction and depth can only be determined by conducting Property-specific testing, which Stantec has not conducted.	

4.1.1 Property Topography and Surface Water Flow

The Property elevation ranges from 187 to 189 feet bgs and has a very slight gradient to the west. Surface runoff is expected to travel in that general direction or as redirected by the drainage swale along the southern boundary.

4.1.2 Regional and Property Geology

The Property is located in the northern portion of the Peninsular Ranges Geomorphic Province characterized by northwest-southeast trending mountains and faults. The regional surficial geology

is described as Holocene to Late Pleistocene age young alluvial-fan deposits consisting of unconsolidated to moderately consolidates silt, sand, cobbles and boulders common to alluvial fan deposits (USGS, 2006). The nearest known active fault is the El Modeno fault which is located approximately 2.25 miles to the southeast (CGS, 2010a). The Property is not located within a designated Alquist-Priolo Special Studies Zone (CGS, 2010b).

4.1.3 Regional and Property Hydrogeology

The Property is located in the Coastal Plain of the Orange County (8-001) groundwater basin. The basin is bounded on the northwest and the north by the Los Angeles-Orange County line; the Whittier fault zone and consolidated rocks of the Puente Hills and Chino Hills to the northeast; consolidated rocks of the Santa Ana Mountains to the east; and consolidated rocks of the Laguna Hills and San Joaquin Hills to the south. The Pacific Ocean bounds the southwest extent of the basin. (Department of Water Resources [DWR], 2004.)

The Orange County Water District manages the groundwater basin and has identified three aquifers designated as Shallow, Principal, and Deep. The Shallow aquifer is located at a depth of approximately 80 to 120 feet bgs, the Principal aquifer at approximately 200 to 250 feet, and the Deep aquifer is at depths of more than 850 feet bgs. Based on groundwater sample data, the Shallow and Principal aquifers are impacted with various volatile organic compounds (VOCs), consisting primarily of 1,4-Dioxane, tetrachloroethylene (PCE), and PCE breakdown products. The VOC groundwater plume in the Principal aquifer has been confirmed to be several miles long and over a mile wide and has caused the closure of at least five municipal water supply wells.

In 2014 and 2015, state and local agencies requested that EPA assist in cleanup of groundwater contamination that underlies portions of Fullerton, Anaheim, and Placentia which has now been designated as the "Orange County North Basin". The groundwater impacts in the North Basin are the result of spills and leaks from industrial activities over the preceding decades. The EPA is reviewing historical documents and other sources of information to identify Potentially Responsible Parties (PRPs) to assist in funding the cleanup. As part of the remedial investigation/feasibility study (RI/FS) required by the agreement between the EPA and the Orange County Water District (OCWD), OCWD has installed and sampled groundwater monitoring wells and collected other data to help determine the nature and extent of contamination and provide EPA with information needed to develop an initial cleanup plan. According to information available on Geotracker, two of these wells are installed immediately north of the Property along Kimberly Avenue.

Information reviewed on Geotracker related to the Orange County North Basin Superfund Site, including data from the two nearby monitoring wells (MW25 and MW26) along Kimberly Ave (north of the Property), indicates that shallow groundwater in the immediate vicinity of the Property was located at depths of 68 and 63 feet bgs (March 2015), respectively, and flows to the west or southwest.

4.2 FEDERAL, STATE AND TRIBAL ENVIRONMENTAL RECORDS

A regulatory agency database search report was obtained from Environmental Data Resources, Inc. (EDR), a third-party environmental database search firm. A complete copy of the database search report, including the date the report was prepared, the date the information was last updated, and the definition of databases searched, is provided in Appendix D.

Stantec evaluated the information listed within the database relative to potential impact to the Property, assessing the potential for impacts based in part on the physical setting. As part of this process, inferences have been made regarding the likely groundwater flow direction at or near the Property. Observations about the Property and surrounding properties made during the Property reconnaissance are provided in more detail in Section 5.

4.2.1 Listings for Property

The Property is not listed in any of the databases researched by EDR.

4.2.2 Adjacent Property Listings

Stantec assessed data presented in the environmental agency database search report to evaluate the potential for conditions to pose a REC, CREC, or HREC for the Property.

Due to the regional westerly groundwater flow direction and documented Orange County North Basin NPL contamination crossgradient and downgradient of the subject property and the new NPL designation of the Orange County North Basin Superfund site, Stantec has evaluated only those sites listed in the EDR Report as located adjacent to or hydraulically upgradient (east) of the subject Property for their potential to impact the subject Property. Also, based on the large number of adjacent to or upgradient listings, only those listings with the highest likelihood to be of environmental concern have been summarized below [e.g., ENVIROSTOR, SEMS, SEMS-ARCHIVE, LUST, SLIC, UST, AST, CA FID UST, SWEEPS UST, HAZNET, HIST CORTESE, and HIST UST].

Based on this evaluation, the following individual facilities were identified as the most likely potential sources of impact to the Property. The basis for why each of the following database listings does or does not create a REC for the Property is also provided.

Listed Facility Name/Address	Database Listing	Distance/Direction from Property	REC? (YES / NO)
Winonics Inc DBA Bench 2 Bench 1257 S State College Blvd Fullerton, CA	SEMS-ARCHIVE / RCRA-LQG / FINDS / ECHO	Adjacent to the east-southeast	No
The various UST databases indicate there may have been one 500-gallon fuel UST and one 2,000-gallon waste UST at this facility in 1992. The LUST database (Case No. 9OUT003) is related to potential contamination of lead, copper, nickel, and chromium to soil. The LUST case was opened in December 1989 during tank closure activities; closure was obtained on February 5, 1990. The SEMS-ARCHIVE database indicates that the facility was investigated by Cal-EPA/DTSC and determined that no further steps will be taken for inclusion of the facility on the NPL. However, the ENVIROSTOR database indicates that an			

Listed Facility Name/Address	Database Listing	Distance/Direction from Property	REC? (YES / NO)
inactive case is open for the site that requires additional evaluation and that the facility is a circuit board manufacturer and reportedly operates a plating line. Potential releases from this facility that would affect soil vapor were assessed by Stantec in 2019 during the Phase II ESA for the KCC site. Soil vapor samples were collected for VOCs during that assessment at the shared fence line between the KCC semi-trailer parking lot and the Winonics facility. No VOCs were detected in the soil vapor samples that were collected at 5 and 15 feet adjacent to the Winonics facility.			
Thrifty Oil #303/ARCO 9677 Arco 42122 P&M Service Station Target Station Gary Ligget 2351 Orangethorpe Ave Fullerton, CA	CA LUST / EDR Hist Auto Stat / CA Cortese / RCRA NonGen / CA CERS Tanks / CA FID UST / CA SWEEPS UST / CA CERS HAZ WASTE / CA UST	Approximately 130 feet south	No
This facility has reported two releases that have affected only soil. The first case was issued closure on July 28, 2011 and the more recent case is listed with a status of "preliminary site assessment underway". Given that the releases are reported to have only affected soil and that this facility is 130 feet to the south of the Property boundary, no further investigation is recommended with regard to potential impacts to the Property.			
Chapman Coast Roof Company Coast Roofing Company 2301 E. Orangethorpe Ave Fullerton, CA	RCRA NonGen/NLR / UST / CA AST / CA FID UST / CA EMI / CA CERS / CA SWEEPS UST	Approximately 260 feet southwest	No
According to the SWEEPS UST, this facility reportedly had a 10,000-gallon leaded gasoline UST. There are no releases reported in the EDR for this facility. Due to distance and flow direction to the west, this facility is considered unlikely to represent an environmental concern to the Property and no further investigation is recommended.			
United Rentals Inc Branch 515 / US Rentals 1301 S State College Blvd Fullerton, CA	CA AST / RCRA NonGen/NLR / CA LUST / CA NPDES / CA CIWQS / CA CERS/ CA CERS HAZ WASTE / CA SWEEPS UST / CA FID UST / CA UST / RCRA NonGen/NLR / CA EMI	Approximately 380 feet east-southeast	No
This facility reported a release of gasoline that affected soil but was issued closure by the City of Fullerton on January 23, 2001. Given that the release is reported to have only affected soil and that this facility is 380 feet from the southeast Property boundary, no further investigation is recommended with regard to potential impacts to the Property.			

The remaining listings in the database search report provided in Appendix D do not constitute a REC for the Property.

4.3 LOCAL/REGIONAL ENVIRONMENTAL RECORDS

Stantec checked the following sources to obtain information pertaining to Property use and/or indications of RECs in connection with the Property:

4.3.1 California Geologic Energy Management (CalGEM)

Agency Name Contact Information	Finding
California Geologic Energy Management (CalGEM) Division 5816 Corporate Avenue, Suite 200 Cypress, CA 90630 Online database: https://maps.conservation.ca.gov/doggr/wellfinder/#/-118.94276/37.12009/6	According to the Well Finder map located on the CalGEM website, there are no oil wells located on the Property. The nearest oil well (a plugged dry hole with API 0405901118) is located approximately 3,700 feet to the northeast of the Property.

4.3.2 Department of Toxic Substance Control (DTSC)

Agency Name Contact Information	Finding
Department of Toxic Substance Control (DTSC) 9211 Oakdale Avenue Chatsworth, California 91311 http://www.envirostor.dtsc.ca.gov/	The Property is not listed on Envirostor - the online public database managed by the DTSC. Several of the surrounding properties are listed in the database that are either associated with the regional Orange County North Basin groundwater plume, a Voluntary Cleanup Program (VCP), or a tiered permit facility. These facilities, and other nearby facilities, are discussed in Section 4.2.2 above.

4.3.3 Local Building and/or Planning Department Records

Agency Name, Contact Information	Findings
City of Fullerton Building Division 303 W. Commonwealth Ave, Fullerton, California Phone: (714) 738-6300	Archived building records for the City of Fullerton are available online at https://docs.cityoffullerton.com/weblink/Browse.aspx?dbid=1&startid=91553&cr=1. Stantec conducted a review of available permits issued by the building department and found that most of the records consisted of permits for original construction (1960-1961), sewer connection (1960), or upgrades for lighting/electrical, building (including roof installation/upgrades), plumbing, and signage. EDR provided a Building Permit Report dated August 14, 2020 for the Property address and adjoining properties. Permits summarized for the Property indicated that unit 1201 was formerly a "window manufacturer". Other permits summarized were for eletrcical permits and tenant improvements with no reference to specific tenant operations or use.

4.3.4 Regional Water Quality Control Board

Agency Name Contact Information	Finding
Regional Water Quality Control Board (RWQCB) – Santa Ana Region 3737 Main Street, Suite 500 Riverside, CA 92501 http://geotracker.waterboards.ca.gov/	The Property is not listed on Geotracker - the online public database managed by the RWQCB. However, the Property is located in the immediate vicinity of the Orange County North Basin Superfund National Priorities List due to regional groundwater impacts from VOCs. The Fullerton Sub-Area of the Orange County North Basin is made up of 9 sites, most of which are located northwest of the Kimberly Avenue and S. State College Boulevard intersection or along the southside of Orangethorpe Avenue. The groundwater impacts are the result of spills and leaks from industrial activities over the preceding decades in the region. The documented VOC regional groundwater impacts from off-Property sources constitute a potential vapor encroachment condition (pVEC) to the Property and soil vapor sampling is recommended to evaluate (1) the potential for the Property to be named as a source of the regional groundwater contamination and (2) whether VOCs in soil vapor are above commercial use thresholds that would require further assessment and/or mitigation.

4.3.5 Orange County Health Care Agency

Agency Name Contact Information	Finding
Orange County Health Care Agency 1251 E. Dyer Road Santa Ana, California	Stantec contacted the Orange County Health Care Agency (OCHCA) on May 20, 2021 to request recent records for the Property. At the time of the preparation of this report no response has been received. This data gap is not considered significant since no other environmental records sources have indicated the presence of USTs, significant chemical storage, spills or releases, or other sources of contamination on the Property. In the event that records become available at a later data, it is recommended that the records be retrieved and reviewed. In the event that the records change the conclusions of this report, Stantec will issue an addendum of the findings along with any further recommendation, if deemed necessary.

4.3.6 Local Fire Department Records

Agency Name, Contact Information	Findings
City of Fullerton Fire Department 312 East Commonwealth Ave, Fullerton, California Phone: (714) 738-5354	Stantec contacted the Fullerton Fire Department (FFD) on May 21, 2021 to request recent records for the Property. The FFD contacted Stantec on May 26, 2021 and provided a link to fire inspection records for the Property. Records indicate several commercial businesses have operated at the Property since 1965 and that some of the units (1209-1217, and 1201-1203) were joined. The majority of the records indicate that no hazardous materials were used by the tenants with the exception of small quantities (~ 55 gallons annually) of petroleum naptha used by a former printing/graphic company in unit 1211 in the early 2000s, and chloroform (max. amount: 1 pint) stored/used by a testing lab that was located in unit 1203 in the mid-1980s. A violation was issued the occupant of 1201-1203 for spray painting a car with clear coat without using a paint booth. This appeared to be a single incident as one of the neighboring tenants reported the odor.

4.4 HISTORICAL RECORDS REVIEW

4.4.1 Land Title Records/Deeds

An environmental Lien search conducted by EDR dated May 18, 2021 did not identify any Environmental Liens or Activity Use Limitations for the Property. A copy of the lien search report is provided in Appendix F.

4.4.2 Aerial Photographs

Stantec reviewed historical aerial photographs provided by EDR. The general type of activity on a property and land use changes can often be discerned from the type and layout of structures visible in the photographs. However, specific elements of a facility's operation usually cannot be discerned from aerial photographs alone. The following table summarizes Stantec's observations of the reviewed historical aerial photographs.

Copies of the historical aerial photographs are located in Appendix F.

Year	Scale	Observations, Property and Adjoining Properties
1938, 1947, 1952	1:500	The Property and surrounding properties in all directions are orchards. State College Blvd appears in its current location to the east of the Property.
1963	1:500	The Property has been developed with the present-day commercial building and parking lot. The adjacent property to the south has also been developed with the existing commercial building. Adjacent property to the north and west remain as orchards. The Kimberly Clark Corporation (paper mill) has been developed further to the west. The properties to the east, across State College Blvd, are developed with four small commercial structures. A gas station appears to have been developed at the northwest corner of the State College Blvd and Orangethorpe Ave intersection. Several water retention ponds are visible to the south of Orangethorpe Ave, approximately 500 feet south of the Property.
1972, 1977	1:500	The Property appears the same as in the previous photographed year. The surrounding area has become increasingly developed with commercial and industrial businesses. The adjoining properties to the north and west remain orchards.
1987, 1989	1:500	The Property appears the same as in the previous photographed year. The surrounding area has become increasingly developed with commercial and industrial businesses. The adjoining property to the north remain an orchard and the property to the west is a semi-trailer parking lot for Kimberly Clark Corporation.
1990, 1995	1:500	The Property and surrounding properties appears similar to the previous photograph.
2005	1:500	The Property appears similar to the previous photograph but the nearby property to the south of Orangethorpe Ave, where the water retention ponds were located, has been developed with a large commercial building.
2009, 2012, 2016	1:500	The Property and surrounding properties appears similar to the previous photograph.

4.4.3 City Directories

Stantec reviewed the historical city directories provided by EDR. The findings are summarized below:

Address	Year	Occupant

Historical city directories indicate multiple commercial businesses have operated in the units at the Property dating back to the 1960s. These commercial businesses included a molding company, sheet metal company, tool and fastener businesses, a printing/graphics shop, a laboratory, machine shop, and landscaping. No specific information is available on these sites and there was no evidence of floor drains, clarifiers, or chemical storage tanks noted during the Property visit. Given the various commercial businesses, Stantec recommends that soil vapor sampling be performed at the Property to screen whether any release may have occurred from these past uses that would require further action or mitigation.

