## Eligibility Checklist for Expedited Electric Vehicle Charging Station Permit: Non-Residential Buildings and Facilities

Type of Charging Station(s)	Power Levels (proposed circuit rating)	Chec	k one
Level 1	110/120 volt alternating current (VAC) at 15 or 20 Amps	S	
Level 2 - 3.3 kilowatt (kW) (low)	208/240 VAC at 20 or 30 Amps		
Level 2 – 6.6kW (medium)	208/240 VAC at 40 Amps		
Level 2 – 9.6kW (high)	208/240 VAC at 50 Amps		
Level 2 – 19.2kW (highest)	208/240 VAC at 100 Amps		
Other (provide detail):	Provide rating:		
Permit Application Requireme	ents:		
A. Does the application include EV	/CS manufacturer's specs and installation guidelines?	Y	□N
Electrical Load Calculation W  A. Is an electrical load calculation		П	
	, ,		
B. Based on the load calculation worksheet, is a new electrical service panel upgrade required?		□Y	
	the electrical service panel upgrade?	ПҮ	
, .		=-	+=,
C. Is the charging circuit appropri	ately sized for a continuous load of 125%?	IΠY	
	ately sized for a continuous load of 125%? ed is a Level 2 – 9.6 kW station with a circuit rating of 50	Y	
D. If charging equipment propose	•	Y	
D. If charging equipment propose Amps or higher, is a complete the single line diagram?	ed is a Level 2 – 9.6 kW station with a circuit rating of 50 d circuit card with electrical calculations included with		
D. If charging equipment propose Amps or higher, is a completed the single line diagram?  Site Plan and Single Line Draw  A. Is a site plan signed off by Plan	ving:  unning Division and a separate electrical plan with		
D. If charging equipment propose Amps or higher, is a completed the single line diagram?  Site Plan and Single Line Draw  A. Is a site plan signed off by Place a single-line diagram includ  1) If mechanical ventilation	ring:  anning Division and a separate electrical plan with ed with the permit application?  requirements are triggered for indoor venting	Y	
D. If charging equipment propose Amps or higher, is a completed the single line diagram?  Site Plan and Single Line Draw  A. Is a site plan signed off by Plate a single-line diagram includ  1) If mechanical ventilation	ving:  unning Division and a separate electrical plan with ed with the permit application?	Y	
D. If charging equipment propose Amps or higher, is a complete the single line diagram?  Site Plan and Single Line Draw  A. Is a site plan signed off by Planta single-line diagram includ  1) If mechanical ventilation requirements (CEC 625.5	ving:  anning Division and a separate electrical plan with ed with the permit application?  requirements are triggered for indoor venting (2 (B)), is a mechanical plan included with the	Y	
D. If charging equipment propose Amps or higher, is a complete the single line diagram?  Site Plan and Single Line Draw  A. Is a site plan signed off by Place a single-line diagram includ  1) If mechanical ventilation requirements (CEC 625.5 permit application?	ring:  unning Division and a separate electrical plan with ed with the permit application?  requirements are triggered for indoor venting (B), is a mechanical plan included with the and drawn to scale?	□ Y □ Y	
D. If charging equipment propose Amps or higher, is a completed the single line diagram?  Site Plan and Single Line Draw  A. Is a site plan signed off by Place a single-line diagram includ  1) If mechanical ventilation requirements (CEC 625.5 permit application?  B. Is the site plan fully dimension  1) Showing location, size, ar	ring:  unning Division and a separate electrical plan with ed with the permit application?  requirements are triggered for indoor venting (B), is a mechanical plan included with the and drawn to scale?	YYY	

## Compliance with the California Electrical Code:

A. [	Does the plan include EVCS manufacturer's specs and installation guidelines?	П	ПИ
	Does the electrical plan identify the amperage and location of existing electrical	 □Y	□N
	service panel?  1) If yes, does the existing panel schedule show room for additional breakers?	 □Y	□ · ·
C. I	Is the charging unit rated more than 60 amps or more than 150V to ground?	Y	N
	If yes, are disconnecting means provided in a readily accessible location in line of site? (CEC 625.43)	□Y	□N
D. [	Does the charging equipment have a Nationally Recognized Testing Laboratory (NRTL) approved listing mark? (UL 2202/UL 2200)	ΠY	□и
E. If	ftrenching is required, is the trenching detail called out?	Υ	□N
	1) Is the trenching in compliance with minimum cover requirements for wiring methods or circuits? (18" for direct burial per CEC 300.5)	ΠY	□N
Cor	npliance with the California Green Building Standards Code (CGBSC):		
A. [	Do the CAL Green EV Readiness installation requirements apply to this project?	□Y	□N
	Do the plans demonstrate conformance with <b>CGBSC Table 5.106.5.3.3</b> for the minimum required number of charging spaces?	ΠY	□и
	2) Do the construction plans comply with the design requirements set forth in <b>CGBSC</b> 5.106.5.3.1 for single charging spaces or <b>CGBSC</b> 5.106.5.3.2 for multiple charging spaces?	ΠY	□N
В. І	Do the plans clearly depict all required accessible EVCS features for the disabled?	□Y	□N
	Do the plans identify the correct number and type of accessible EVCS stalls required in accordance with Table 11B-228.3.2.1?	Y	□N
	<ol> <li>Do the plans detail compliance with the accessible EVCS features required by 11B-812 and Figure 11B-812.9?</li> </ol>	ΠY	ПИ
es:	This criteria is intended for an expedited EVCS permitting process. If any items are please revise plans to fit within the eligibility checklist; otherwise the permit application through the standard plan review and approval process. Plan review commences submittal with up to 3 business days for qualifying expedited projects and up to 10 burall other EVCS projects.	ation n the da	nay go y after
	Electrical plans shall be completed, stamped and signed by a California Licensed Electrical contractor.	ctrical E	nginee
	EVCS project review is limited to health and safety requirements found under local, sto law. EVCS permit approval is not subject to approval of an association (as defined in the Civil Code).