4.4.4 Historical Fire Insurance Maps

Fire insurance maps were developed for use by insurance companies to depict facilities, properties, and their uses for many locations throughout the United States. These maps provide information on the history of prior land use and are useful in assessing whether there may be potential environmental contamination on or near the Property. These maps, which have been periodically updated since the late 19th century, often provide valuable insight into historical Property uses.

Stantec requested fire insurance maps from EDR; however, there is no coverage for the Property. The Sanborn® Map Search Report is presented in Appendix F.

4.4.5 Historical Topographic Maps

Stantec reviewed historical USGS 7.5-Minute Topographic Maps of the Property vicinity to help identify past Property usage and areas of potential environmental concern.

Stantec identified no additional RECs based on its review of the topographic maps. Copies of the historical maps are provided in Appendix F. The following table summarizes the maps reviewed and our observations.

Year	Scale	Observations, Property and Adjoining Properties
1896, 1898, 1901 & 1902	1:62,500	The Property is depicted as primarily vacant land, with three small buildings. The surrounding area is lightly developed with small residential/agricultural buildings. A railroad easement identified as "Los Angeles" is present to the west, as well as the town of Fullerton. The town of Placentia is labeled on the 1901 and 1902 maps.
1935	1:24,000	The Property is illustrated as vacant land. A small building is present southeast adjacent to the subject property. Carbon Canyon Creek is depicted south of the subject property, followed by a low-relief feature. Fullerton and

Year	Scale	Observations, Property and Adjoining Properties
		Placentia have expanded, and La Jolla is now depicted to the east. The Santa Fe railroad is present to the north. More buildings are present along Orangethorpe Avenue.
1942	1:24,000	The Property is depicted as an orchard. The region surrounding the subject property is depicted as agricultural orchards and scattered small buildings.
1949, 1950	1:24,000	No significant changes are apparent in the subject property as compared to the previous map. A wastewater disposal plant is depicted to the south of the subject property, and a flood control basin is depicted to the southeast. Anaheim appears to the southwest.
1964 & 1965	1:24,000	The Property has been developed with the existing multi-tenant commercial building. The KCC facility to the west is under construction. The surrounding area has become increasingly developed with large industrial-type buildings. New buildings are present to the east across South State College Avenue.
1972	1:24,000	The Property appears the same as the previous mapped year. General municipal and industrial/commercial expansion is evident in the surrounding area.
1981	1:24,000	The Property appears the same as the previous mapped year. General municipal and industrial/commercial expansion continues in the surrounding area.
2012	1:24,000	Other than roads, there are no individual structures or development features depicted on the map.

USGS via EDR, 2021

4.4.6 Other Historical Sources

The following report was reviewed during the preparation of this Phase I ESA.

Stantec Consulting Services Inc, 2019, Phase II Environmental Site Assessment, Kimberly-Clark Fullerton Mill, 2001 E. Orangethorpe Ave, Fullerton, California 92831, August 22.

Stantec conducted a Phase II ESA investigation at the KCC property that is adjacent to the west. The KCC property is currently a construction site but was historically a paper mill since the 1960s. The majority of the Phase II ESA that was conducted in 2019 focused on manufacturing related features in factory area, outbuildings, and various chemical storage areas that were located 300 feet more from the Property. However, part of the Phase II ESA performed for the KCC property assessed constituents of concern (pesticides, arsenic, and lead) related to historical agricultural use as an orchard. The same orchards observed at the KCC site were also observed in historical aerial photographs as being on the Property. Therefore, the pesticide, arsenic, and lead sampling that was performed on the KCC site are considered representative of the Property

since the same orchards occupied both properties. The sampling on the KCC site identified only trace concentrations of pesticides (i.e., slightly above laboratory reporting limits) at two locations, and non-detect concentrations (i.e., below laboratory reporting limits) at the remaining locations. Additionally, lead was not detected above health risk screening levels and arsenic concentrations were within the range considered to be naturally occurring in California. As a result, no further investigation is recommended regarding the former agricultural use of the Property.

5.0 PROPERTY RECONNAISSANCE

A visit to the Property and its vicinity was conducted by Mr. Dion Monge, Senior Scientist with Stantec, on May 14, May 18, and May 25, 2020. Access to the Property was coordinated with Ms. Amy Hung of Goodman. Stantec was unaccompanied during the Property reconnaissance. No access was provided to the 1223 South State College Blvd unit. Figure 2 provides information about the Property and adjoining properties. Photographs collected during the Property visit are included in Appendix A.

5.1 PROPERTY RECONNAISSANCE METHODOLOGY

The Property reconnaissance focused on observation of current conditions and observable indications of past uses and conditions that may indicate the presence of RECs. The Property reconnaissance was conducted on foot, and travel across portions of the Property were conducted in a vehicle.

Weather conditions during the visit to the Property were clear and sunny. There were no weather-related property access restrictions encountered during the reconnaissance visit.

5.2 GENERAL DESCRIPTION

Property and Area Description:	The Property consists of approximately 1.3 acres, including an approximately 24,600 square foot single-story industrial building and parking lot at 1223 S. State College Boulevard, in the City of Fullerton, Orange County, California. The building contains twelve (12) units addressed as 1201 through 1223 South State College Boulevard and occupied by various commercial businesses and hobby/recreation groups. A list of current tenants is provided in Section 2.1.
Property Operations.	The building contains twelve (12) units addressed as 1201 through 1223 South State College Boulevard and occupied by various commercial businesses and hobby/recreation groups. A list of current tenants is provided in Section 2.1.
Structures, Roads, Other Improvements:	The Property is developed with a single-story, L-shaped commercial/industrial surrounding by an asphalt lot used for parking. The building contains twelve (12) units addressed as 1201 through 1223 South State College Boulevard Significant observations for each building and exterior infrastructure are discussed in Sections 5.4 and 5.5, respectively.
Property Size (acres):	Approximately 1.3 acres.
Estimated % of Property Covered by Buildings and/or Pavement:	99%
Observed Current Property Use/Operations:	All of the units were occupied and generally consisted of one or two offices and a restroom near the entrance of the unit and a warehouse or work space in the remaining portion of the unit. No floor drains or

	other subsurface features were observed in any of the units. However, units 1219 and 1221 contained a significant amount of stored equipment that obstructed the surface of the floor in these areas. No access was provided to unit 1223.
Observed Evidence of Past Property Use(s):	Other than use for various commercial businesses based on the general building layout, no specific evidence of past use was observed.
Sewage Disposal Method (and age):	The Property is connected to the City sewer but the date of connection is unknown.
Potable Water Source:	The Property is connected to the municipal water supply.
Electric Utility:	The property is connected to the municipal electric company.

5.3 HAZARDOUS SUBSTANCES AND PETROLEUM PRODUCTS

The following table summarizes Stantec's observations during the Property reconnaissance.

Observations	Description/Location
Hazardous Substances and Petroleum Products as Defined by CERCLA 42 U.S.C. § 9601(14):	The storage of small quantities of petroleum hydrocarbons (motor oil and hydraulic oil) were observed in units 1211 and 1215, as discussed below. Small canisters of paint and adhesives were observed on shelves throughout the units used by hobbyists and MBS Custom Sofas in unit 1221.
Drums (≥ 5 gallons):	Waste oil was observed in the northwest corners of units 1211 and 1215, and in the northeast portion of unit 1223. The waste oil drums were limited to one 55-gallon drum or less at each location. The used oil generated by the hobby shop owners is a result of maintaining or upgrading antique vehicles and also by the concrete company for use in field equipment/machinery. One 5-gallon bucket of hydraulic oil was also observed in the northwest corner of the concrete company in unit 1215. No staining or signs of a release were observed in the oil storage areas. Given the low quantities of oil stored and no signs of leakage or staining, the low volume of oil storage is considered a de minimis condition.
Strong, Pungent, or Noxious Odors:	None observed.
Pools of Liquid:	None observed.
Unidentified Substance Containers:	None observed.
PCB-Containing Equipment:	Two sets of pole-mounted electrical transformers were observed in the northern boundary of the Property. No surface staining or evidence of a release was observed on the ground below the transformer units. The 5-gallon bucket of hydraulic oil observed in unit 1215 appeared to be new and in good condition.
Other Observed Evidence of Hazardous Substances or Petroleum Products:	None observed.

5.4 INTERIOR OBSERVATIONS

Observations	Description
Heating/Cooling Method:	Roof mounted heating, ventilation, and cooling systems (HVAC).
Surface Stains or Corrosion:	None observed.
Floor Drains and Sumps:	None observed.
Other Interior Observations:	Tenant units were used by hobbyists, batting cages, catering company/kitchen, and light commercial repair/manufacturing.

5.5 EXTERIOR OBSERVATIONS

Stantec made the following observations during the Property reconnaissance of exterior areas of the Property and/or identified the following information during the interview or records review portions of the assessment:

Observations	Description
On-Property Pits, Ponds, or Lagoons:	None observed.
Stained Soil or Pavement:	None observed.
Stressed Vegetation:	None observed.
Waste Streams and Waste Collection Areas:	Waste collection areas were limited the drum storage areas in units 1211 and 1215, as previously referenced in Section 5.3.
Solid Waste Disposal:	Solid waste dumpsters were observed in the northwest corner of the Property and were empty at the time of the Property reconnaissance.
Potential Areas of Fill Placement:	None observed.
Wastewater:	None observed.
Stormwater:	The Property is graded to direct stormwater into a drainage swale along the southern boundary of the parcel and then into storm drains along S. State College Blvd.
Wells:	None observed.
Septic Systems:	None observed.
Other Exterior Observations:	None observed.

5.6 UNDERGROUND STORAGE TANKS/STRUCTURES

Existing USTs:	No visible evidence (fill pipes, vent pipes, dispensers, surface patches), which would indicate the presence of USTs, was discovered during the property reconnaissance.
Former USTs:	No visible evidence (fill pipes, vent pipes, dispensers, surface patches), which would indicate the presence of former USTs, was discovered during the property reconnaissance.
Other Underground Structures:	None observed.

5.7 ABOVEGROUND STORAGE TANKS

Existing ASTs:	No existing ASTs were observed at the Property.
Former ASTs:	No visible evidence (fill pipes, vent pipes, dispensers, surface stains), reports, or other evidence of the former presence of ASTs was discovered during this Phase I ESA.

5.8 ADJOINING PROPERTIES

5.8.1 Current Uses of Adjoining Properties

As viewed from the Property and/or from public rights-of-way, Stantec made the following observations about use and activities on adjoining properties:

NORTH	Construction site – formerly orange grove.
SOUTH	Bench2Bench Technologies (formerly Winonics circuit board manufacturer). Bench2Bench Technologies produces ultra high density interconnect flexible circuits. This facility is also discussed in Section 4.2.2. Hazardous materials storage was observable at the west end of the building. The storage areas were gated and labeled (from north to south) "acid", "chemical storage", and "caustic".
EAST	State College Boulevard followed by Benner Metals
WEST	Construction site – former Kimberly Clark Corporation semi-trailer parking lot.

Refer to Figure 2.

5.8.2 Observed Evidence of Past Uses of Adjoining Properties

Observations of adjoining properties, made from outside the properties, providing indications of past use and activities, if any, are described below.

NORTH	None observed.
SOUTH	None observed.
EAST	None observed.
WEST	None observed.

5.8.3 Pits, Ponds or Lagoons on Adjoining Properties

As viewed from the Property and/or from public rights-of-way, Stantec made the following observations about the presence of pits, ponds and lagoons on adjoining properties:

NORTH	None observed.
SOUTH	None observed.
EAST	None observed.
WEST	None observed.

5.9 OBSERVED PHYSICAL SETTING

Topography of the Property and Surrounding Area:	The Property has a slight slope to the west at elevations ranging from approximately 189 feet above mean sea level (amsl) in the east, to approximately 187 feet amsl in the west

6.0 INTERVIEWS

The tenants of the units 1201 through 1221 were briefly interviewed regarding their use of these units. All of the tenants indicated that they knew of no environmental issues in connection with the Property and were unaware of any floor drains, clarifiers, sumps, or other subsurface structures in their unit. Mr. Jim Thompson of unit 1211 and Mr. Keith Denato of ConcreteWorks (unit 1215) indicated that aside from the drum storage areas discussed previously in Section 5.3, no other chemical storage areas were present. They indicated that petroleum storage is very minimal and no spills or releases have occurred.

7.0 DATA GAPS

The federal AAI rule [40 CFR 312.10(a)] and ASTM E1527-13 identify a "data gap" as the lack or inability to obtain information required by the standards and practices of the rule despite good faith efforts by the Environmental Professional or the User.

Any data gaps resulting from the Phase I ESA described in this report are listed and discussed below.

Gap	Discussion
Deletions or Exceptions from Scope of Work Referenced in Section 1.4:	None
Weather-Related Restrictions to Property Reconnaissance:	None
Facility Access Restrictions to Property Reconnaissance:	The floor space in certain units was covered by stored equipment, painted epoxy sealed floors, carpet, or rubber matting. Based on information provided in the EDR report, combined with Stantec's research, it is unlikely that this data gap would change the conclusions of this report.
Other Property Reconnaissance Restrictions:	None
Data Gaps from Environmental Records Review:	Due to the timing of this report, a limited review of files held by the Fullerton Building Division was performed. The review was limited to those files made available electronically. Additionally, no response regarding records requests has been received from the Orange County Health Care Agency or the Fullerton Fire Department. Based on information provided in the EDR report, combined with Stantec's research, it is unlikely that this data gap would change the conclusions of this report.
Data Gaps from Historical Records Review:	None
Data Gaps from Interviews:	None
Other Data Gaps:	None

8.0 CONCLUSIONS

A Phase I ESA was performed in conformance with the scope and limitations of ASTM Practice E1527-13 of 2001 East Orangethorpe Avenue, City of Fullerton, County of Orange, California. Any exceptions to, or deletions from, this practice are described in the Data Gaps section of this report. This assessment has revealed the following evidence of recognized environmental conditions (RECs) in connection with the Property:

- **Groundwater Plume.** The Property is located within the boundaries of the Orange County North Basin National Priorities List Superfund Site. Groundwater beneath the Property is believed to be impacted by volatile organic compounds (VOCs) related to the regional plume. The Property is located in the Fullerton Sub-Area of the Orange County North Basin. Nine potentially responsible party (PRP) sites have been identified in this sub-area which is located northwest of the Kimberly Avenue and S. State College Boulevard intersection, or along the southside of Orangethorpe Avenue. The groundwater impacts are the result of spills and leaks from historical industrial activities in the region. The documented VOC regional groundwater impacts from off-Property sources constitute a potential vapor encroachment condition (pVEC) to the Property.

  Recommendation: Soil vapor sampling is recommended to evaluate whether VOCs in soil vapor emanating from the regional plume may be present above commercial use thresholds that would require further assessment and/or mitigation.

- **Past Commercial Uses.** Historical city directories indicate multiple commercial businesses have operated in the units at the Property dating back to the 1960s. These commercial businesses included a molding company, sheet metal company, tool and fastener businesses, a printing/graphics shop, a laboratory, machine shop, and landscaping. No specific information is available on these sites and there was no evidence of floor drains, patchwork, clarifiers, or chemical storage tanks noted during the Property visit.

  Recommendation: Given that various commercial businesses have occupied the Property since the early 1960s, soil vapor sampling is recommended to evaluate whether releases occurred at the property that may result in increased liability related to the ongoing Superfund action and whether any release may have occurred from these past uses that would require further action or mitigation.

Stantec identified the following de minimis conditions at the Property:

- Waste oil was observed in the northwest corners of units 1211 and 1215 and was limited to one 55-gallon drum or less. No staining or signs of a release were observed in the oil storage areas of the hobby shop or concrete company. Given the limited quantities of oil and the absence of evidence of leakage or staining, the low volume of oil storage is considered a de minimis condition.

Recommendation: No further investigations are recommended.

In addition, Stantec has identified the following non-ASTM environmental issues associated with the Property:

- **Asbestos Containing Materials and Lead-Based Paint.** During the Property reconnaissance a pre-demolition survey was being performed by Pacific Environmental. It is recommended that the conclusions and recommendations presented be complied with prior to demolition or renovation of the Property structure.

- **Universal Wastes -** Fluorescent light ballasts, mercury switches and other common building components were observed in buildings and may contain hazardous materials. These should be properly handled and disposed of in accordance with regulatory guidelines prior to demolition.

9.0 NON-SCOPE CONSIDERATIONS

No ASTM E1527-13 non-scope services were performed as part of this Phase I ESA with the following exceptions:

9.1 LEAD-BASED PAINT

Given the age of the existing buildings on-Property (constructed in the early 1960s), the presence of lead-based paint (LBP) is considered likely. During the Property reconnaissance a pre-demolition survey was being performed by Pacific Environmental. It is recommended that the conclusions and recommendations presented be complied with prior to demolition or renovation of the Property structure.

9.2 ASBESTOS

Asbestos can be found in many applications, including sprayed-on or blanket-type insulation, pipe wraps, mastics, floor and ceiling tiles, wallboard, mortar, roofing materials, and a variety of other materials commonly used in construction. The greatest asbestos-related human health risks are associated with friable asbestos, which is ACM that can be reduced to powder by hand pressure. Friable asbestos can become airborne and be inhaled and has been associated with specific types of respiratory disease. The manufacturing and use of asbestos in most building products was curtailed during the late 1970s.

Given the age of the existing buildings on the Property (constructed in the early 1960s), the presence of ACM is considered likely. During the Property reconnaissance a pre-demolition survey was being performed by Pacific Environmental. It is recommended that the conclusions and recommendations presented be complied with prior to demolition or renovation of the Property structure, including any recommendations related to stress-absorbing fabrics (Petromat) below or within the asphalt parking lot.

Additionally, Stantec makes no warranty as to the possible existence or absence of inaccessible materials (buried transite piping) or to their evaluation with respect to asbestos content. Samples of suspect ACM should be collected for laboratory analysis of asbestos prior to any renovation or building demolition, in order to determine the need for compliance with EPA National Emission Standard for Hazardous Air Pollutants (NESHAP) regulations.

9.3 RADON

Radon is a colorless, tasteless radioactive gas with an EPA-specified action level of 4.0 PicoCuries per liter of air (pCi/L) for residential properties. Radon gas has a very short half-life of 3.8 days. The health risk potential of radon is primarily associated with its rate of accumulation within confined areas near or in the ground, such as basements, where vapors can readily transfer to indoor air from the ground through foundation cracks or other pathways. Large, adequately ventilated

rooms generally present limited risk for radon exposure. The radon concentrations in buildings and homes depend on many factors, including soil types, temperature, barometric pressure, and building construction (EPA, 1993).

Stantec reviewed regional data published by the EPA on average indoor radon concentrations in the vicinity of the Property (http://www.epa.gov/radon/zonemap.html).

Zip Code 92831	Orange County
EPA Radon Zones (w/Average Measured Indoor Radon concentrations)	
92% < 4 pCi/L	Zone 3 – low (<2 pCi/L); average first floor concentration 0.763 pCi/L
Normally-occupied sub grade areas (i.e. basement apartments, offices, stores, etc.)?	
No subgrade areas are present at the Property.	

The Property is located in Zone 3 and is considered to have low potential for radon. Stantec concludes that radon is unlikely to represent an environmental concern to the Property and recommends no further investigation regarding this issue.

9.4 FLOOD ZONES

According to the Physical Setting summary portion of the EDR report, the Property is located within a 500-year flood plain.

Appendix B STANTEC RESUMES

Dion Monge

Project Scientist

Dion has extensive knowledge of underground storage tank investigations, Phase I and II environmental site assessment, groundwater monitoring and reporting, soil, soil vapor, and groundwater quality assessments, and testing for asbestos and lead based paint. His project experience is extensive and wide ranging and includes many types of soil, soil vapor, and groundwater assessment and monitoring for planned, existing, and former sites. Dion also has experience in testing fill soils placed on grading sites.

He has experience on redevelopment of former oil field sites that include submittal of construction site review plans, oil well mitigation (venting and casing alterations), abandonment of oil wells, and remedial investigations and remediation involving soil contamination.

Dion also has experience working with 1166 AQMD air monitoring on projects ranging from limited access dry cleaner excavations, solvent excavations, and petroleum excavations related to underground storage tank releases. Included in this type of monitoring is the assessment of a safe work environment for the contractors involved with this type of work.

He has considerable knowledge in asbestos and lead based paint sampling as a building inspector and lead sampling technician. Asbestos and lead based paint surveys have ranged from large office buildings to sampling highway bridges.

EDUCATION

BS, Soil Science, California Polytechnic University, Pomona, Pomona, California, 2004

Health & Safety Certification (29 CFR 1910.120),, 40-Hour OSHA Health & Safety Certification, Redlands, California, 2005

Health & Safety Annual Update Certification, 8-Hour OSHA, Redlands, California, 2009

First Aid/CPR, American Red Cross, Redlands, California, 2009

Certified Building Inspector, AHERA 8-Hour Refresher, Redlands, California, 2009

PROJECT EXPERIENCE

Asbestos, Lead Based Paint, and Hazardous Material Management

Haller Wash Bridge No. 54-0891R&L, San Bernardino County, California (Asbestos and Lead-Based Paint Sampling Assistant)

Dion conducted asbestos and lead based paint survey on highway bridge. He assisted with planning field operations, measuring bridge dimensions, and collecting samples. Tasks included sample collection, bridge measurements, and documentation.

Project Management Oversight

Magnolia Plaza, Fountain Valley, California

Dion is providing project management of soil, soil vapor, and quarterly groundwater sampling related to a solvent release at a former dry cleaning facility. Tasks include preparation of work plans for approval by the Regional Water Quality Control Board and oversight of field sampling, including lithologic logging, for soil and soil vapor investigations performed within a multi-tenant strip center. Additional tasks include preparation of investigative reports and quarterly groundwater monitoring reports. The site remains an open case and preparation of a work plan to use electrical resistive heating ("ERH") will be prepared in the coming weeks.

Dion Monge

Project Scientist

Former Superb Dry Cleaners, Anaheim, California
Dion performed field oversight, direction, and confirmation soil sampling of a limited access excavation within a former dry cleaner unit. Post excavation field activities included application of a barrier type floor sealant along with post excavation indoor air sampling. Remedial work led to regulatory closure being granted from the local agency.

Site Assessment

I-15/I-215 Interchange Improvements, San Bernardino County, California (Sampling Technician)
Dion helped conduct site investigations and surveys for potentially hazardous materials. His efforts supported Caltrans' plans to improve and widen the existing freeway lanes, entrance and exit ramps, and vehicle and railroad bridges along a 6-mile stretch of the I-15 and I-215 freeways in the Devore area of San Bernardino County. Dion's efforts included Environmental Evaluation of Recognized Environmental Concerns identified in ISAs

Highway 138 Environmental Investigations, San Bernardino County, California (Field Assessment and Reporting)
Dion helped complete hazardous material site investigations on five bridges along State Highway 138 along a 20-mile segment through portions of Los Angeles and San Bernardino Counties, California. The investigation was conducted in accordance with Caltrans protocols and was compliant with EPA's all appropriate inquiries guidance and ASTM Standard Practice E1527. He performed site reconnaissance, conducted regulatory and agency field reviews, and reviewed environmental databases and historical fire insurance, telephone directories, aerial photographs, topographic maps, and other environmental records for properties within one half mile of the proposed 20-mile segment of Highway 138. Dion compiled an report summarizing findings and identifying recognized environmental conditions.

Proposed Friends Christian High School, Yorba Linda, California
Dion prepared preliminary site assessment (PSA) report for future private school site to identify recognized environmental conditions ("RECs") related to past property usage as an oil field with 21 oil wells abandoned prior to 1990. Completion of the PSA led to his management of the project through site closure. Field investigations and reporting by Dion included Phase II investigations, methane survey, oil well leak testing and venting, backfill and compaction (including soils testing), DOGGR Construction Site Review, and excavation and onsite management of more than 5,000 cubic yards of petroleum impacted soils.

SR-58 Widening, San Bernardino County, California
Dion performed Initial Site Assessment (ISA) for Caltran at Kramer Junction for the proposed widening of State Route 58. The ISA was performed in accordance with guidelines promulgated by the American Society for Testing and Materials (ASTM) and included historical research and coordination of permit/file reviews with local building/planning departments and environmental agencies. Dion's role included the field visit, observation documentation, agency reviews, and reporting.

Soil Sampling

Caltrans I-15, Task Order 28, Hesperia, California
Dion conducted a soil investigation for metals analysis alongside I-15 for disposal recommendations during construction of mortar-lined channels at several locations. He assisted with planning field operations and collected soil samples. Tasks included sample collection, preservation, and documentation.

** denotes projects completed with other firms*

Brian Viggiano PG

Senior Geologist

Brian is a California Professional Geologist with approximately ten years of professional experience in environmental and geotechnical fields. He has performed and managed numerous Environmental Site Assessments (ESAs) for real estate transfers, bank loans, and redevelopment projects. Related sites have included former and active retail petroleum stations, former oil fields, dry cleaners, agricultural sites, plating facilities, landfills, chemical plants and other industrial facilities. He has also performed site assessment, investigation, characterization, and remedy of soil and groundwater contamination utilizing established and innovative technologies including single and multi-phase extraction, in-situ chemical oxidation, pump and treat, electrical resistance heating, and chemical fixation. Brian has also performed geotechnical investigations at proposed school developments and for academic purposes. Projects have included evaluation of active and potentially active faults, seismic evaluations, geophysical surveys, and evaluation of remotely sensed data. His versatility and range of environmental and geotechnical skills have been utilized in all stages of investigation including planning, implementation, site reconnaissance, mapping, surveys, and site inspections during construction, assessment or cleanup to final drafting, illustration, and report preparation.

EDUCATION

BS, Geology, University of California, Los Angeles, Los Angeles, California, 2000

Geology, Graduate Studies, University of California, Los Angeles, Los Angeles, California, 2002

40-Hour HAZWOPER Training, OSHA, Los Angeles, California, 2001

8-Hour Annual Update Certification, OSHA, Los Angeles, California, 2011

REGISTRATIONS

Professional Geologist #8386, State of California

MEMBERSHIPS

Member, Geological Society of America

PROJECT EXPERIENCE

Environmental Site Remediation

Chemical Plant Decommissioning and Remediation, Vernon, California (Field Geologist/ Site Superintendent)

Brian worked as the Field Geologist/ Site Superintendent during assessment, below grade demolition and remediation of an historical Chemical plant located in the City of Vernon, California. Assessment activities consisted of evaluating historical process areas, below grade structures and settling ponds impacted by high levels of pesticides, heavy metals and radionuclides (Thorium-232 and Uranium-238). Remediation activities consisted of excavation and off-site disposal of radiological and chemically impacted waste, corrective grading and capping of residual wastes. The Project value was $8,000,000.00.

Former Open Dump Site, Hopi and Navajo Tribal Lands, Arizona (Field Geologist)

Brian worked as the field geologist at a former open dump site located on Hopi and Navajo Tribal lands. The open dump was reported to have been the source of elevated concentrations of uranium and other radionuclides in groundwater at the site and vicinity. Brian conducted a collaborative multi-week field study with the U.S. Geological Survey (USGS) to assess site geological relationships, potential groundwater flow paths and plume limits, and potential for spring and drinking water resources to be impacted by leachate from the site. Field work included rock coring, installation of groundwater monitor wells, field mapping, and stratigraphic analysis. Subsequent data analysis included review of comprehensive legacy data, evaluation of landfill leachate tracers (e.g., tritium) and whole rock and leachability data. The investigation is ongoing and is being conducted collaboratively with the USGS,

** denotes projects completed with other firms*

Department of Interior, and Environmental Protection Agency.

Garden Grove Redevelopment Project, Garden Grove, California (Project Geologist)
Brian implemented remedial investigation of petroleum-impacted soil and groundwater. His investigation consisted of soil sampling, installation, and subsequent development and sampling of groundwater monitoring wells. He worked with others to design and implement a complex dual-phase extraction system that included the installation of 45 extraction wells and two soil vapor extraction systems. He completed work under the oversight of the State of California.

Chlorinated Solvent Remediation, El Centro, California (Project Geologist)
Brian performed site remedial investigation and clean up of chlorinated solvent-impacted soil and groundwater. He designed and implemented feasibility tests which included in-situ chemical oxidation using potassium permanganate and hi-vacuum dual phase extraction. He also designed and implemented final remediation approach using six-phase electrical resistance heating. The project value was $1,000,000.

Mixed-Use
Compton Redevelopment Project, Compton, California (Project Geologist)
Brian performed site remedial investigation and cleanup of soil chemically impacted with petroleum, PCBs, chlorinated solvents, and heavy metals including hazardous waste concentrations of lead and groundwater impacted with chlorinated solvents. Mitigation of impacted soil included appropriate remedial excavations and corrective grading plans. Groundwater remedy included SVE with air sparging and in-situ chemical oxidation using potassium permanganate. All work was completed under State of California oversight. The project value was $2,800,000.

Multi-Unit / Family Residential
Claremont Residential Development, Claremont, California (Project Geologist)
Brian performed a remedial investigation that identified the presence of approximately 9,000 cubic yards of lead impacted fill materials. He designed and implemented corrective grading plan that included the generation a of numerous small stockpiles of soil that were statistically characterized and either reused on site or disposed of off site. Site mitigation was conducted under the oversight of the Los Angeles County Fire Department. The innovative grading approach resulted in client cost savings of $500,000.

Residential Redevelopment Project, Torrance, California (Project Geologist)
Brian oversaw remediation of petroleum and solvent contamination that resulted from historical oil field activities overprinted by contamination from a more recent release from a dry cleaning facility. The site was mitigated to residential standards under State of California oversight. Remedial actions included re-abandonment of an onsite oil well and removal of the historical pipeline infrastructure, excavation and onsite bioremediation of petroleum impacted soil, and soil vapor extraction to reduce solvent impact in the vicinity of the former dry cleaners. In addition, at all locations where solvent-impacted soil was recalcitrant to vapor extraction, due to the presence of heavy petroleum, a large diameter flight auger was used to drill out residual contamination. The project value was $750,000.

Kyle D. Emerson PG, CEG

Managing Principal Geologist

Kyle has more than 28 years of professional experience—17 of those years with Stantec—providing geotechnical and environmental consulting. During the course of his experience, he has been involved with a wide variety of geological and engineering projects. He has been in direct charge of quality control/quality assurance (QA/QC) work for Stantec and previous firms for geological, engineering geological, and environmental services primarily in California. Additionally, Kyle has been a primary contact for Stantec with many different clients (including multi-party actions) and regulatory bodies involving contracting, workplan approvals, site assessments and closures, permitting, remedial action, and litigation support. With regard to litigation services, Kyle has extensive experience providing expert witness testimony, second-party review, and litigation support and analysis.

Kyle's extensive experience includes assessment and remediation of property-specific and regional issues involving soil and groundwater contaminated with petroleum hydrocarbons, chlorinated solvents, heavy metals, pesticides, and PCBs.

He currently serves as the managing principal geologist in Stantec's Redlands, California office.

EDUCATION

Engineering Geology/Hydrogeology, California State University, Los Angeles, California, 1984

AS, General Science, Crafton Hills College, Yucaipa, California, 1975

BS, Geological Sciences, California State University, Long Beach, California, 1982

REGISTRATIONS

Certified Engineering Geologist #1271, State of California

Professional Geologist #4066, State of California

PROJECT EXPERIENCE

Bioremediation

Excavation and Treatment of Petroleum-Contaminated Soil

Kyle designed the excavation and treatment of 45,000 cubic yards of petroleum-contaminated soil. Soil treatment included utilizing vapor extraction, combined with bioremediation.

Chemicals & Polymers

Two Former Chemical Plants, Environmental Site Assessments and Remediation, Vernon, California

Mr. Emerson was part of the team for conducting Phase I and Phase II Environmental Site Assessments (ESA) and developing remedial action plans for two former chemical plant sites with 80-year industrial histories. Phase I ESAs used historical files, maps, aerial photographs, available documents, and data from public agencies and historical directories for identifying recognized environmental concerns. Extensive Phase II ESA survey activities aided in identifying below-grade structures such as vaults/USTs, as well as assessing the extent of influence and nature of the contamination. These investigations confirmed the presence of heavy metals, petroleum hydrocarbons, volatile organic compounds, polychlorinated biphenyls, radioactive materials, semi-volatile organic compounds, and polycyclic aromatic compounds in the soils for these sites. Specific areas of concern included former settling ponds, a bone yard, maintenance areas, transformer and substations, wastewater treatment facilities, and above-ground storage tank farms. A conceptual mode was developedl for use in a health risk assessment and developed risk-based corrective actions to address potential health and environmental concerns. He assisted with the development and implementation of a remedial action plan, combined administrative controls, engineering controls, and active remediation; this resulted in the cost-effective return of one site to active use, and is reducing health risks to occupants and the public at the second site.

Kyle D. Emerson PG, CEG

Managing Principal Geologist

CONFIDENTIAL: Aerospace Adhesives and Coatings Plant, Glendale, California

Mr. Emerson was part of the team that conducted feasibility studies to evaluate remedial alternatives for remediation of chlorinated VOCs, 1,4 dioxane, and hexavalent chromium (CrVI) in soil, soil vapor, and groundwater. Feasibility studies included groundwater pump testing, benchscale column testing to evaluate in situ alternatives for reducing CrVI to the less mobile CrIII valence state, soil vapor extraction, capping, and excavation. Field pilot studies were performed to evaluate the efficiency of various CrVI reductants including the use of ferrous sulfate, calcium polysulfide, emulsified oil, and fructose. Extensive multi-depth soil vapor testing was conducted to evaluate the distribution of VOCs in the subsurface and to support vapor intrusion risk assessment. Feasibility studies were completed in 2008. Remedial actions are expected to be completed in 2011.

Condition Assessments

Assessment and Mitigation of Manufacturing Facility

Kyle managed the assessment and mitigation of an ammunition manufacturing facility covering 1,100 acres in a complex geologic environment. The contaminates involved red and white phosphorous, TNT, chlorinated solvents, solid wastes, and live ordinance.

Soil Contamination Assessment Supervision and Management

Kyle managed and supervised soil contamination assessment and in-situ remediation of heavy metals involving chromium, cadmium, nickel and zinc by chemical fixation to depths in excess of 40 feet below ground surface beneath existing structures within several manufacturing facilities.

Litigation Support and Expert Testimony

Kyle provided litigation support and expert testimony on more than 20 separate projects involving service stations, chlorinated solvent cases, heavy metal, and semi-volatile releases.

Corporate / Office

CT Realty Environmental Remediation of Former Dry Cleaners, El Centro, California

Mr. Emerson was responsible for assessments and remediation at this former dry cleaners which released the dry cleaning chemical tetrachloroethene (PCE) to the ground and underlying groundwater. The work included initial site assessment, agency interaction and negotiations with the California Regional Water Quality Control Board (CRWQCB), and Colorado Basin Region human health risk assessment (HHRA), design and implementation of remedial investigations, feasibility studies, remedial action plans, and implementation of remediation in mitigating chlorinated solvent contamination in vadose and saturated zones at concentrations indicative of DNAPL. The results of the completed remediation, as well as continued confirmation sampling and monitoring, allowed the CRWQCB to issue site closure in 2008. The site has since been redeveloped into a new commercial development.

Environmental Assessments

Siting Studies

Kyle performed initial siting studies for potential Class I, II, and III landfills. The project included detailed geologic mapping, hydrogeological studies, and permeability studies of caps and liners.

Environmental Site Remediation

Assessment and Remedial Design, California (Project Supervisor)

Kyle supervised the assessment and remedial design of a system to eliminate salt brine contamination in shallow perched water horizons in the Yucaipa, San Bernardino, and Riverside areas of southern California.

Design and Installation of Recovery Systems*

Kyle designed and installed numerous free-product recovery systems that successfully recovered product. One of the sites contained product up to 11-feet thick covering more than three city blocks. The dissolved phase had affected a multi-aquifer system and a public drinking water system.

Geophysical Characterizations*

Kyle performed and supervised numerous geophysical characterizations to determine the extent of old landfills. He provided classification studies, landfill gas monitoring, removal verification during grading, methane collection and mitigation plans, permitting, and closure plans.

** denotes projects completed with other firms*

Kyle D. Emerson PG, CEG

Managing Principal Geologist

Domestic Landfill Development*

Kyle designed and supervised the dynamic consolidation of a domestic landfill for development. He used this process to minimize expected settlement to overlying structures. Kyle designed commercial developments on closed landfills that involved complex methane collection and monitoring systems and building settlement controls.

Clay Borrow Site Studies

Kyle performed more than 10 separate clay borrow site studies for determining sources of material to cap landfills; ranged from a 20-acre dry lakebed to a 450-acre parcel in complex folded marine sediments.

Assessment, Clean Up, and Regulatory Support Management, Santa, Monica (Project Manager)

Kyle managed the assessment, clean up, and complex regulatory support of a PRP site in an MTBE case (Charnock subbasin). His work involved more than 20 environmental professionals working full time for two years to complete the assessment and clean up mandated by the regulatory agencies.

Hazardous Waste

San Gabriel Valley Superfund Site, Remediation & Closure of Multiple Source Areas, Industry, California

Mr. Emerson performed feasibility studies to evaluate appropriate and relevant remedial alternatives to mitigate constituents of concern in five AOCs contaminated with chlorinated hydrocarbons, heavy metals, petroleum fuel, and cutting oils. Ultimately, a combination of remedial alternatives was implemented that included large-diameter auger excavation to 45 feet to minimize impacts on facility operations, vapor extraction, vapor intrusion risk assessment, deed restriction, and monitored natural attenuation. At the completion of remedial actions, confirmation soil, soil vapor, and groundwater sampling were conducted and followed with risk assessment to demonstrate that remedial objectives had been achieved. No further action was recently granted by the US EPA and Los Angeles Regional Water Quality Control Board.

Mixed-Use

Port of San Diego Rohr Facility, Chula Vista, California

Mr. Enerson assisted in a detailed subsurface assessment of the Rohr facility. The intent of the assessment was to evaluate the 40-acre former aircraft part manufacturing facility for acquisition by the Port of San Diego for redevelopment into a business park and entertainment complex. The assessment identified the presence of soil, soil vapor, and groundwater impacts by petroleum hydrocarbons, VOCs, heavy metals, PCBs, and semi-volatile organic compounds. He utilized many sampling techniques to assess the limits and concentrations of contaminants in the subsurface. Ultimately, the team was able to develop a cost estimate for potential remedial action cost associated to corrective action to allow redevelopment.

Master Planned Commercial/Residential Redevelopment Project, Whittier, California (Project Manager)

Kyle oversaw the assessment of 26 contiguous properties that are part of a 21-acre master planned commercial/residential redevelopment project. The properties included industrial facilities, platting lines, fuel USTs, and metal processing plants, among others. The estimated cleanup costs are approximately $2 million.

Multi-Unit / Family Residential

Residential Development Assessment, Ventura, California (Project Director)

Kyle directed an assessment of a 40-acre former agricultural property proposed for residential development. Pesticides were identified above hazardous waste levels and preliminary remediation goals established by the U.S. Environmental Protection Agency. Through corrective grading methods and onsite placement of the pesticide impacted soils, all material were re-used on site without offsite disposal. The over all cost savings for the client was more than $1 million. Total cost was less than $250,000 for all necessary activities.

Oil & Gas

Oil Field Site Assessments*

Kyle performed site assessments at oil field leases involving refineries, bulk storage areas, piping systems and wellhead, and drilling mud pit contamination.

** denotes projects completed with other firms*

Kyle D. Emerson PG, CEG

Managing Principal Geologist

Environmental Protection Agency Superfund Action, Culver City, California (Project Manager)
Kyle served as the project manager representing a major oil company in the assessment, remedial action, and litigation support in a multi-party contamination case affecting a City water supply. The assessment involved more than 250 continuous core borings up to 100 feet, as well as extensive remedial actions. The total cost for all related activities was $22 million. The case is settled and the closure of the site is pending.

Project Management
Liability and Property Management Consulting Services
Kyle is providing liability and property management consulting services to more than 10 medium to large property development firms in the US. His work involves property transaction assessments, contract review, acquisition guideline development, liability management evaluation, insurance acquisition, and strategic planning.

Residential Development
Environmental Development Management and Review (Project Manager)
Kyle manages and reviews environmental development issues for a large residential developer specializing in development of contaminated industrial properties by providing innovative solutions in developing contaminated properties for residential use through risk assessment, engineering, and administrative and property development controls.

Site Management and Remediation
Design and Implementation of Biodegradation Programs*, California
Kyle designed and implemented one of the first in-situ biodegradation programs in California; it involved 50,000 cubic yards of diesel-contaminated soils, and groundwater to depths of 70 feet below ground surface.

Soil and Groundwater Remediation Systems
Soil and Groundwater Contamination Assessments and Mitigation*, California (Project Manger)
Kyle managed numerous chlorinated solvent soil and groundwater contamination assessments and mitigation programs in southern California. The projects involved releases that impacted soil and groundwater to depth of groundwater more than 700 feet in multi-aquifer systems. One case involved with plume dimensions more than 1 mile from the source affecting residential properties.

Soil and Groundwater Assessment and Remediation Programs*
Implemented hundreds of soil and groundwater assessment and remediation programs at various service station facilities in Southern and Northern California, and Nevada. Work involved assessment, remedial design, installation, maintenance and monitoring. Closure has been received on a majority of these sites.

Assessment and Remediation Management*
Kyle managed the assessment and remediation of soil and groundwater manufacturing at dry cleaning facilities contaminated with chlorinated solvents.

Warehouse / Light Industrial
Glendale Redevelopment Project, Glendale, California (Project Manager)
Kyle managed the assessment and remedial actions during the redevelopment of and industrial property. The project involved the demolition of a historic manufacturing facility and a commercial dry cleaner. Each of these facilities were associated with releases of solvents and petroleum hydrocarbons. Remedial actions involved excavation by pattern drilling and off site disposal along with removal of former USTs. The total cost of remediation and assessment was $450,000.00.

** denotes projects completed with other firms*

Kyle D. Emerson PG, CEG

Managing Principal Geologist

Compton Redevelopment Project, Compton, California (Project Manager)

Kyle is serving as project manager for the assessment and remedial actions for a large redevelopment project. The project involves the redevelopment of a historic manufacturing facility and a former dry cleaner. Each of these facilities were associated with releases of solvents and petroleum hydrocarbons. The industrial facility was also associated with significant volumes of buried waste that required removal and disposal. These wastes also included the chemical referenced above, as well as PCBs and heavy metals. Remediation has included excavation, vapor extraction, and chemical fixation. The total cost of this project has been $2.8 million to date.

** denotes projects completed with other firms*

Kyle D. Emerson PG, CEG

Managing Principal Geologist

Appendix C USER PROVIDED RECORDS

Stantec

PHASE I ESA USER'S QUESTIONNAIRE

In order to qualify for protection from land owner liability under CERCLA as an *innocent landowner, bona fide prospective purchaser,* or *contiguous property owner*, ASTM standard practice E1527-13 and the federal AAI rule (40 CFR 312) require that the User of the Phase I ESA report provide certain information (if available) to the Environmental Professional completing the assessment. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete. Information that is not or cannot be provided to the Environmental Professional may be identified as a "data gap" in the Phase I ESA report.

Please answer the following questions as completely as possible. Attach additional pages as needed. Return the completed questionnaire to Stantec along with the executed Authorization For services form.

1. Property Information

Property Name: GLC Fullerton LLC_____

Property Address(es): 1223 State College_____

City: Fullerton_____State CA__Zip 92831_____

Property Owner Name: State College, LLC_____

Property Owner Phone #: Unknown _____

2. Contact For Site Access

Name: Keith Greer_____

Company/Organization/Title: CBRE_____

Phone # 714-371-9192_____ E-Mail Address: keith.greer@CBRE.com_____

3. Environmental Cleanup Liens. Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?

_____ Yes ____X_____ No

If yes, describe or attach details of the lien _____

_____

4. Activity and Land Use Limitations. Are you aware of any activity and use limitations, such as engineering controls, land use restrictions, or institutional controls that are in place at the property and/or have been filed or recorded as applicable to the property as a result of environmental contamination, investigation, cleanup, or related matters?

_____ Yes _____X_____ No

If yes, describe or attach details of the limitations _____

_____

5. Specialized Knowledge or Experience. As the User of this ESA, do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property, such that you would have specialized knowledge about chemicals and processes used by this type of business?

_____X_____ Yes _____ No

If yes, describe or attach details of your specialized knowledge or experience _____
We are developing the property to the north and west of the site

6. Relationship of Purchase Price to Fair Market Value of Property. Does the purchase price being paid for the property reasonably reflect the fair market value?

X_____Yes _____No

_____Not applicable. User is not involved in a purchase of the property.

If you conclude that there is a difference, do you have any reason to believe that the reduced purchase price may be related to contamination known or believed to be present at the property?

_____Yes, I have reason to believe that the purchase price for the property has been reduced in comparison with the fair market value due to contamination known or believed to be present at the property.

_____No, I have no reason to believe that the purchase price for the property has been reduced in comparison with the fair market value due to contamination known or believed to be present at the property.

7. Commonly Known or Reasonably Ascertainable Information. Are you aware of commonly known or reasonably ascertainable information about the property that would help the Environmental Professional to identify conditions indicative of releases or threatened releases of hazardous substances or petroleum products? For example:

Do you know the past uses of the property?
_____Yes (describe) _____
_____
_____
X_____No

Do you know of chemicals, hazardous substances or petroleum products that are present or once were present at the property?
_____Yes (describe) _____
_____
_____
X_____No

Do you know of spills or other releases of chemicals, hazardous substances or petroleum products that have taken place at the property?

_____Yes (describe) _____

_____

_____

X_____No

Do you know of any environmental cleanups that have taken place at the property?

_____Yes (describe) _____

_____

_____

X_____No

8. The Degree of Obviousness of Contamination. E1527-13 and the federal AAI rule (40 CFR 312.31) require that the Phase I ESA consider the degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation. Based on your knowledge and experience related to the property, are there any *obvious* indictors that point to the presence or likely presence of contamination at the property?

_____Yes (describe) _____

_____

_____

X_____No

9. Availability of Previous Environmental Reports. Are you aware of previous environmental site assessment reports, other environmental reports, documents, correspondence, etc. concerning the property and its environmental condition?

_____Yes (describe) _____

_____

_____

X_____No

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS list

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 12/30/2020 has revealed that there are 7 SEMS sites within approximately 0.5 miles of the target property.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly

known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 12/30/2020 has revealed that there are 4 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 12/14/2020 has revealed that there are 2 CORRACTS sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 12/14/2020 has revealed that there is 1 RCRA-TSDF site within approximately 0.5 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
TRENT TUBE DIV FULLE EPA ID:: CAD008325110	***2100 E ORANGETHORPE***	***WSW 1/8 - 1/4 (0.189 mi.)***	***I60***	***387***

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/14/2020 has revealed that there are 3 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/14/2020 has revealed that there are 10 RCRA-SQG sites within approximately 0.25 miles of the target property.

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 01/25/2021 has revealed that there are 45 CA ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal landfill and/or solid waste disposal site lists

CA SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the CA SWF/LF list, as provided by EDR, has revealed that there is 1 CA SWF/LF site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

State and tribal leaking storage tank lists

CA LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CA LUST list, as provided by EDR, has revealed that there are 35 CA LUST sites within approximately 0.5 miles of the target property.

CA CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CA CPS-SLIC list, as provided by EDR, has revealed that there are 13 CA CPS-SLIC sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/14/2020 has revealed that there are 22 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

2020 COR ACTION: The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

A review of the 2020 COR ACTION list, as provided by EDR, and dated 09/30/2017 has revealed that there is 1 2020 COR ACTION site within approximately 0.25 miles of the target property.

CA Cortese: The sites for the list are designated by the State Water Resource Control Board (LUST), the Integrated Waste Board (SWF/LS), and the Department of Toxic Substances Control (Cal-Sites).

A review of the CA Cortese list, as provided by EDR, and dated 12/17/2020 has revealed that there are 22 CA Cortese sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 2 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Violation Date:	05-23-2019
Citation:	22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173
Violation Description:	Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes:	Returned to compliance on 07/15/2019. Observed the following: -catch basin for photoresist to be open while filter process not in use -two copper electroless filters to be open (one filter placed into container during inspection) Provide photographs to this agency showing containers have been closed.

Violation Date:	04-13-2016
Citation:	22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description:	Failure to determine if the waste generated is a hazardous waste.
Violation Notes:	Returned to compliance on 05/03/2016. During the inspection, I looked at the municipal trash dumpster, which is located on the Winonics property, in the rear parking lot, behind locked gates. The dumpster was about 1/4 full with municipal trash. In the lower right corner, I saw about 20 gallons of light colored dirt/sand/dust. I asked Cazares what this was. He said it was the wet sanding waste , used to clean circuit boards that is dried out in the back parking lot via the sun and once dried, they dispose of it to the municipal trash. When asked if the waste had ever been lab tested for heavy metals, he said no. I reviewed the sanding machine water/sand reservoir and took photos of the machine and trash bin. I took one sample of the waste from the dumpster using a single use plastic spatula and glass jar. Cazares had his staff remove the rest of the waste and place it into (3) 5 gallon pails. He will hold onto the waste/pails until the lab analysis has been performed. Have the waste analyzed for [Truncated]

WINONICS ELECTRO CIRCUITS INC (Continued) **U003778944**

	generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 04/04/2014. The business has a circuit board drilling process. The process generates copper dust and fiberglass waste in a bag house accumulation device. To date, the business has disposed of the bag house waste into the copper, waste water treatment sludge HW stream. The problem is that the bag house waste container is labeled as "recyclable materials", with the proper beginning accumulation date. If this waste is managed as a HW and not as a separate recyclable material, the bag house waste accumulation container must be labeled as "hazardous wastes". Immediately change the receptacle to the proper HW label.

Eval Notes: The following documentation has been reviewed by this agency: -Hazardous Waste Training Records (I126) -Photographs of closed hazardous waste containers (I145) -Photographs of labeled hazardous waste containers (I562) Violations I126, I145 and I562 have been corrected.

Eval Division: Orange County Environmental Health
Eval Program: HWLQG
Eval Source: CERS

Eval General Type: Other/Unknown
Eval Date: 08-01-2017
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: On-site to obtain signature on inspection report and follow-up on violations. The 90 day storage area floor was clean and free of filter cake and the secondary containment/wet process areas were cleaned and free of liquid and crystals. Violation I333 has been corrected. Violation I145 and I562 still remain outstanding. Francisco stated that once they get a label and lid on the drum they ill email a photo of the violation corrected.

Violations:
Site ID: 86386
Site Name: WINONICS ELECTRO CIRCUITS INC
Violation Date: 05-23-2019
Citation: 22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes: Returned to compliance on 07/15/2019. Observed the following: -catch basin for photoresist to be open while filter process not in use -two copper electroless filters to be open (one filter placed into container during inspection) Provide photographs to this agency showing containers have been closed.

Violation Date:	04-13-2016
Citation:	22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description:	Failure to determine if the waste generated is a hazardous waste.
Violation Notes:	Returned to compliance on 05/03/2016. During the inspection, I looked at the municipal trash dumpster, which is located on the Winonics property, in the rear parking lot, behind locked gates. The dumpster was about 1/4 full with municipal trash. In the lower right corner, I saw about 20 gallons of light colored dirt/sand/dust. I asked Cazares what this was. He said it was the wet sanding waste , used to clean circuit boards that is dried out in the back parking lot via the sun and once dried, they dispose of it to the municipal trash. When asked if the waste had ever been lab tested for heavy metals, he said no. I reviewed the sanding machine water/sand reservoir and took photos of the machine and trash bin. I took one sample of the waste from the dumpster using a single use plastic spatula and glass jar. Cazares had his staff remove the rest of the waste and place it into (3) 5 gallon pails. He will hold onto the waste/pails until the lab analysis has been performed. Have the waste analyzed for [Truncated]

Eval Notes:	On site for the annual Hazardous waste (HW) inspection. Permit to inspect granted by Winonics/Cazares. The facility has generated 17 tons of HW in 2013 and is a RCRA, Large Quantity Generator (LQG). All HWs are being hauled away on a 90 day cycle. 2013 had 7 HW haul aways. 2014 (to date) has had 5 HW haul aways. All the HW totes had proper HW labels, including the beginning accumulation dates (within 90 days). 2 of the 3 totes were stored closed. 1 tote that was 1/2 full of waste filter cake had the lid on the side. See violations. There are 2 ~1,000 gallon, plastic aboveground Storage Tanks (ASTs) in the rear yard area. See violations. The business has a circuit board drilling process. The process generates copper dust and fiberglass waste in a bag house accumulation device. See violations. Federal EPA ID # is OK. Biennial report is OK. SB 14 is OK. Employee training program is OK. Employee training records showed that the 3 employees that [Truncated]

Hazardous Waste Summary:

Waste Code:	D002
Waste Description:	CORROSIVE WASTE
Waste Code:	D004
Waste Description:	ARSENIC
Waste Code:	D007
Waste Description:	CHROMIUM
Waste Code:	D008
Waste Description:	LEAD
Waste Code:	D011
Waste Description:	SILVER
Waste Code:	F006
Waste Description:	WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.
Waste Code:	F007
Waste Description:	SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS.
Waste Code:	F008
Waste Description:	PLATING BATH RESIDUES FROM THE BOTTOM OF PLATING BATHS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
HAZARDOUS AIR POLLUTANT MAJOR
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA

WINONICS INC DBA BENCH 2 BENCH (Continued) **1015732651**

program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Date: 03-19-2017
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.
Violation Notes: Returned to compliance on 05/12/2017.
Violation Division: Fullerton City Fire Department
Violation Program: HMRRP
Violation Source: CERS

Site ID: 422139
Site Name: Kim Iron Works, Inc
Violation Date: 07-19-2018
Citation: 22 CCR 15 66265.174 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.174
Violation Description: Failure to inspect weekly, areas where hazardous waste containers are stored or transferred. The owner or operator shall look for leaking containers and for deterioration of containers and the containment system caused by corrosion or other factors.
Violation Notes: Returned to compliance on 07/23/2018. Per Mr. Diaz hazardous waste containers are only inspected by hauler. Hazardous waste containers must be inspected at least weekly. Begin inspecting hazardous waste containers and provide documentation to this agency demonstrating inspections are being conducted.
Violation Division: Orange County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 422139
Site Name: Kim Iron Works, Inc
Violation Date: 07-16-2015
Citation: 22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12
Violation Description: Failure to obtain and/or maintain an Active EPA ID.
Violation Notes: Returned to compliance on 07/20/2015. The manifests were reviewed. They were complete except that the last 3 years had 2 different "temporary" EPA ID #s (CAC002663814 and CAC00279059). The facility does have a permanent EPA ID # of CAL923645247. Stop using the 2 temporary EPA ID #s and begin using the permanent EPA ID on all future manifests. Please mail a copy of the next manifest (proposed to be August 2015) in order to abate this violation.

Eval Notes:	On site for the triennial Hazardous Waste (HW) inspection. Permission to inspect granted by Kims/Diaz. The facility is a welding shop that paints iron. It is a small quantity generator (SQG) and must dispose of the HW every 6-9 months. Facility is having the HW hauled away approximately annually. All used paint is reused as primer. No liquid solvent HW. All filters are kept in the spray booth, never changes out but are vacuumed in order to remove the paint solids. All paint solids are managed and disposed of as HW. The (1) 55 gallon drum of paint solids was stored closed. It has no HW label. The proper label was completed and attached to the drum during the inspection. See violations. The manifests were reviewed. They were complete except that the last 3 years had 2 different "temporary" EPA ID #s (CAC002663814 and CAC00279059). The facility does have a permanent EPA ID # of CAL923645247. See violations. All 1 and 5 gallon buckets of paint/thinner are [Truncated]

Site Name:	ARCO 42122
Violation Date:	03-19-2019
Citation:	HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2
Violation Description:	"Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "
Violation Notes:	Returned to compliance on 03/19/2019. 87 siphon UST fill bucket failed testing. Replaced and retested at time of inspection.

Citation:	23 CCR 16 2636(f)(1) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(1)
Violation Description:	Failure of the double wall pressurized piping in the under dispenser containment to be continuously monitored by a method that either shuts down the flow of product to the dispenser or activates an audible/visual alarm when a leak is detected.
Violation Notes:	Returned to compliance on 04/06/2016. Stand-alone VR 001 sensors in all UDC's except #13/14 failed to shut down dispensers until nozzle was hung up. Additionally, a bad hook signal in dispensers #3/4 and #5/6 prevented testing of 87 and 91 PLLD's because the turbines wouldn't shut down. Permission to conduct emergency repairs was given at time of inspection. Plans received 4/6/16. Sensors in 87/91 UDC's (i.e. all except diesel dispenser #13/14) replaced with 208's and programmed for positive shutdown. Testing of new sensors and 87/91 PLLD's witnessed by this agency 4/6/16.

Eval Notes:	Rosie of Tesoro called (210 626 6564). She called because collections are pursuing an unpaid invoice. She reported that Tesoro had taken over ownership at the end of 2013. She stated that change of ownership was reported in CERS. However, they do not have a permit and are receiving ARCO's unpaid invoices and calls from collections. (It seems like I'm missing some information here). EC showed active facility in HW with Kevin and HM / UST with Fullerton Fire. She has 3 more OC facilities in the same situation with unacknowledged change of ownership. I'm not the inspector for this site but to keep it simple, I asked her to PDF me copies of the invoices so that I can follow up and get the right people involved.

Evaluation:

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	12-14-2012
Violations Found:	Yes
Eval Type:	Industrial Storm Water Compliance Evaluation

UNITED RENTALS INC BRANCH 515 (Continued) **S103627799**

Eval Notes: Weather: cold and overcast. SWPPP dated 9/2005. Small low opening in block wall at SW portion appears to allow undocumented runon. Contact also reports undocumented runon from SE portion. Observed aggregate mix spilled over and around push walls of the agg bin; dry cement mix on ground around the batch plant mixing/loading area; Contact reports spilled mix is allowed to remain on ground and is removed when it is added to the load of the next truck. Contact reports that keeping the batch plant area cleaner would be impractical. Food wrappers observed behind shop building; Contact agreed to clean. Openings observed in roof over wash fluid shed; may allow water into the wash fluid secondary containment pallets.

U S RENTALS (Continued) **S101589237**

Eval Notes:	On site for the triennial Spill Prevention Control and Countermeasure (SPCC) inspection. Permission to inspect granted by Dusk Sheridan. The PE stamped SPCC was written in 10-2005. See violations. There is 1 fuel aboveground storage tank (AST) that has 2 compartments. 1 gasoline and 1 diesel. The AST is double walled and has a tertiary containment concrete berm. Overfill prevention (OFP) is electronic and leak detection is also electronic. ***the AST meets secondary containment requirements however, the berm is open to the environment. Any rainwater will be released to the storm drain. It is recommended that the berm have a plug installed in order to prohibit any petroleum/rainwater releases.*** There is 1 250 gallon waste oil AST, secondarily contained with visual OFP. There are 3 110 gallon new oil ASTs that are in a "bathtub" style secondary containment with a roof covering. There are 4 55 gallon drums of oil, fuel and ATf that are on secondary [Truncated]

Environmental Interest/Information System:

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes:	Returned to compliance on 04/20/2016. include cutting oil, waste oil, waste coolants and hydraulic oil in machines
Violation Division:	Fullerton City Fire Department
Violation Program:	HMRRP
Violation Source:	CERS

Site ID:	62661
Site Name:	Rohner Machinery Sales, Inc.
Violation Date:	01-17-2019
Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 03/05/2019. The following hazardous waste containers were observed to not be labeled with required information: -six 55 gallon drums of used oil -one 20 gallon drum of waste coolant

ROHNER MACHINERY SALES, INC. (Continued) **S113460501**

	Label drums with the following, G Hazardous Waste,G name and address of generator, physical characteristic (sold or liquid), hazardous property (toxic, reactive, corrosive, flammable), contents of container and accumulation start date. Label drums with required information immediately.
Violation Division:	Orange County Environmental Health
Violation Program:	HW
Violation Source:	CERS
Site ID:	62661
Site Name:	Rohner Machinery Sales, Inc.
Violation Date:	01-17-2019
Citation:	HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description:	Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes:	Returned to compliance on 03/05/2019. As a Small Quantity Generator (SQG) of hazardous waste you must have hazardous waste hauled every 180 days from the accumulation start date. Observed six 55 gallon drums of waste oil with no accumulation start date, last manifest is dated 06/13/2017. Per Mr. Rohner waste has been on site for over 1 year. Have waste hauled by a licensed hauler immediately and provide a copy of the hazardous waste manifest to this agency.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Eval Type:	Other, not routine, done by local agency
Eval Notes:	Anonymous complainant to DTSC. Referred to HCA and FFD. Claims that the general manager (Randy Lake) orders employees to dump the old chemicals to the "gutter" and "inside and behind building on Kimberly Ave.". Enter into EC. Call FFD/Miner.Discussed the case. This is a HW/HMBEP/SPCC/CAL ARp site. We will both conduct on site surveillance to see if we can find a dump point. FFD will research the storm drains on site. I will review the HWTS for HW issues. We will meet in a week or two to compare notes.

Eval Type:	Industrial Storm Water Compliance Evaluation
Eval Notes:	On June 3, 2005, Regional Water Board staff conducted a routine inspection at the above mentioned site. Contact was made with Steve the Environmental Engineer. The SWPPP was requested and reviewed at this time. Upon inspection of the site the following observations were observed. Large stains were found on the ground from the unloading process which was located in the north east corner of the site. There is a very high potential for storm water and non-storm water to come into contact with chemicals from this process. Currently, there is a active faucet and garden hose in this area, although Steve stated that it is not used for washing down the area. Furthermore, Along the railroad there are several unloading docks that were currently discharging an unknown liquid and amount directly to the storm drain system. BMPs should have be implemented but were not in place at the time of inspection. Improved general housekeeping is needed for the trash bin and spills that are occurring in this area. Large stains and debris were noted on the ground. A re-inspection for this site is scheduled for July 7, 2005.

Eval Type:	Routine done by local agency
Eval Notes:	On site to conduct the triennial California Accidental Release Prevention Program (CAL ARP) inspection. Permission to inspect granted by Future Foam/Knudtson. Covered the following level 1 elements: This site has TDI, is a California/Federal regulated, level 1 CAL ARP facility. The Risk Management Plan had its 5-year update on 6-2014 (on schedule). Received the 5-year update during this inspection. Executive summary: OK. 5-year accident history: OK. Confirmed no releases of TDI in the last 5 years with Fullerton Fire Department. Worst case release analysis: See violations. Certification: OK, used the proper California notations. Coordinate with local emergency responders: Made a tour of the facility and took photos for the local emergency response cards to be handed out to Haz mat teams. This visit qualifies as your annual coordination(2014-2015). Abate the violation on/before 7-28-14.

Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: On June 3, 2005, Regional Water Board staff conducted a routine inspection at the above mentioned site. Contact was made with Steve the Environmental Engineer. The SWPPP was requested and reviewed at this time. Upon inspection of the site the following observations were observed. Large stains were found on the ground from the unloading process which was located in the north east corner of the site. There is a very high potential for storm water and non-storm water to come into contact with chemicals from this process. Currently, there is a active faucet and garden hose in this area, although Steve stated that it is not used for washing down the area. Furthermore, Along the railroad there are several unloading docks that were currently discharging an unknown liquid and amount directly to the storm drain system. BMPs should have be implemented but were not in place at the time of inspection. Improved general housekeeping is needed for the

FUTURE FOAM (Continued) **1001615533**

trash bin and spills that are occurring in this area. Large stains and debris were noted on the ground. A re-inspection for this site is scheduled for July 7, 2005.

Eval Notes: On site to conduct the triennial California Accidental Release Prevention Program (CAL ARP) inspection. Permission to inspect granted by Future Foam/Knudtson. Covered the following level 1 elements: This site has TDI, is a California/Federal regulated, level 1 CAL ARP facility. The Risk Management Plan had its 5-year update on 6-2014 (on schedule). Received the 5-year update during this inspection. Executive summary: OK. 5-year accident history: OK. Confirmed no releases of TDI in the last 5 years with Fullerton Fire Department. Worst case release analysis: See violations. Certification: OK, used the proper California notations. Coordinate with local emergency responders: Made a tour of the facility and took photos for the local emergency response cards to be handed out to Haz mat teams. This visit qualifies as your annual coordination(2014-2015). Abate the violation on/before 7-28-14.

Violation Source:	CERS
Site ID:	561430
Site Name:	MQ Fullerton
Violation Date:	01-15-2020
Citation:	40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description:	Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes:	Returned to compliance on 04/28/2020. Observed the following hazardous waste containers to be stored open: Indoor Hazardous Waste Storage Area: -two 5 gallon containers of used oil Store all hazardous waste containers closed while not in use immediately. Observed used oil accumulating in secondary containment pallets in the indoor hazardous waste storage area and the outdoor hazardous waste storage area. Per Mr. Menzel oil has been accumulating for some time. Secondary containment pallets are acting as hazardous waste containers. Provide a proper fitting lid for secondary containment pallets. Alternatively the used oil can be removed from the secondary containment pallets and placed into properly closed hazardous waste containers.

Evaluation:

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	01-15-2020
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	Accompanied on inspection by Adam Martinez of Fullerton Fire Department. Business ownership information was verified. Facility has 36 employees. Facility repairs and manufacturers back up generators and generates used coolant, waste diesel fuel, used oil filters, waste oily absorbent, contaminated waste oil, liquid from punctured aerosol cans and universal waste (batteries). Facility is puncturing aerosol cans; punctured cans are recycled and residual liquid is managed as hazardous waste. Notification of aerosol can puncturing was provided to this agency via mail. Contaminated shop rags are picked-up and cleaned by a laundering service. Photographs taken during inspection. An on-site re-inspection will occur by this agency in approximately 30 days.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Address:	2100 EAST ORANGETHORPE AVENUE
City,State,Zip:	FULLERTON, CA
Region:	STATE
Facility Status:	**Open - Site Assessment**
Status Date:	07/19/2019
Global Id:	SLT8R2224000
Lead Agency:	SANTA ANA RWQCB (REGION 8)
Lead Agency Case Number:	80001558
Latitude:	33.8588982524437
Longitude:	-117.894413960297
Case Type:	Cleanup Program Site
Case Worker:	CAN
Local Agency:	Not reported
RB Case Number:	SLT8R222
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected:	Indoor Air, Other Groundwater (uses other than drinking water), Soil, Soil Vapor
Potential Contaminants of Concern:	Not reported
Site History:	The Site overlies the Orange County North Basin regional groundwater plume, a comingled plume with known contamination from VOCs and other contaminants. Historical subsurface investigations at the Site identified VOCs in soil and groundwater that match several of the compounds present in the regional groundwater plume. In March 2018, RWQCB submitted an Oversight Cost Reimbursement for Site Cleanup Program request to the Eddie R Fischer Revocable Trust to recover reasonable expenses for overseeing the investigation of illegal discharges, contaminated properties,and other unregulated releases that may adversely affect the State of Californias waters. RWQCB stated that available historical information indicates that waste discharges at the Site may have impacted, or threatened to impact, beneficial groundwater zones beneath the Site. RWQCB requested that the Eddie R Fischer Revocable Trust cooperate with additional Site investigation requirements to ascertain the nature and extent of Site impacts and potential contributions to regional groundwater impacts.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Address:	800 SOUTH STATE COLLEGE BOULEVARD
City,State,Zip:	FULLERTON, CA 92831
Region:	STATE
Facility Status:	**Open - Remediation**
Status Date:	01/29/2007
Global Id:	SL0605956921
Lead Agency:	SANTA ANA RWQCB (REGION 8)
Lead Agency Case Number:	Not reported
Latitude:	33.8647432
Longitude:	-117.8879772
Case Type:	Cleanup Program Site
Case Worker:	MG
Local Agency:	Not reported
RB Case Number:	2080022
File Location:	Regional Board
Potential Media Affected:	Aquifer used for drinking water supply, Soil
Potential Contaminants of Concern:	Other Chlorinated Hydrocarbons, Tetrachloroethylene (PCE), Trichloroethylene (TCE)
Site History:	Arconic (formerly Alcoa) manufactures fastners for the aerospace industry. Investigation of the Site began in 1996 and found metals, petroleum hydrocarbons and VOCs (PCE, TCE, cis-1,2-DCE , 11DCE) in the soil and soil vapor. The primary areas of concern are the former degreaser area and the plating area. Four groundwater monitoring wells were installed at the Site between 2003 and 2005. Groundwater was encounterd at 106 to 108 feet bgs. VOCs PCE and TCE were detected in the groundwater at concentrations as high as 99 ug/L and 41 ug/L respectively . The groundwater flow direction is to the south southwest. A soil vapor extraction (SVE) and treatment pilot test operated between January 2007 to January 2008. The full scale SVE and treatment system was installed and operational May 6, 2009. The SVE system consists of seven vapor extraction wells and the extracted soil vapors are treated wtih carbon filters. Groundwater is monitored semiannually.

ALCOA GLOBAL FASTENERS, INC. (Continued) **1000307386**

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Hazardous Waste Summary:
Waste Code: D001
Waste Description: IGNITABLE WASTE

Waste Code: D002
Waste Description: CORROSIVE WASTE

Waste Code: D003
Waste Description: REACTIVE WASTE

Waste Code: D004
Waste Description: ARSENIC

Waste Code: D005
Waste Description: BARIUM

Waste Code: D006
Waste Description: CADMIUM

Waste Code: D007
Waste Description: CHROMIUM

Waste Code: D008
Waste Description: LEAD

Waste Code: D009
Waste Description: MERCURY

Waste Code: D010
Waste Description: SELENIUM

Waste Code: D011
Waste Description: SILVER

Waste Code: D018
Waste Description: BENZENE

Waste Code: D022
Waste Description: CHLOROFORM

Waste Code: D024
Waste Description: M-CRESOL

Waste Code: D035
Waste Description: METHYL ETHYL KETONE

ALCOA GLOBAL FASTENERS INC. (Continued) **1007198696**

Waste Code: D038
Waste Description: PYRIDINE

Waste Code: D039
Waste Description: TETRACHLOROETHYLENE

Waste Code: F001
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F006
Waste Description: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

Waste Code: F007
Waste Description: SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS.

Waste Code: F008
Waste Description: PLATING BATH RESIDUES FROM THE BOTTOM OF PLATING BATHS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

Waste Code: F009
Waste Description: SPENT STRIPPING AND CLEANING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

ALCOA GLOBAL FASTENERS INC. (Continued) **1007198696**

Waste Code: F019
Waste Description: WASTEWATER TREATMENT SLUDGES FROM THE CHEMICAL CONVERSION COATING OF ALUMINUM, EXCEPT FROM ZIRCONIUM PHOSPHATING IN ALUMINUM CAN WASHING WHEN SUCH PHOSPHATING IS AN EXCLUSIVE CONVERSION COATING PROCESS.

Waste Code: LABP
Waste Description: LAB PACK

Waste Code: P030
Waste Description: CYANIDES (SOLUBLE CYANIDE SALTS), NOT OTHERWISE SPECIFIED

Waste Code: U019
Waste Description: BENZENE (I,T)

Waste Code: U134
Waste Description: HYDROFLUORIC ACID (C,T) (OR) HYDROGEN FLUORIDE (C,T)

Waste Code: U159
Waste Description: 2-BUTANONE (I,T) (OR) METHYL ETHYL KETONE (MEK) (I,T)

Waste Code: U196
Waste Description: PYRIDINE

Waste Code: U210
Waste Description: ETHENE, TETRACHLORO- (OR) TETRACHLOROETHYLENE

Waste Code: U220
Waste Description: BENZENE, METHYL- (OR) TOLUENE

Waste Code: U228
Waste Description: ETHENE, TRICHLORO- (OR) TRICHLOROETHYLENE

Citation:	HSC 6.67 25270.6(a)(1), 25270.6(a)(2) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.6(a)(1), 25270.6(a)(2)
Violation Description:	Failure to submit a tank facility statement on or before January 1 annually unless a current Business Plan has been submitted.
Violation Notes:	Returned to compliance on 03/27/2019. Any facility storing over 1,320 gallons of petroleum product must submit the Tank Facility Statement Form annually by January 1st. Tank Facility Statement Form was last submitted on 07/26/2016. Submit form to the California Environmental Reporting System (CERS); alternatively you may use your hazardous materials inventory to meet this requirement. If you choose to use your inventory this must be indicated in CERS.

SOUTHERN CALIFORNIA EDISON-COFFEE SUBSTATION (Continued) **S112983523**

Violation Source:	CERS
Site ID:	90708
Site Name:	HOWMET GLOBAL FASTENING SYSTEMS INC.
Violation Date:	05-02-2014
Citation:	22 CCR 45 67450.2(c)(10) - California Code of Regulations, Title 22, Chapter 45, Section(s) 67450.2(c)(10)
Violation Description:	Failure of the generator to prepare, maintain, and submit to CUPA an annual report containing the following information: (A) The serial number(s) of the FTU(s) involved in treatment; (B) The physical and mailing address of the business entity which owns or operates the FTU(s); (C) The name, title and telephone number of each FTU contact person; (D) The name and address or legal description of the facility; (E) The facility identification number; (F) The number of days each FTU was operated; (G) The quantity of hazardous waste(s) treated by each FTU; (H) The composition and hazardous characteristics of the influent hazardous waste(s); (I) The treatment method(s) used for each hazardous waste treated by each FTU; (J) The quantity, composition and hazardous characteristic(s) of any treatment effluent or residual discharged from each FTU to a POTW, if applicable; and (K) The quantity, composition, hazardous characteristic(s) and disposition of any FTU treatment effluent or residual that was not discharged to a POTW, if applicable.
Violation Notes:	Returned to compliance on 10/22/2014. The on site hazardous waste treatment notification was incorrect. The form listed 2 Conditionally Authorized (CA) and 1 Conditionally exempt (CE) units. In fact the site has 2 Permit By Rule (PBR) and 1 either PBR or CA (depending on the chrome concentration). Please resubmit this form properly completed.
Violation Division:	Orange County Environmental Health

Violation Date:	06-06-2017
Citation:	22 CCR 15 66265.31 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.31
Violation Description:	Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or

SOUTHERN CALIFORNIA EDISON-COFFEE SUBSTATION (Continued) **S112983523**

	non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.
Violation Notes:	Returned to compliance on 08/29/2017. -Facility has plating waste in the secondary containment of the plating line, which has been accumulating over time, see photographs. -Maintain secondary containment to be emptied regularly to prevent the build-up of hazardous waste and keep the secondary containment clean for accident spills. A follow-up inspection will be conducted to ensure all of the secondary containment has been cleaned.
Violation Division:	Orange County Environmental Health
Violation Program:	HWLQG
Violation Source:	CERS
Site ID:	90708
Site Name:	HOWMET GLOBAL FASTENING SYSTEMS INC.
Violation Date:	05-02-2014
Citation:	HSC 6.5 25143.9 - California Health and Safety Code, Chapter 6.5, Section(s) 25143.9
Violation Description:	Failure to meet the following requirements of excluded recyclable materials: 1) Used or reused as an ingredient in an industrial process to make a product if the material is not being reclaimed, 2) Used or reused as a safe and effective substitute for commercial products if the material is not being reclaimed, 3) Returned to the original process from which the material was generated, without first being reclaimed, if the material is returned as a substitute for raw material feedstock, and the process uses raw materials as principal feedstocks, 4) The material is recycled and used at the same facility at which the material was generated, or by the same corporate entity, 5) The material is recycled within the applicable generator accumulation time, 6) The material is managed in accordance with all applicable requirements for generators of hazardous wastes, 7) If the material is held in a container or tank, the container or tank is labeled, marked, and placarded in accordance with the department's hazardous waste labeling, marking, and placarding requirements which are applicable to generators, except that the container or tank shall be labeled or marked clearly with the words "Excluded Recyclable Material" instead of the words "Hazardous Waste," 8) If the material is used oil, the containers, aboveground tanks, and fill pipes used to transfer oil into underground storage tanks shall also be labeled and clearly marked with the words "Used Oil", 9) The owner or operator of the business location where the material is located has a business plan that meets the following minimal requirements: emergency response plans and procedures, which specifically address the material or that meets the emergency response and contingency requirements which are applicable to generators of hazardous waste, and 10) The material shall be stored and handled in accordance with all local ordinances and codes.
Violation Notes:	Returned to compliance on 08/28/2014. The site had an empty container caged area. The drums were unlabeled or still had their original labels. All empty HW drums must be labeled "empty". Begin managing these drums with empty labels. Submit photos to this Agency in order to abate this violation
Violation Division:	Orange County Environmental Health
Violation Program:	HWLQG

SOUTHERN CALIFORNIA EDISON-COFFEE SUBSTATION (Continued) **S112983523**

Site ID:	90708
Site Name:	HOWMET GLOBAL FASTENING SYSTEMS INC.
Violation Date:	05-02-2014
Citation:	HSC 6.67 Multiple - California Health and Safety Code, Chapter 6.67, Section(s) Multiple
Violation Description:	Haz Waste Generator Program - Operations/Maintenance - General
Violation Notes:	Returned to compliance on 09/03/2014. The waste oil tank located in the HW storage area is being visually monitored weekly. HW tanks must be monitored daily. Develop a daily visual monitoring plan and implement immediately. Submit copies of the daily logs to this Agency in order to abate this violation.
Violation Division:	Orange County Environmental Health
Violation Program:	HWLQG
Violation Source:	CERS

Site ID:	90708
Site Name:	HOWMET GLOBAL FASTENING SYSTEMS INC.
Violation Date:	05-02-2014
Citation:	19 CCR 4.5 2735.4(a)(3) - California Code of Regulations, Title 19, Chapter 4.5, Section(s) 2735.4(a)(3)
Violation Description:	Failure to comply with the provisions of this chapter pursuant to the time frames identified in Section 2745.1(b) if a stationary source has a process with more that a threshold quantity of a regulated substance as listed in Tables 1 or 2 and Table 3 of Section 2770.5.
Violation Notes:	Returned to compliance on 09/15/2014. The facility had submitted an RMP in 2011. This RMP claimed an OCA with no off site emissions. This OCA was predicated on the belief that the plating wet floor had distinct barriers between the cyanide tank areas (cyanide plating and rinse tanks) and the acid bearing wet floor. The OCA was accepted, and a level 1 assignment accepted with no acid/cyanide mixing in the wet floor. This inspection revealed that the plating floor has only a single wet floor and that any acids and cyanide tanks/rinses would be mixed if a catastrophic release occurred. The facility options are: 1) build discrete secondary containment wet floors that keep the acids and cyanide plating tanks/rinse separate. This will allow the current level 1 status to remain. 2) resubmit an OCA using an acid/cyanide vapor release in order to determine if the site is sill eligible for level 1 status. Please advise this Agency which option it chooses. If the wet floor is changed, a re inspection will be [Truncated]

Violation Date:	06-06-2017
Citation:	22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173
Violation Description:	Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes:	Returned to compliance on 06/15/2017. -Facility had several 55 gallon drums of hazardous waste that were open with a funnel in the bung of the drum while not actively adding or removing waste. -Facility removed the funnels while on-site, no further corrective action necessary.
Violation Division:	Orange County Environmental Health
Violation Program:	HWLQG
Violation Source:	CERS
Site ID:	90708
Site Name:	HOWMET GLOBAL FASTENING SYSTEMS INC.
Violation Date:	05-02-2014
Citation:	22 CCR 45 67450.2(c)(10) - California Code of Regulations, Title 22, Chapter 45, Section(s) 67450.2(c)(10)
Violation Description:	Failure of the generator to prepare, maintain, and submit to CUPA an annual report containing the following information: (A) The serial number(s) of the FTU(s) involved in treatment; (B) The physical and mailing address of the business entity which owns or operates the FTU(s); (C) The name, title and telephone number of each FTU contact person; (D) The name and address or legal description of the facility; (E) The facility identification number; (F) The number of days each FTU was operated; (G) The quantity of hazardous waste(s) treated by each FTU; (H) The composition and hazardous characteristics of the influent hazardous waste(s); (I) The treatment method(s) used for each hazardous waste treated by each FTU; (J) The quantity, composition and hazardous characteristic(s) of any treatment effluent or residual discharged from each FTU to a POTW, if applicable; and (K) The quantity, composition, hazardous characteristic(s) and disposition of any FTU treatment effluent or residual that was not discharged to a POTW, if applicable.
Violation Notes:	Returned to compliance on 10/22/2014. The on site hazardous waste Treatment Notification page listed the facility having 2 CA units and 1 CE unit. In fact it has 2 PBR units and 1 either CA or PBR unit depending on the waste analysis. The current form lists the CA-01 unit (oil water separator) as a CA unit. In fact it is a PBR unit. Please update this form to reflect the proper information/tier.

SOUTHERN CALIFORNIA EDISON-COFFEE SUBSTATION (Continued) **S112983523**

Violation Date:	04-28-2016
Citation:	HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description:	Failure to discuss the appropriate containment/diversionary structures/equipment within the plan.
Violation Notes:	Returned to compliance on 07/28/2016. The SPCC lists the secondary containment for the "oil filled machinery" as the building. Most of the machines may claim the building as secondary containmnet. However, several of the oil filled machines that are located near the buildings exterior walls appear to drain outside the building. Immediately outside the building, there are two storm drains that have absorbent tubes. This is general containment. These machines need to have "sized secondary containment". You must either 1) verify that these machines near the building perimeter are not regulated under SPCC (ie: the machines have oil reservoirs < 55 gallons 2) verify that the machines will drain into the building and not outside the building 3) verify that the facility perimeter storm drains/piping do not drain to the street but are "weirs/culverts" to the one facility storm drain that is controlled via a closure valve.

Citation: 22 CCR 45 67450.11(d)(7)(E) - California Code of Regulations, Title 22, Chapter 45, Section(s) 67450.11(d)(7)(E)
Violation Description: Failure to maintain the following records at the facility for a minimum of three years from the last date of any activity and made available to authorized representatives of the Department, the CUPA, or the U.S. EPA upon request: 1) Written approval from the agency operating the POTW receiving the facility's discharges; 2) Written method documented in the waste analysis plan for ensuring that the concentration of total cyanide does not exceed 5000 milligrams per liter in the aqueous waste resulting from the mixing; and 3) Documentation that the residual solids generated by the treatment have been either: A) Sent offsite for metals recovery or reclamation; or B) Determined to be not amenable for recycling.
Violation Notes: Returned to compliance on 10/22/2014. FTU-01 (chrome reduction). The correct tier (CA or PBR) is dependent on the waste chrome concentration that is being treated. None was available. Please submit the chrome ocn3ecntration with the update TP package in order to determine if this process is CA or PBR.

Violation Description: Haz Waste Generator Program - Operations/Maintenance - General
Violation Notes: Returned to compliance on 04/08/2015. The facility has (6) poly tanks located in the facility's concrete lined basement. 3 of these tanks (cyanide rinse, general waste rinse and chrome rinse) are exempt from HW tank management because they are part of a waste water treatment system (WWT). The 3 other tanks (cyanide plating, chrome dump and alkaline dump) are poly tanks (~1,000 gallons each) that are located in the basement, not part of the WWT system and are not being

SOUTHERN CALIFORNIA EDISON-COFFEE SUBSTATION (Continued) **S112983523**

monitored (visually or electronically). These 3 tanks are regulated as underground storage tanks (USTs) and should be monitored as USTs (either electronically or visually) in order to meet HW tank management standards. Immediately notify the Fullerton Fire Department (FFD), who has regulatory authority over USTs in the City of Fullerton, and either begin properly monitoring these UST/HW tanks or have them removed.

Citation: 22 CCR 15 66265.177 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.177
Violation Description: Failure to ensure incompatible waste and/or materials are not placed or stored in the same container or nearby or into an unwashed container, which previously contained incompatible waste and/or materials, so that it does not potentially result in the following: 1) Generate extreme heat or pressure, fire or explosion, or violent reaction; 2) Produce uncontrolled toxic mists, fumes, dusts, or gases in sufficient quantities to threaten human health or the environment; 3) Produce uncontrolled flammable fumes or gases in sufficient quantities to pose a risk of fire or explosions; 4) Damage the structural integrity of the device or facility containing the waste; or 5) Through other like means threaten human health or the environment.
Violation Notes: Returned to compliance on 08/28/2014. The HW storage area is kept clean and drums are segregated by hazard category. Except, there was (1) 270 gallon plastic tote labeled "waste cyanide rinses". This tote held waste cyanide bearing rinse water from the wet floor clean up. This tote was stored in the same secondary containment with some nitric acid waste (steel drum). These waste are incompatible and if mixed would cause an exothermic reaction. Immediately separate these containers and continue ot manage your incompatible wastes in separate secondary containment.

This list shall be kept up to date. In addition, the plan shall include the location and a physical description of each item on the list, and a brief outline of its capabilities; 5) An evacuation plan for facility personnel where there is a possibility that evacuation could be necessary. This plan is to describe signal(s) to be used to begin evacuation, evacuation routes, and alternate evacuation routes (in cases where the primary routes could be blocked by releases of hazardous waste or fires); 6) The current telephone number of the California Emergency Management Agency; and 7) If the owner or operator has already prepared a Spill Prevention, Control, and Countermeasures (SPCC) or some other emergency or contingency plan, the owner or operator need only amend that plan to incorporate hazardous waste management provisions that are sufficient to comply with the requirements of this chapter.
Violation Notes:	Returned to compliance on 10/22/2014. Unit CA-01 has 3 tanks but only 1 has been identified via tank # designations on the tanks. Please correct these tank #.

Violation Date:	05-02-2014
Citation:	22 CCR 15 66265.52 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.52
Violation Description:	Failure to include all of the following in the Contingency Plan: 1) A description of actions the facility personnel shall take response to fires, explosions, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water at the facility; 2) A description of arrangements agreed to by local police departments, fire departments, hospitals, contractors, and State and local emergency response teams to coordinate emergency services; 3) All names, addresses, and phone numbers (office and home) of all persons qualified to act as emergency coordinator and this list shall be kept up to date. Where more than one person is listed, one shall be named as primary emergency

SOUTHERN CALIFORNIA EDISON-COFFEE SUBSTATION (Continued) **S112983523**

coordinator and others shall be listed in the order in which they will assume responsibility as alternates; 4) A list of all emergency equipment at the facility (such as fire extinguishing systems, spill control equipment, communications and alarm systems (internal and external), and decontamination equipment), where this equipment is required. This list shall be kept up to date. In addition, the plan shall include the location and a physical description of each item on the list, and a brief outline of its capabilities; 5) An evacuation plan for facility personnel where there is a possibility that evacuation could be necessary. This plan is to describe signal(s) to be used to begin evacuation, evacuation routes, and alternate evacuation routes (in cases where the primary routes could be blocked by releases of hazardous waste or fires); 6) The current telephone number of the California Emergency Management Agency; and 7) If the owner or operator has already prepared a Spill Prevention, Control, and Countermeasures (SPCC) or some other emergency or contingency plan, the owner or operator need only amend that plan to incorporate hazardous waste management provisions that are sufficient to comply with the requirements of this chapter.

Violation Notes: Returned to compliance on 10/22/2014. FTU-02 incorrectly lists in section II. basis for not needing a federal permit as (h) empty container rinsing. Please un check this box.

Eval Notes:	On site follow up inspection to discuss the 3 below grade HW storage tanks with FFD and Doh, Banajai, Yontz/Alcoa. It was decided by Alcoa that they will change the 3 current basement, storage tanks into a flow through system. Each of the tanks will be placed into a secondary tank and installed with automatic pumps which will transfer any liquids out of the tank and into a new AST. This will make the basement tanks exempt from UST regulations. Alcoa needed 180 days in order to complete the change. Have this project completed on/before 12-29-14 in order to abate this violation.

Eval Notes: On site for a follow up inspection to the routine inspection dated 5-2-14. Permission to inspect granted by Alcoa/Goeke and Doh. Discussed the previous violations. Violation # A04 (no RMP) is still outstanding and is due immediately. Per Goeke, the facility has a consultant conducting the OCA computer model for an acid/cyanide release. If this OCA still allows the facility to maintain the level 1

SOUTHERN CALIFORNIA EDISON-COFFEE SUBSTATION (Continued) **S112983523**

status, they will submit the RMP as is and work on getting the cyanide tanks double contained during the end of year closure. If the OCA model shows an off site consequence (and therefore make the site a level 2 RMP) they will either 1) secondarily contain the tanks immediately or submit a level 2 RMP. This violation is still outstanding and correction is due within 30 days (9-29-14). If not corrected, an administrative action may be started.

Eval Notes:	Alcoa/Barbara had a TP question regarding aerosol can puncturing. My response; Barbara: The short answer is that you can do this ON SITE. You are covered under TP but the treatment tier (level 11b) makes it G no authorization requiredG (meaning no TP G authorizationG) is needed if you follow H&SC 25201.16. This section sets some site requirements such as ability to handle a spill, management of residuals etc. You would have to amend your TP forms to include this treatment level (aerosol can puncturing) but only minimal other requirements. Hope that helps.

Eval Notes:	Regional Board Staff conducted a compliance inspection for the above facility on December 3, 2018. Staff met with Ms. Barbara Ross, Environmental Engineer. The facility is currently in Level 1 for Copper and Zinc. The SWPPP was up to date and employee training was conducted November 2018. Housekeeping is conducted twice a month with an industrial sweeper and hand sweeping is conducted as needed. The wastewater treatment plant is surrounded with a concrete berm and drains to the sanitary sewer. The hazardous waste storage and empty drum storage were located in containment berms at the northeast portion of the facility. An industrial boneyard was observed surrounded by a containment berm. Metal filtering waddles were noted around both outlets and waddles are deployed across the yard during rain events. Tarps were observed covering industrial materials and Ms. Ross stated more tarps are used during a rain event. No violations were observed during the inspection.

Eval Type:	Industrial Storm Water Compliance Evaluation
Eval Notes:	Alcoa Global Fasteners, Inc. is a captive metal fabrication company housing a variety of metalworking and metal finishing activities. Alcoa manufactures aerospace fasteners from titanium, aluminum, stainless steel and other related metal alloys for commercial and government clients. All industrial manufacturing was observed to occur indoors. Hazardous materials are transported to the facility by truck and unloaded in designated outdoor areas (Photo 6). Hazardous materials were stored in sealed 55-gallon drums within secondary containment until the product was needed for specific manufacturing needs. Metal turnings generated during the manufacturing were contained in steel bins with sealing lids and secondary containment pans (Photo 7). During the inspection, a municipal waste bin storage area was present on the southeast corner of the facility (Photo 4). According to the facility representative, the waste bins and recycling bins were temporary, as the facility was undergoing a large clean up in preparation for a corporate audit. Storm water collected from the

SOUTHERN CALIFORNIA EDISON-COFFEE SUBSTATION (Continued) **S112983523**

facility is conveyed via concrete swales to the single drop inlet (Photo 2 and 5). The storm water flow gradient is generally from the north to the south at the facility.

Eval Notes: On site for a routine inspection. Permission to inspect was given to me by Barbara Ross, Environmental Engineer. This facility is a CalARP Program Level 1 facility. Program Level 1 chemicals include Sodium Cyanide, Potassium Cyanide and Cadmium Oxide. Storage areas were inspected and chemical volumes were verified. The Risk Management Plan (RMP) was re-validated/updated in August, 2016. The RMP included calculations and release plume modeling that indicated toxic endpoints that do not extend beyond the property line. I was not able to review documentation that response actions have been coordinated with local emergency planning and response agencies (Fullerton Fire). The RMP did not contain the required certification statement found in Title 19, CCR section 2735.5(d)(4). The violations on this report must be corrected immediately.

Violation Date: 03-26-2019
Citation: HSC 6.67 25270.6(a)(1), 25270.6(a)(2) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.6(a)(1), 25270.6(a)(2)
Violation Description: Failure to submit a tank facility statement on or before January 1 annually unless a current Business Plan has been submitted.
Violation Notes: Returned to compliance on 03/27/2019. Any facility storing over 1,320 gallons of petroleum product must submit the Tank Facility Statement Form annually by January 1st. Tank Facility Statement Form was last submitted on 07/26/2016. Submit form to the California Environmental Reporting System (CERS); alternatively you may use your hazardous materials inventory to meet this requirement. If you choose to use your inventory this must be indicated in CERS.

SOUTHERN CALIFORNIA EDISON-COFFEE SUBSTATION (Continued) **S112983523**

Chapter 45, Section(s) 67450.2(c)(10)
Violation Description: Failure of the generator to prepare, maintain, and submit to CUPA an annual report containing the following information: (A) The serial number(s) of the FTU(s) involved in treatment; (B) The physical and mailing address of the business entity which owns or operates the FTU(s); (C) The name, title and telephone number of each FTU contact person; (D) The name and address or legal description of the facility; (E) The facility identification number; (F) The number of days each FTU was operated; (G) The quantity of hazardous waste(s) treated by each FTU; (H) The composition and hazardous characteristics of the influent hazardous waste(s); (I) The treatment method(s) used for each hazardous waste treated by each FTU; (J) The quantity, composition and hazardous characteristic(s) of any treatment effluent or residual discharged from each FTU to a POTW, if applicable; and (K) The quantity, composition, hazardous characteristic(s) and disposition of any FTU treatment effluent or residual that was not discharged to a POTW, if applicable.
Violation Notes: Returned to compliance on 10/22/2014. The on site hazardous waste treatment notification was incorrect. The form listed 2 Conditionally Authorized (CA) and 1 Conditionally exempt (CE) units. In fact the site has 2 Permit By Rule (PBR) and 1 either PBR or CA (depending on the chrome concentration). Please resubmit this form properly completed.

Site Name:	HOWMET GLOBAL FASTENING SYSTEMS INC.
Violation Date:	05-02-2014
Citation:	19 CCR 4.5 2735.4(a)(3) - California Code of Regulations, Title 19, Chapter 4.5, Section(s) 2735.4(a)(3)
Violation Description:	Failure to comply with the provisions of this chapter pursuant to the time frames identified in Section 2745.1(b) if a stationary source has a process with more that a threshold quantity of a regulated substance as listed in Tables 1 or 2 and Table 3 of Section 2770.5.
Violation Notes:	Returned to compliance on 09/15/2014. The facility had submitted an RMP in 2011. This RMP claimed an OCA with no off site emissions. This OCA was predicated on the belief that the plating wet floor had distinct barriers between the cyanide tank areas (cyanide plating and rinse tanks) and the acid bearing wet floor. The OCA was accepted, and a level 1 assignment accepted with no acid/cyanide mixing in the wet floor. This inspection revealed that the plating floor has only a single wet floor and that any acids and cyanide tanks/rinses would be mixed if a catastrophic release occurred. The facility options are: 1) build discrete secondary containment wet floors that keep the acids and cyanide plating tanks/rinse separate. This will allow the current level 1 status to remain. 2) resubmit an OCA using an acid/cyanide vapor release in order to determine if the site is sill eligible for level 1 status. Please advise this Agency which option it chooses. If the wet floor is changed, a re inspection will be [Truncated]

Citation:	HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description:	Failure to discuss the appropriate containment/diversionary structures/equipment within the plan.
Violation Notes:	Returned to compliance on 07/28/2016. The SPCC lists the secondary

SOUTHERN CALIFORNIA EDISON-COFFEE SUBSTATION (Continued) **S112983523**

containment for the "oil filled machinery" as the building. Most of the machines may claim the building as secondary containmnet. However, several of the oil filled machines that are located near the buildings exterior walls appear to drain outside the building. Immediately outside the building, there are two storm drains that have absorbent tubes. This is general containment. These machines need to have "sized secondary containment". You must either 1) verify that these machines near the building perimeter are not regulated under SPCC (ie: the machines have oil reservoirs < 55 gallons 2) verify that the machines will drain into the building and not outside the building 3) verify that the facility perimeter storm drains/piping do not drain to the street but are "weirs/culverts" to the one facility storm drain that is controlled via a closure valve.

Violation Description: Haz Waste Generator Program - Operations/Maintenance - General
Violation Notes: Returned to compliance on 04/08/2015. The facility has (6) poly tanks located in the facility's concrete lined basement. 3 of these tanks (cyanide rinse, general waste rinse and chrome rinse) are exempt from HW tank management because they are part of a waste water treatment system (WWT). The 3 other tanks (cyanide plating, chrome dump and alkaline dump) are poly tanks (~1,000 gallons each) that are located in the basement, not part of the WWT system and are not being monitored (visually or electronically). These 3 tanks are regulated as underground storage tanks (USTs) and should be monitored as USTs (either electronically or visually) in order to meet HW tank management standards. Immediately notify the Fullerton Fire Department (FFD), who has regulatory authority over USTs in the City of Fullerton, and either begin properly monitoring these UST/HW tanks or

SOUTHERN CALIFORNIA EDISON-COFFEE SUBSTATION (Continued) **S112983523**

	have them removed.

Eval Notes:	On site follow up inspection to discuss the 3 below grade HW storage tanks with FFD and Doh, Banajai, Yontz/Alcoa. It was decided by Alcoa that they will change the 3 current basement, storage tanks into a flow through system. Each of the tanks will be placed into a secondary tank and installed with automatic pumps which will transfer any liquids out of the tank and into a new AST. This will make the basement tanks exempt from UST regulations. Alcoa needed 180 days in order to complete the change. Have this project completed on/before 12-29-14 in order to abate this violation.

Violations Found:	No
Eval Type:	Other, not routine, done by local agency
Eval Notes:	On site for a follow up inspection to the routine inspection dated 5-2-14. Permission to inspect granted by Alcoa/Goeke and Doh. Discussed the previous violations. Violation # A04 (no RMP) is still outstanding and is due immediately. Per Goeke, the facility has a consultant conducting the OCA computer model for an acid/cyanide release. If this OCA still allows the facility to maintain the level 1 status, they will submit the RMP as is and work on getting the cyanide tanks double contained during the end of year closure. If the OCA model shows an off site consequence (and therefore make the site a level 2 RMP) they will either 1) secondarily contain the tanks immediately or submit a level 2 RMP. This violation is still outstanding and correction is due within 30 days (9-29-14). If not corrected, an administrative action may be started.

Eval Notes:	Alcoa/Barbara had a TP question regarding aerosol can puncturing. My response; Barbara: The short answer is that you can do this ON SITE. You are covered under TP but the treatment tier (level 11b) makes it G no authorization requiredG (meaning no TP G authorizationG) is needed if you follow H&SC 25201.16. This section sets some site requirements such as ability to handle a spill, management of residuals etc. You would have to amend your TP forms to include this treatment level (aerosol can puncturing) but only minimal other requirements. Hope that helps.

Eval Notes:	Regional Board Staff conducted a compliance inspection for the above facility on December 3, 2018. Staff met with Ms. Barbara Ross, Environmental Engineer. The facility is currently in Level 1 for Copper and Zinc. The SWPPP was up to date and employee training was conducted November 2018. Housekeeping is conducted twice a month with an industrial sweeper and hand sweeping is conducted as needed. The wastewater treatment plant is surrounded with a concrete berm and drains to the sanitary sewer. The hazardous waste storage and empty drum storage were located in containment berms at the northeast portion of the facility. An industrial boneyard was observed surrounded by a containment berm. Metal filtering waddles were noted around both outlets and waddles are deployed across the yard during rain events. Tarps were observed covering industrial materials and Ms. Ross stated more tarps are used during a rain event. No violations were observed during the inspection.

Eval Type:	Industrial Storm Water Compliance Evaluation
Eval Notes:	Alcoa Global Fasteners, Inc. is a captive metal fabrication company housing a variety of metalworking and metal finishing activities. Alcoa manufactures aerospace fasteners from titanium, aluminum, stainless steel and other related metal alloys for commercial and government clients. All industrial manufacturing was observed to occur indoors. Hazardous materials are transported to the facility by truck and unloaded in designated outdoor areas (Photo 6). Hazardous materials were stored in sealed 55-gallon drums within secondary containment until the product was needed for specific manufacturing needs. Metal turnings generated during the manufacturing were contained in steel bins with sealing lids and secondary containment pans (Photo 7). During the inspection, a municipal waste bin storage area was present on the southeast corner of the facility (Photo 4). According to the facility representative, the waste bins and recycling bins were temporary, as the facility was undergoing a large clean up in preparation for a corporate audit. Storm water collected from the facility is conveyed via concrete swales to the single drop inlet (Photo 2 and 5). The storm water flow gradient is generally from the north to the south at the facility.

Consent to enter and conduct inspection activities was provided by Barbara Ross. Facility is regulated under Permit By Rule (PBR). Observed the following processes: cyanide destruction, waste water treatment to remove metals and puncturing of gas cylinders. Process of puncturing gas cylinders is under review by this agency. Exterior of units are marked with all required information. Facility has submitted annual notification forms through the California Environmental System (CERS). The following documentation was available and reviewed: -Sewer agency discharge records -SB 14 -Inspection schedule and log -Waste Analysis Plan -Closure Plan -Training records for cyanide handling Professional Engineer (PE) assessment was previously reviewed by this agency.

Eval Notes:	INSPECTOR COMMENTS On-site for a routine RCRA Large Quantity Hazardous Waste inspection. Consent to enter, inspect, and take photographs was given by Barbara Ross. The inspection was conducted with Barbara Ross, Daniel Doh, and Alonso Mejia. Also present was Terry Carrier of OCHCA. Facility is a RCRA large quantity generator and they use satellite storage throughout the facility. The 90 day hazardous waste storage area had adequate aisle space and is secondarily contained. Facility has three plating areas which have secondary containment, the secondary containment below most of the plating area, see photos, has hazardous waste which had leaked or been spilled out of the tanks in the plating line. There is a lot of crystal build up under the tank area in the wet process floors and some liquid. Discussed the management of wet process floors with Daniel, Alonso, and Barbara. Facility does some sand blasting and they have been having their sand blasting waste hauled as [Truncated]

Eval Notes:	INSPECTOR COMMENTS On-site for routine recycler inspection. The inspection was conducted with Barbara Ross, Daniel Doh, and Alonso Mejia. Also present was Terry Carrier of OCHCA. Consent to enter, inspect, and take photographs was given by Barbara Ross. The facility recycles hydraulic oil on site. The oil is removed from the shop machines, subject to vacuum dehydration and filtration prior to being returned to the presses. Tanks are used for storage of the used oil prior to recycling and recycled oil is stored in another tank and returned to the process when oil I needed. There have been no changes to the recycling process. UPC Forms for Recycling Activity dated 02/24/2016 were received today. The facility reports recycling 980 gallons of hydraulic oil over the previous two year reporting period. The recycling activity is authorized by H&SC 25143.2(d).

Eval Notes:	On site for a routine inspection. Permission to inspect was given to me by Barbara Ross, Environmental Engineer. This facility is a CalARP Program Level 1 facility. Program Level 1 chemicals include Sodium Cyanide, Potassium Cyanide and Cadmium Oxide. Storage areas were inspected and chemical volumes were verified. The Risk Management Plan (RMP) was re-validated/updated in August, 2016. The RMP included calculations and release plume modeling that indicated toxic endpoints that do not extend beyond the property line. I was not able to review documentation that response actions have been coordinated with local emergency planning and response agencies (Fullerton Fire). The RMP did not contain the required certification statement found in Title 19, CCR section 2735.5(d)(4). The violations on this report must be corrected immediately.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Waste Code:	D007
Waste Description:	CHROMIUM
Waste Code:	D008
Waste Description:	LEAD
Waste Code:	D009
Waste Description:	MERCURY
Waste Code:	D035
Waste Description:	METHYL ETHYL KETONE
Waste Code:	D039
Waste Description:	TETRACHLOROETHYLENE
Waste Code:	F003
Waste Description:	THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT

KIMBERLY-CLARK WORLDWIDE INC., FULLERTON MILL (Continued) **1000162914**

MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: U001
Waste Description: ACETALDEHYDE (I) (OR) ETHANAL (I)

Waste Code: U108
Waste Description: 1,4-DIETHYLENEOXIDE (OR) 1,4-DIOXANE

Waste Code: U122
Waste Description: FORMALDEHYDE

Environmental Interest/Information System:
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
SSTS (Section Seven Tracking System) evolved from the FIFRA and TSCA Enforcement System (FATES). SSTS tracks the registration of all pesticide-producing establishments and tracks annually the types and amounts of pesticides, active ingredients, and related devices that are produced, sold, or distributed each year.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as

KIMBERLY CLARK (Continued) **1000162915**

cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Hazardous Waste Summary:

Waste Code: D001
Waste Description: IGNITABLE WASTE

Waste Code: D002
Waste Description: CORROSIVE WASTE

Waste Code: D005
Waste Description: BARIUM

Waste Code: D035
Waste Description: METHYL ETHYL KETONE

Waste Code: F001
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F002
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

CPS-SLIC:

Name:	ORANGE COUNTY NORTH BASIN - VISTA PAINT
Address:	2020 EAST ORANGETHORPE AVE
City,State,Zip:	FULLERTON, CA 92831
Region:	STATE
Facility Status:	**Open - Site Assessment**
Status Date:	07/19/2019
Global Id:	T10000011480
Lead Agency:	SANTA ANA RWQCB (REGION 8)
Lead Agency Case Number:	Not reported
Latitude:	33.85889
Longitude:	-117.89525
Case Type:	Cleanup Program Site
Case Worker:	CAN
Local Agency:	Not reported
RB Case Number:	T10000011480
File Location:	Regional Board
Potential Media Affected:	Aquifer used for drinking water supply, Indoor Air, Soil, Soil Vapor, Under Investigation
Potential Contaminants of Concern:	1,1,1-Trichloroethane (TCA), 1,4-Dioxane, Dichloroethene (DCE), Tetrachloroethylene (PCE), Trichloroethylene (TCE), Perchlorate
Site History:	The Site is developed with a 121,972-square-foot industrial warehouse building constructed in 1981 to support operations by Vista Paint. The northern portion of the building is occupied by a retail store and offices, while the central and western portions of the building

VISTA PAINT CORP (Continued) **1000395320**

contain warehousing, manufacturing, a maintenance shop, and packaging areas. The building has exterior roll-up doors on the eastern and western sides of the building, and finished product storage and loading bays on the western side of the building. A water-based paint manufacturing area occupies the southeastern portion of the building. This area contains numerous mixing tanks to support paint manufacturing. Since approximately 1983, the Site has been used by Vista Paint for the manufacture, sale, and distribution of latex paints and other architectural coatings. Historically, these operations included the manufacture of water- and oil-based coatings. Available Site records disclosed the use of 1,1,1- trichloroethane (1,1,1-TCA) in the oil-based coating plant from 1990 until 1993 to comply with Air Quality Management District emissions requirements. Production records indicated that oil based paint products containing chlorinated solvent represented less than 5 percent of the total coating products. After 1993, Vista Paint reformulated its oil-based paint products to nonchlorinated products (paint thinner) and ceased manufacturing of oil-based paint altogether in 2008. Reportedly, Vista Paint did not use any other chlorinated VOCs in other Site operations.
